# Financial Transaction Messages – Electronic Benefits Transfer (EBT) – Food stamps - Technical Corrigendum

## 1 Scope

This technical corrigendum corrects and clarifies the processing requirements for store and forward transactions. The standard had described the use of *Original data elements* (bit 90) and *Replacement amounts* (bit 95) to identify and contain data related to store and forward transactions. The corrigendum adds a data set identifier for *Additional data private, Acquirer* (bit 111) to accomplish this.

On the incoming 200 Financial Presentment message, Additional Data Private, Acquirer field (bit 111) will contain a "SF" defining the incoming transaction as a Store and Forward Transaction followed by up to 7 characters of data. Original data elements (bit 90) will not be used, as the store and forward transaction is the original transaction.

On the 210 Financial Presentment response message, if there is a partial approval (*Response code*, Bit 39, is "10"), the original *Amount, transaction* (bit 4), will be placed in *Additional amounts* (bit 54), with an amount type of "91", and *Amount, transaction* (bit 4) will contain the approved transaction amount. Replacement amounts (bit 95) will not be used to contain the original amount of the transaction.

## 2 Corrections

The following paragraphs identify the corrections and changes to X9.58-2007 by Clause. Where corrections are made to a table, the Table number is identified. The changes are listed in the order that they occur in the standard. Inserted text is indicated in red. Deleted text is indicated by strikethroughs.

### 2.1 Changes to Table 2 - Data element directory in Clause 6.1

In Table 2 - Data element directory, the description for data element, *Actual amount, transaction* (bit 95-1) is corrected as follows:

Name	Description	Format	Representation	Notes	Bit
Actual amount, transaction	the <b>actual amount of the</b> completed transaction; contained in Replacement amounts		n 12	See 6.2.8	95-1
