Foreword

Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretation should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of approval.

ANSI X9.100-151-2010

Introduction

NOTE The user's attention is called to the possibility that compliance with this standard may require use of an invention covered by patent rights.

By publication of this standard, no position is taken with respect to the validity of this claim or of any patent rights in connection therewith. The patent holder has, however, filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license. Details may be obtained from the standards developer.

Suggestions for the improvement or revision of this Standard are welcome. They should be sent to the X9 Committee Secretariat, Accredited Standards Committee X9, Inc., Financial Industry Standards, 1212 West Street, Suite 200, Annapolis, MD 21401 USA.

This Standard was processed and approved for submittal to ANSI by the Accredited Standards Committee on Financial Services, X9. Committee approval of the Standard does not necessarily imply that all the committee members voted for its approval.

At the time this standard was approved, the X9 committee had the following members:

Roy CeCicco, X9 Chairman
Vincent DeSantis, X9 Vice-Chairman
Cynthia L. Fuller, Executive Director
Janet Busch, Program Manager

Under ASC X9, Inc. procedures, a working group may be established to address specific segments of work under the ASC X9 Committee or one of its subcommittees. A working group exists only to develop standard(s) or guideline(s) in a specific area and is then disbanded. The individual experts are listed with their affiliated organizations. However, this does not imply that the organization has approved the content of the standard or guideline. (Note: Per X9 policy, company names of non-member participants are listed only if, at the time of publication, the X9 Secretariat received an original signed release permitting such company names to appear in print.)

Check Correction Strips

1 Scope

This standard covers the design and the functional characteristics of the strip extension ("strip") as affixed to a check. These strips provide a new MICR clear band area used to modify or correct the MICR line of items for forward collection, returns, rejects, or other banking interchange systems.

2 Normative References

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the most recent edition of the referenced document (including any amendments) applies.

ANSI X9.7 (X9.100-110), *Bank Check Background and Convenience Amount Field Specification*

ANSI X9.100-10, *Paper Specifications for MICR Documents*

ANSI X9.100-20, *Print and Test Specifications for Magnetic Ink Printing (MICR)*

ANSI X9.100-150, *Check Carrier Envelopes*

ANSI X9.100-160-1, *Magnetic Ink Printing (MICR), Part 1: Placement and Location*

ANSI X9.100-160-2, *Magnetic Ink Printing (MICR), Part 2: EPC Field Use*

3 Terms and Definitions

The defining standard is listed in parentheses after each term. The first listing is the current defining standard and the second listing, if present, is the past or future defining standard. If a definition starts with the words, "As used in this standard,...", it indicates the definition is altered to meet the needs of this standard and differs from the definition in the referenced defining standard.

3.1 aligning edge (ANSI X9.100-160-1)

The bottom edge of a document when its face is viewed.

3.2 clear band (MICR) (ANSI X9.100-20)

A horizontal band, 0.625 inch high, on the front side and back side of the document, measured from the aligning edge, that must be free of any magnetic ink other than that of the E-13B font.

3.3 correction label (ANSI X9.100-151)

A small label with an adhesive backing that is placed over MICR information to give a new MICR encoding surface.
