

ABYC H-22 July 2020

Hull Division Standard

Hull Piping Project Technical Committee

The ABYC Standards and Technical Information Reports for Small Craft are the product of a consensus of representatives of government, industry, and public sectors. It is intended solely as a guide to aid manufacturers and the marine community in the design, construction, equipage, and maintenance of small craft.

ABYC reviews each standard at least every five years at which time it may be reaffirmed, revised, or withdrawn. ABYC welcomes any written comments on the standards and technical information reports.

ABYC H-22

ELECTRIC BILGE PUMP SYSTEMS

H-22
7/20

Origin and Development

The requirements of this standard were originally incorporated as part of A-10, *Electrically Operated Bilge Pumps*, which was published in 1970 as a proposed standard. Subsequently, H-22, as currently titled, was published in 1974, revised and published again in 1977, 1986, 1998, 2005, and 2011. The 2020 revised version is the work of the ABYC Hull Piping Project Technical Committee.

Hull Piping Project Technical Committee

This list represents the membership at the time the committee was balloted.

Jon Sheller, *Chair*
Simon McFarland, *Vice Chair*

Pat Armano
Scott Berry

Steve D'Antonio
Dave Marlow

Louis Novak
Ed Wisner

Membership on a committee shall not in and of itself constitute an endorsement of ABYC or any document developed by the committee on which the member serves.

This standard, which is the result of extended and careful consideration of available knowledge and experience on the subject, was developed under procedures accredited as meeting the criteria for American National Standards and is intended to provide minimum performance requirements. The Project Technical Committee that approved the standard was balanced to ensure that individuals from competent and concerned interests have had an opportunity to participate.

ABYC's Project Technical Committee (PTC) meetings are open to the public. All inquiries regarding standards activity, interpretations, or meeting attendance should be directed to the ABYC Technical Department at comments@abycinc.org.

ABYC and its committees do not "approve" or "endorse" any item, construction, or proprietary device.

Request for Interpretations

Upon written request the Hull Piping PTC will render an interpretation of any requirement of the standard. The request for interpretation should be clear and unambiguous. Requests should be presented to the PTC in a manner in which they may be answered in a "Yes" or "No" fashion.

The committee reserves the right to reconsider any interpretation when or if additional information that might affect it becomes available to the PTC. Persons aggrieved by an interpretation may appeal to the committee for reinterpretation.
