

**American National Standard
For Financial Services
X9.100-180-2006**

(Formerly published as DSTU X9.37-2003)

**Specifications for Electronic
Exchange of Check and Image Data
(non-domestic)**

Accredited Standards Committee X9, Incorporated
Financial Industry Standards

Date: July 11, 2006 (R2009)

American National Standards Institute

Note: 2009 revision is a title change only, with reaffirmation of 2006 version. The new title is to distinguish this versatile exchange standard, from similar standards which are only intended for use in the United States of America (i.e. retired DSTU X9.37 and ANS X9.100-187).

Contents

Figures.....	xiv
Tables.....	xv
Foreword.....	xvi
Introduction.....	xvii
1 Scope, Purpose, and Application	1
1.1 Scope.....	1
1.2 Presentment Disclaimer.....	1
1.3 Purpose and Application	1
2 References	2
3 Terms and Definitions.....	2
4 File Structure.....	5
4.1 Record Types.....	6
4.2 File Structure Requirements	7
5 Character and Field Data Type Specifications	14
5.1 Basic Character Type Definitions	14
5.1.1 Alphabetic Characters (A)	14
5.1.2 Blank (B).....	14
5.1.3 Numeric Characters (N).....	15
5.1.4 Questionable Data Character – (Q).....	15
5.1.5 Special Printable Characters (S).....	15
5.2 MICR Special Characters (M).....	15
5.2.1 MICR Amount Symbol (Ma).....	15
5.2.2 MICR Can't Read (Mc).....	15
5.2.3 MICR Dash Symbol (Md)	15
5.2.4 MICR On-U's Symbol (Mo)	15
5.2.5 MICR Transit (Routing) Symbol (Mr).....	16
5.3 Field Data Types	16
5.3.1 All Blank (AB).....	16
5.3.2 Alphabetic (A)	16
5.3.3 Alphanumeric (AN)	16
5.3.4 Alphanumeric/Comma Delimited (ANC).....	16
5.3.5 Alphanumeric/Special (ANS).....	16
5.3.6 Binary.....	17
5.3.7 Numeric (N)	17
5.3.8 Numeric/Blank Fill (NB).....	17
5.3.9 Numeric/Blank Fill/Dash (NBD)	17
5.3.10 Numeric/Blank Fill/Questionable Data (NBQ).....	17
5.3.11 Numeric/Blank/MICR Can't Read (NBMc).....	17
5.3.12 Numeric/Blank/MICR Can't Read and Dash (NBMcd)	17
5.3.13 Numeric/Blank/MICR Can't Read, Dash, and On-U's (NBMcdo)	17
5.3.14 Numeric/Blank/MICR Unparsed (NBMU)	17
5.4 General Field Rules	18
5.5 User Fields	18

ANS X9.100-180-2006

6	Table Headings Title Descriptions.....	19
6.1	Field	19
6.2	Field Name	19
6.3	Usage	20
6.4	Position.....	20
6.5	Size.....	20
6.6	Type	20
6.7	Format.....	20
6.8	Defined Values	20
7	File Header Record (Type 01).....	21
7.1	Record Type	21
7.2	Standard Level	21
7.3	File Type Indicator	22
7.4	Immediate Destination Routing Number	22
7.5	Immediate Origin Routing Number	22

8	Cash Letter Header Record (Type 10).....	26
8.1	Record Type	26
8.2	Collection Type Indicator.....	26
8.3	Destination Routing Number.....	27
8.4	ECE Institution Routing Number	28
8.5	Cash Letter Business Date.....	28
8.6	Cash Letter Creation Date	28
8.7	Cash Letter Creation Time.....	29
8.8	Cash Letter Record Type Indicator.....	29
8.9	Cash Letter Documentation Type Indicator	30
8.10	Cash Letter ID	30
8.11	Originator Contact Name.....	30
8.12	Originator Contact Phone Number	31
8.13	Work Type	31
8.14	User Field	32
9	Bundle Header Record (Type 20).....	33
9.1	Record Type	33
9.2	Collection Type Indicator.....	33
9.3	Bundle Destination Routing Number	34
9.4	Bundle ECE Institution Routing Number	34
9.5	Bundle Business Date.....	35
9.6	Bundle Creation Date	35
9.7	Bundle ID.....	36
9.8	Bundle Sequence Number.....	36
9.9	Cycle Number	36
9.10	Return Location Routing Number.....	36
9.11	Bundle Creation Time	37
9.12	User Field	37
9.13	Reserved.....	37

10	Check Detail Record (Type 25).....	38
10.1	Record Type.....	38
10.2	Auxiliary On-Uss.....	39
10.3	External Processing Code.....	39
10.4	Payor Bank Routing Number.....	39
10.5	On-Uss.....	40
10.6	Item Amount.....	40
10.7	ECE Institution Item Sequence Number.....	40
10.8	Documentation Type Indicator.....	40
10.9	Electronic Return Acceptance Indicator.....	41
10.10	MICR Valid Indicator.....	41
10.11	BOFD Indicator.....	42
10.12	Check Detail Record Addendum Count.....	42
10.13	Correction Indicator.....	42
10.14	Archive Type Indicator.....	42
11	Check Detail Addendum A Record (Type 26).....	44
11.1	Record Type.....	44
11.2	Check Detail Addendum A Record Number.....	45
11.3	Return Location Routing Number.....	45
11.4	BOFD Business Endorsement Date.....	45
11.5	BOFD Item Sequence Number.....	46
11.6	Deposit Account Number at BOFD.....	46
11.7	BOFD Deposit Branch.....	46
11.8	Payee Name.....	46
11.9	Truncation Indicator.....	46
11.10	BOFD Conversion Indicator.....	47
11.11	BOFD Correction Indicator.....	47
11.12	BOFD Magnetic Read Indicator.....	48
11.13	User Field.....	48
11.14	Reserved.....	48
12	Check Detail Addendum B Record (Type 27).....	49
12.1	Record Type.....	49
12.2	Item Description.....	50
12.3	Image Capture Date.....	50
12.4	Image Capture Time.....	50
12.5	Microfilm Archive Sequence Number.....	50
12.6	Length of Image Archive Locator.....	51
12.7	Length of Captured Unparsed MICR Data.....	51
12.8	Length of Captured High Unparsed MICR Data.....	51
12.9	Length of Corrected Unparsed MICR Data.....	51
12.10	Length of Corrected High Unparsed MICR Data.....	52
12.11	Length of User Data.....	52
12.12	Reserved.....	52

ANS X9.100-180-2006

Foreword

Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of approval.

Introduction

The purpose of this standard is to provide the financial industry with a format necessary to perform electronic check exchange (ECE), with or without images. The format supports forward presentment, posting, return notification, IRD printing and presentment and returns, as well as existing customer information reporting products. The standard also supports multiple check clearing alternatives, e.g., bank-to-bank, bank-to-switch.

This standard has been modified from its original design to allow check images to be linked to and transmitted along with the (financial) posting data. The standard utilizes a cash letter structure to support the exchange of posting data only, posting data and check images, or posting data followed by a file of posting data and check images. This standard can also be used to exchange financial data and images with other applications, such as remote deposit and lockbox processes. This standard defines a variable length formatted file. Some records within the file contain variable content and others retain fixed length content as in previous X9.37 standards.

The standard was designed to accommodate and work with existing data formats used to transmit check-related data, and to provide flexibility in accommodating future developments in check processing and check product offerings. The use of this standard will enable financial institutions to cut processing costs and fraud losses by reducing the number of times a paper item must be handled, and by shortening the forward presentment and return cycle time frames.

Initially conceived as a necessary step in preparation for enactment of the Federal Reserve Board's Same-day Settlement proposal, it quickly became evident that the standard would benefit the US Payments System in other ways.

The standard was originally developed for the Accredited Standards Committee on Financial Services, ASC X9, by the Subcommittee for Electronic Wholesale Payment Related & EDI Financial Services Standards, ASC X9E and has been revised by the Subcommittee for Check Processing, ASC X9B.

There are fifteen annexes in this standard. Annexes A, B, C, D, E, F, and G, are normative and are considered part of this standard; Annexes H, I, J, K, L, M, N and O are informative and are not considered part of this standard. Users of the standard are warned against using clauses of the standard, especially the record layouts, out of context. Clauses 1.0 through 6.8, and the normative annexes, provide information essential to the successful use of the record layouts and to the successful implementation of the standard itself.

X9 intends to develop a new Part 2 to this standard which will establish required TIFF 6.0 tags and associated values to support the exchange of check images. This new Part 2 will be developed within the next twelve months.

NOTE - The user's attention is called to the possibility that compliance with this standard may require use of an invention covered by patent rights.

By publication of this standard, no position is taken with respect to the validity of this claim or of any patent rights in connection therewith.

Suggestions for the improvement or revision of this standard are welcome. They should be sent to the Accredited Standards Committee X9, Inc., 1212 West Street, Suite 200, Annapolis, Maryland 21401 USA.

ANS X9.100-180-2006

This Standard was processed and approved for submittal to American National Standards Institute (ANSI) by the Accredited Standards Committee on Financial Services, X9. Committee approval of the Standard does not necessarily imply that all the committee members voted for its approval.

The **X9 committee** had the following members:

Jim Shaffer, X9 Chairman

Vincent DeSantis, X9 Vice-Chairman

Cynthia Fuller, Executive Director

Susan Yashinskie, Program Manager

Under ASC X9 procedures, a working group may be established to address specific segments of work under the ASC X9 Committee or one of its subcommittees. A working group exists only to develop standard(s) or guideline(s) in a specific area and is then disbanded. The individual experts are listed with their affiliated organizations. However, this does not imply that the organization has approved the content of the standard or guideline.

(Note: Company names of non-member participants listed only if release form was signed.)

Working Group X9B6 on Electronic Exchange of Check and Image Data which developed this standard had the following participants:

Phyllis Meyerson, Chair, ECCHO

American National Standard for Financial Services – Specifications for Electronic Exchange of Check and Image Data (non-domestic)

1 Scope, Purpose, and Application

1.1 Scope

This standard, including the normative annexes, establishes the file sequences, record types and field formats to be used for the electronic exchange of check MICR line data, associated check processing data, check images and optional user information in the form of cash letters.

This standard does not address operational, implementation or settlement issues. These issues may include, but are not limited to, a choice of: data and image compression, encryption, and transmission specifications and data representation. The informative annexes attached to this standard provide useful information for implementing the standard.

Data security and privacy issues related to the use of this standard are outside the scope of the standard. Users of the standard are advised to refer to ANS X9.73 Cryptographic Message Syntax (CMS), DSTU X9.99-2004, Privacy Impact Assessment Standard and the Gramm Leach Bliley Act.

1.2 Presentment Disclaimer

“Presentment” is used throughout this standard in a colloquial sense only: to refer to or to describe an operational process, the movement of checks and check-related data from a collecting bank to a paying bank.

In no instance shall use of the term “presentment” in the standard be construed as a legal definition of presentment, or as a description of when presentment as a legal event occurs. Nor does its use in any way define the legal rights and responsibilities of parties participating in the check clearing process, or parties otherwise interested in a check.

This standard shall not be used by parties in dispute to define legal standards of conduct in the check clearing process, and cannot be relied upon in that context. Parties interested in the legal standards governing the check clearing process should consult the Uniform Commercial Code, Regulation CC - Availability of Funds and Collection of Checks, Federal Reserve Operating Circulars, Clearinghouse rules, other clearing agreements, relevant case law, and other sources of applicable law.

1.3 Purpose and Application

The purpose of this standard is to provide a structure to facilitate electronic exchange of check-related data and images for the purposes of forward check presentment, IRD creation, return item notification, and returns processing.
