

ASC X9 TR 6–2016

Quality MICR Printing and Evaluation

A Technical Report prepared by:
Accredited Standards Committee X9, Incorporated
Financial Industry Standards

Registered with American National Standards Institute

Date Registered: June 26, 2016

Contents	Page
Foreword	vii
Quality MICR Printing and Evaluation	1
1 Introduction.....	1
1.1 Scope and Purpose	1
1.2 What you need to know in this technical report	2
2 Normative References.....	3
3 Terms and Definitions	4
4 General	7
4.1 An Overview of tools and Processes	7
4.2 Document Sampling and Sample Size	8
4.3 Other Considerations with MICR Quality Control	8
5 MICR Evaluation Tools and Techniques	9
5.1 Human Eye and Hand.....	9
5.2 MICR Position and Dimension Gauge	9
5.3 Small Optical Comparator (8X-12X Magnification)	12
5.4 Large Optical Comparator (20X-50X Magnification)	13
5.5 Microscope.....	14
5.6 Magnetic Tester	15
5.7 Debossment and Embossment Testers	15
5.8 Paper Testing.....	15
5.9 MICR Document Specification Form	15
6 Optical Evaluation	16
6.1 Basics of Optical Document Evaluation	16
6.2 The MICR Clear Band and Optical Clear Band	17
6.3 Paper.....	17
6.4 Optical Background	17
6.5 Optical Format	17
6.6 MICR Positioning.....	17
6.7 Adjacent Character Spacing and Alignment	19
6.8 Character and Line Skew.....	20
6.9 Basic Character Dimensions.....	21
6.10 Average Edge.....	21
6.11 Basic Tolerances	22
6.12 Edge Irregularity Allowances	22
6.13 Vertical and Horizontal Bars	22
6.14 Voids.....	22
6.14.1 Uniformity of Ink	27
6.15 Extraneous Ink.....	28
6.16 Debossment and Embossment.....	28
7 Calibration Documents	28
7.1 What is a Calibration Document?	28

ASC X9 TR 6-2016

7.2	Calibration Standards	29
7.3	Basic Usage.....	29
8	Magnetic Evaluation	29
8.1	Basics of Magnetic Document Evaluation	29
8.2	Signal Strength	30
8.3	Testing of all Character Peaks	30
8.4	First Peak Importance	30
8.5	Signal Level Limits	31
8.6	Horizontal Peak Locations.....	31
8.7	Non-Uniformity of the Waveform	31
8.8	Extraneous Peaks.....	34
8.9	Skew and Edge Irregularities.....	35
9	Debossment and Embossment	36
9.1	General.....	36
9.2	Debossment	37
9.3	Embossment	37
9.4	Manual Detection of Debossment and Embossment.....	38
9.5	Measurement of Debossment and Embossment	38
10	Paper	39
10.1	Introduction	39
10.2	Basis Weight of Paper	40
10.3	Grain Direction	40
10.4	Fillers, Coating and Background Inks	41
10.5	Moisture Level.....	41
10.6	Electrical Properties	42
10.7	Other Considerations	42
11	MICR Readers and Reader/Sorters	43
11.1	General Concepts	43
11.2	Reader/Sorter Types.....	43
11.3	Document Handling.....	44
12	Permanence.....	44
12.1	Introduction	44
12.2	Permanence of Ink Regarding Fold Resistance	45
13	Vendor Responsibility	45
13.1	Introduction	45
13.2	Parameters	46
13.3	User Education.....	46
13.4	Verification and Testing of MICR Printing Systems.....	46
13.5	Non-Impact Printing Guidelines	47
13.5.1	Hardware.....	47
13.5.1.1	Paper Registration	47
13.5.1.2	Development.....	47
13.5.1.3	Other Hardware Issues	47
13.5.1.4	Service/Maintenance Program.....	47
13.5.2	Software.....	48
13.5.2.1	E-13B Font	48
13.5.2.2	Printer Alignment	48
13.5.2.3	Quality Assurance.....	48
13.5.2.4	MICR Line Spacing.....	48
13.5.3	MICR Supplies.....	48
13.5.3.1	MICR Dry Ink (Toner)	48
13.5.3.2	MICR Dry Ink Cartridges	48

13.5.3.3	MICR Bond Paper.....	48
13.5.4	Quality Assurance.....	48
13.5.4.1	Quality Check List.....	49
13.5.5	Security.....	49
13.5.6	Services.....	49
13.5.6.1	Document Design.....	49
13.5.6.2	Digitizing Service.....	49
13.5.6.3	MICR Document Testing.....	50
13.5.6.4	Hardware and Software Maintenance.....	50
13.5.6.5	MICR Quality Assurance.....	50
Annex A	E-13B – MICR Character Outlines.....	51
A.1	Introduction.....	51
A.2	MICR Character Outlines.....	52
Annex B	Signal Levels and Waveforms.....	56
B.1	Introduction.....	56
B.2	Signal Levels and Wave Forms.....	56
Annex C	Magnetic Inks.....	64
C.1	Introduction.....	64
C.2	MICR Ribbons.....	64
C.3	MICR Dry Ink (Toner).....	65
C.4	MICR Wet Ink.....	65
C.5	Basic Physical Properties of MICR Ink.....	66
C.6	Technical Definitions.....	66
C.7	Magnetic Ink Guidelines.....	67
Annex D	MICR Quality Control Checklist.....	68
D.1	Checklist.....	68
D.2	General Inspection.....	68
D.2.1	Compare the MICR line format with the correct format for your bank.....	68
D.2.2	Quickly flip through the deck.....	68
D.2.3	Check a few samples for debossment or embossment using your finger tips.....	68
D.3	Check Registration, Layout and Document Dimensions.....	68
D.3.1	Make sure that all fields fall in the correct areas.....	68
D.3.2	Check for clear band intrusion, i.e., image in the clear band.....	69
D.3.3	Check for proper MICR line registration.....	69
D.3.4	Scan for possible character-to-character spacing and skew problems.....	69
D.3.5	Check character-to-character vertical alignment.....	69
D.3.6	Check document dimensions against specification.....	69
D.4	Check for Voids, Extraneous Ink and Other Print Defects.....	69
D.4.1	Examine the front of the clear band for extraneous ink.....	69
D.4.2	Examine the back of the clear band for extraneous ink.....	69
D.4.3	Examine all characters for voids.....	69
D.5	Check MICR Image Quality Specification Conformance.....	70
D.5.1	Compare character average edge outline with specification.....	70
D.5.2	Compare horizontal stroke width with specification.....	70
D.5.3	Compare edge irregularity with specification.....	70
D.6	Check MICR Signal Strength.....	70
D.6.1	Compare designated peak signal strength with specification for all characters.....	70
D.6.2	Examine character waveforms for non-uniformity or irregularities.....	70
D.6.3	Examine extraneous ink, if present, to verify that ink is magnetic.....	70

ASC X9 TR 6-2016

D.6.4 Examine clear band intrusions, if present, to verify that ink is magnetic 70
D.6.5 Evaluate debossed characters for waveform uniformity 70
D.7 Check Debossment/Embossment..... 70
D.7.1 Compare debossment / embossment levels with specification 70
D.8 The “Live” Test 70
D.8.1 Inform document producer of format or layout problems 71
D.8.2 Assess severity of specification shortfalls, if any 71
D.8.3 Grade and Inform 71
Annex E Conversion Table 72

Foreword

Since the introduction of the MICR (Magnetic Ink Character Recognition) document in 1957, which provided for the initial automation of the check processing system, there have been significant advances in technologies involved with the printing, processing, and testing of checks. Developments in these technologies have led to the expansion of the number of people with direct involvement in the production of MICR documents.

It is important to note that MICR quality requirements apply uniformly to all checks. While quality requirements may vary with application, there is generally no way to target documents for a specific application.

In 1988, when a major revision of American National Standard (ANS) X9.27, *Print Specifications for Magnetic Ink Character Recognition (MICR)*, was approved and printed, ASC X9B determined that additional work was required regarding MICR print quality. As a result, ASC X9B maintained an Ad Hoc MICR Print Quality Working Group that met at least three times each year until 1995. This group was concerned with addressing the challenges faced with the introduction of new MICR printing technologies.

This technical report is an effort to document much of what the original Ad Hoc MICR Print Quality Working Group felt was essential to be put into a single reference for industry use and as an educational tool for new comers. The initial report, issued as an ASC X9B Technical Guideline, TG-6, was published in 1995, and updated in 2000. The report content has been reviewed and updated to reflect the current MICR environment. In addition to the main body of the report, there are seven annexes in this technical report, which are provided for information purposes only.

This document is the product of many people's efforts over several years; however, our entire group would like to honor the memory of Glenn Mulligan, Xerox Corporation, who was the initial editor. Glenn was instrumental in arranging the original text and composing many of the illustrations prior to his death in 1993.

Publication of this Technical Report that has been registered with ANSI has been approved by the Accredited Standards Committee X9, Incorporated, 275 West Street, Suite 107, Annapolis, MD 21401. This document is registered as a Technical Report according to the "Procedures for the Registration of Technical Reports with ANSI." This document is not an American National Standard and the material contained herein is not normative in nature. Published by

No part of this publication may be reproduced in any form, in an electronic retrieval system or otherwise, without prior written permission of the publisher. Published in the United States of America. NOTE The user's attention is called to the possibility that compliance with this technical report may require use of an invention covered by patent rights.

By publication of this technical report, no position is taken with respect to the validity of this claim or of any patent rights in connection therewith. The patent holder has, however, filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license. Details may be obtained from the standards developer.

Suggestions for the improvement or revision of this Technical Report are welcome. They should be sent to the X9 Committee Secretariat, Accredited Standards Committee X9, Inc., Financial Industry Standards, 275 West Street, Suite 107, Annapolis, MD 21401 USA.

This Technical Report was processed and registered for submittal to ANSI by the Accredited Standards Committee on Financial Services, X9. Committee approval of the Technical Report does not necessarily imply that all the committee members voted for its approval.

Under ASC X9, Inc. procedures, a working group may be established to address specific segments of work under the ASC X9 Committee or one of its subcommittees. A working group exists only to develop standard(s) or technical report(s) in a specific area and is then disbanded. The individual experts are listed with their affiliated organizations. However, this does not imply that the organization has approved the content of the standard or technical report. (Note: Per X9 policy, company names of non-member participants are listed only if, at the time of publication, the X9 Secretariat received an original signed release permitting such company names to appear in print.)

The X9AB7 MICR Print and Quality Standards working group which developed this technical report had the following members:

Wally Burlingham, Source Technologies, Chairman and Project Editor

Organization Represented	Representative
All My Papers	Larry Krummel
All My Papers	Ray Higgins
All My Papers	Larry Krummel
Bank of America	Andi Coleman
Bank of America	Staci Smith

Quality MICR Printing and Evaluation

1 Introduction

1.1 Scope and Purpose

This technical report covers all MICR printing and is intended to improve MICR quality via understanding and uniform interpretation of existing standards and specifications of MICR. The basic elements of MICR are defined in existing American National Standards, which are referenced where appropriate. This document serves as a single reference for the foremost set of elements that will produce quality MICR documents.

The purpose of the document is to aid existing MICR printers as well as a new and ever expanding producer group in the production and evaluation of MICR documents, and, to attain broader MICR print specification conformance. Widespread distribution of this report is encouraged in order to include the following industry groups:

MICR printing equipment manufacturers and vendors – Software and Hardware

- Vendors of impact and non-impact MICR printing components and systems

- Developers of MICR application software

- Check printing equipment manufacturers

Financial Institutions

- Incoming QC inspection of MICR documents by banks

- Evaluation of reader/sorter rejects

- QC of proof encoding equipment

- Evaluating sources of checks for bank customers

- Production groups for the Image Replacement Documents (IRDs)

Check issuers

- Users of high and moderate speed MICR printing equipment

- Users of table top MICR laser printers

Check printing companies

- Check design groups

- Check production groups

MICR reading and sorting equipment vendors – Software and Hardware

- Reader/sorter equipment manufacturers

- MICR quality testing tools and service companies
