Foreword

Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretation should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of approval.

Introduction

The American National Standards Institute first published the American National Standard Specifications for Check Endorsements, ANS X9.3-1981, in response to recommendations of a Joint Exception Item Task Force, consisting of members of the American Bankers Association, the Bank Administration Institute, the Federal Reserve, and commercial bankers.

In 1985, the Federal Reserve Board implemented a requirement for notice of dishonor for large dollar checks, which mandates notice by a payor institution to the Bank of First Deposit directly, rather than via the chain of endorsements.

In 1988, the Federal Reserve enacted Regulation CC and carried this concept further by requiring the expeditious return of checks to the Bank of First Deposit. Regulation CC did not require bypassing intermediate institutions, for, in some instance, Federal Reserve Banks are themselves intermediate institutions. Therefore, the present document addresses differentiation and highlighting of that critical endorsement, the Bank of First Deposit (BOFD). This standard, however, also recognizes the ongoing need to identify the chain of endorsers and responds to that need by streamlining the endorsements of holders subsequent to the BOFD.

In 1993, the ASC X9 developed the standard ANS X9.36, Legibility Specifications for Endorsements in order to enhance the human readability of endorsements, which are required by Regulation CC. In 1995 the ASC review committee combined the intent of ANS X9.36 and ANS X9.3 into ANS X9.53 – 1995 because significant forces of change had altered the needs of the industry with respect to endorsements. ANS X9.53 superseded ANS X9.36 and ANS X9.3 – both of which have been withdrawn.

In 2000 the ASC review committee found it necessary to incorporate reflectance and PCS specifications for the Payee and Bank of First Deposit Areas to further improve endorsement legibility, especially in imaging applications. This new standard, ANSI X9.100-111 replaces ANS X9.53 with new “image friendly” specifications, while adapting to a new numbering system. This standard still provides specifications to financial institutions and their customers on endorsement content, legibility, and color as well as separate placement of three kinds of endorsements: payee, Bank of First Deposit, and subsequent institutions. As of 2003, all ANSI X9 check-related standards have been renumbered as detailed in ASC X9/TR-100, available as a free download at the [ANSI eStandards Store](#).

The establishment of these specifications is considered another step leading toward automation of the return item process and reduction of related exception item processing costs. With the increased use of imaging technology to provide further automation in check processing, compliance of the legibility specifications is especially important as the use of color to separate endorsements is of diminishing usefulness.

The developers of this standard recognize that recent payment system modernization initiatives, namely *The Check Clearing for the 21st Century Act* (Check 21) and subsequent rapid expansion of image exchange have both introduced new techniques for identifying endorsing banks as well as the new roles of both truncating and reconverting banks. This standard does not intend to answer all questions related to those approaches. The new standard related to Check 21 and proper creation of substitute checks (IRD) is covered in ANSI X9.100-140. Image exchange file formats which contain records to convey endorsements in electronic form are defined in ANSI X9.100-187, as well as the earlier standards, DSTU X9.37 (retired).

At the time this standard was approved, the **X9** committee had the following members:

Roy C. DeCicco, X9 Chairman
 Claudia Swendseid, X9 Vice Chairman
 Steve Stevens, X9 Executive Director
 Janet Busch, Managing Director

Organization Represented	Representative

Under ASC X9 procedures, a working group may be established to address specific segments of work under the ASC X9 Committee or one of its subcommittees. A working group exists only to develop standard(s) or guideline(s) in a specific area and is then disbanded. The individual experts are listed with their affiliated organizations. However, this does not imply that the organization has approved the content of the standard or guideline.

The X9AB14 working group that developed this standard had the following members:

Daniel Welch, Co-Chair & Editor, Bank of America
Jezreel Espeleta, Chair, Navy Federal Credit Union

Organization Represented	Representative
All My Papers	Ray Higgins
Bank of America	Daniel Welch
Deluxe Corporation.....	Angela Hendershott

Check Endorsements

1 Scope

This standard provides the location for all physical check endorsements and electronic endorsement overlays applied to check images.

This standard specifies the parameters for the background and design elements on the back of the check and the placement and data content of endorsements.

This standard is not intended to apply to the format of electronic endorsement records, as defined within check image exchange standards (X9.100-187), the creation of substitute checks (X9.100-140) or endorsements on the front of the physical check or its image.

For more information on electronic endorsements, refer to [Check Image Central](#) for guidance.
