GPTC GUIDE FOR GAS TRANSMISSION AND DISTRIBUTION PIPING SYSTEMS

2009 EDITON

January 2009

The changes in this new edition are marked by wide vertical lines inserted to the left of modified text, overwriting the left border of most tables, and use of a block symbol (■) where needed. The Federal Regulations were changed by four amendment actions that affected thirteen sections of the Guide. Four GPTC transactions affected five sections of the Guide.

Editorial updates include application of the Editorial Guidelines, updating reference titles, adjustments to page numbering, and adjustment of text on pages. A major review of the document provided numerous publication and editorial refinements for improved format, consistency, and clarity. Additionally, the Index was enhanced to include coverage of the Guide Material Appendices. Since the Guide is being republished, editorial updates are too numerous to mark.

The following table shows the affected sections.
