

# CONTENTS

Notice .....	v
Foreword .....	vi
Committee Roster .....	vii
Correspondence With the PTC 22 Committee .....	ix
Introduction .....	x
<b>Section 1 Object and Scope .....</b>	<b>1</b>
1-1 Object .....	1
1-2 Scope .....	1
1-3 Test Uncertainty .....	1
1-4 Other Requirements and References .....	2
<b>Section 2 Definitions and Description of Terms .....</b>	<b>3</b>
2-1 Definitions .....	3
2-2 Symbols .....	4
2-3 Subscripts .....	5
<b>Section 3 Guiding Principles .....</b>	<b>6</b>
3-1 Agreements .....	6
3-2 Preparations to Test .....	8
3-3 Conduct of Test .....	9
3-4 Test Records .....	11
3-5 Test Validity .....	11
3-6 Uncertainty .....	11
<b>Section 4 Instruments and Methods of Measurements .....</b>	<b>13</b>
4-1 General Requirements .....	13
4-2 Pressure Measurement .....	15
4-3 Temperature Measurement .....	19
4-4 Gas Fuel Heat Input .....	19
4-5 Liquid Fuel Heat Input .....	23
4-6 Electrical Generation Measurement .....	25
4-7 Mechanical Power Measurement .....	29
4-8 Speed Measurement .....	29
4-9 Humidity Measurement .....	29
4-10 Heat Losses .....	30
4-11 Other Measurements .....	30
<b>Section 5 Computation of Results .....</b>	<b>32</b>
5-1 Electrical Power Calculations .....	32
5-2 Mechanical Power Output Calculation .....	34
5-3 Heat Rate Calculations .....	34
5-4 Correction of Test Results—Fundamental Performance Equations .....	37
5-5 Application of Correction Factors .....	38
5-6 Degradation .....	40
<b>Section 6 Test Report Requirements .....</b>	<b>41</b>
6-1 General Requirements .....	41
6-2 Summary .....	41
6-3 Test Description .....	41
6-4 Test Equipment .....	41

6-5	Calculations and Results .....	41
6-6	Appendices .....	41
<b>Section 7</b>	<b>Test Uncertainty .....</b>	<b>42</b>
7-1	Introduction .....	42
7-2	Understanding Test Uncertainty .....	42
7-3	Unit Output and Thermal Efficiency .....	44
7-4	Comparative Testing Uncertainty .....	52
7-5	Uncertainty of Flow Calculation From Heat Balance .....	54
<b>Figures</b>		
3-1	Generic Test Boundaries .....	7
4-2.1	Five-Way Manifold for Differential Pressure (DP) Instruments .....	17
4-2.2	Differential Pressure (DP) Correction for Flow in Non-Horizontal Lines .....	18
4-4.1	Generic Gas Fuel Test Boundary .....	20
4-5.1	Generic Liquid Fuel Test Boundary .....	23
4-6A	Two-Meter Metering System for Use on Three-Wire Delta Connected Power Systems .....	25
4-6B	Two-Meter Metering System for Use on Three-Wire Wye Connected Power Systems .....	26
4-6C	Three-Meter Metering System for Use on Four-Wire Power Systems .....	26
7-2.1	Illustrating Systematic, $B_i$ and Random Errors, $2S_i$ .....	42
7-2.1.2B	Test Uncertainty Illustration .....	44
<b>Tables</b>		
3-1.5.2	Required Measurements .....	8
3-3.5	Maximum Permissible Standard Deviations of Measurements in Operating Conditions .....	10
4-1	Maximum Allowable Measurement Uncertainties .....	13
4-4.5	Gas Properties of Selected Ideal Gases at 60.0°F and 14.696 psia .....	22
5-3.1	Typical Values for Unit Conversion Factor $N_1$ , Using Common Units of Measure .....	35
5-3.2	Typical Values for Unit Conversion Factor $N_2$ , Using Common Units of Measure .....	36
5-4.1	Summary of Additive Correction Factors for Power Fundamental Performance Equation .....	38
5-4.2	Summary of Correction Factors in All Fundamental Performance Equations .....	38
7-3.1A	Step 1: Pretest Uncertainty Calculation, Code Limit .....	45
7-3.1B	Step 2: Pretest Planned Uncertainty Values .....	46
7-3.1C	Step 3: Post-Test Uncertainty Calculation .....	47
7-3.3.2.2	Orifice Factors Uncertainty .....	49
7-3.3.2.3	Heat Input Uncertainty .....	50
7-4.4.1	Comparative Test Uncertainty Example .....	53
<b>Nonmandatory Appendices</b>		
A	Determination of Gas Turbine Exhaust Energy, Flow, and Temperature .....	56
B	Comparative Testing .....	76
C	Sample Calculations .....	79
D	References .....	86
E	Unit Conversion Factors .....	87
