

ABYC A-24 July 2020

Equipment Division Standard
Fire Fighting and Detection Systems
Project Technical Committee

The ABYC Standards and Technical Information Reports for Small Craft are the product of a consensus of representatives of government, industry, and public sectors. It is intended solely as a guide to aid manufacturers and the marine community in the design, construction, equipage, and maintenance of small craft.

ABYC reviews each standard at least every five years at which time it may be reaffirmed, revised, or withdrawn. ABYC welcomes any written comments on the standards and technical information reports.

A-24 7/20

Origin and Development

ABYC first published A-24 in 1992 as *Carbon Monoxide Detection Systems*. Subsequent revisions were published in 1997, 2002, 2007, and 2015. In 2020 the title was changed to *Installation of Carbon Monoxide Detectors and Alarms*. The 2020 update is the work of the Fire Fighting and Detection Systems Project Technical Committee.

Fire Fighting and Detection Project Technical Committee

This list represents the membership at the time the committee was balloted.

Thomas Marhevko, *Chair* David Marlow, *Vice Chair*

Gregory Davis John Malool Ray Strege
Perry DeYoung Robert Newsome Jeff Wisniewski
Ernest Ellis Louis Novak

Membership on a committee shall not in and of itself constitute an endorsement of ABYC or any document developed by the committee on which the member serves.

This standard, which is the result of extended and careful consideration of available knowledge and experience on the subject, was developed under procedures accredited as meeting the criteria for American National Standards and is intended to provide minimum performance requirements. The Project Technical Committee that approved the standard was balanced to ensure that individuals from competent and concerned interests have had an opportunity to participate.

ABYC's Project Technical Committee (PTC) meetings are open to the public. All inquiries regarding standards activity, interpretations, or meeting attendance should be directed to the ABYC Technical Department at comments@abycinc.org.

ABYC and its committees do not "approve" or "endorse" any item, construction, or proprietary device.

Request for Interpretations

Upon written request, the Fire Fighting and Detection Systems PTC will render an interpretation of any requirement of the standard. The request for interpretation should be clear and unambiguous. Requests should be presented to the PTC in a manner in which they may be answered in a "Yes" or "No" fashion.

The committee reserves the right to reconsider any interpretation when or if additional information that might affect it becomes available to the PTC. Persons aggrieved by an interpretation may appeal to the committee for reinterpretation.
