

APPENDIX C

STANDARD for

**ANALYTICAL
PROCEDURES
FOR ARI
STANDARD
700-99**

**Appendix C
to ARI 700-99**

IMPORTANT

SAFETY RECOMMENDATIONS

It is strongly recommended that the product be designed, constructed, assembled and installed in accordance with nationally recognized safety requirements appropriate for products covered by this standard.

ARI, as a manufacturers' trade association, uses its best efforts to develop standards employing state-of-the-art and accepted industry practices. However, ARI does not certify or guarantee safety of any products, components or systems designed, tested, rated, installed or operated in accordance with these standards or that any tests conducted under its standards will be non-hazardous or free from risk.

FOREWORD

The intent of this Appendix is to establish definitive test procedures for determining the quality of new, reclaimed and/or repackaged refrigerants for use in new and existing refrigeration and air-conditioning equipment within the scope of ARI.

These test methods are established as referee test methods. If alternative test methods are employed, the user must be able to demonstrate that they produce results at least equivalent to the specified referee test methods (see Section 7 of each test method for information concerning the sensitivity, precision and accuracy of that test method).

Note:

This Appendix C to ARI Standard 700-99 supersedes Appendix C to ARI Standard 700-95.
