Cableways

Safety Standard for Cableways, Cranes, Derricks, Hoists, Hooks, Jacks, and Slings
ASME B30.19-2016
(Revision of ASME B30.19-2011)

Cableways

Safety Standard for Cableways, Cranes, Derricks, Hoists, Hooks, Jacks, and Slings

AN AMERICAN NATIONAL STANDARD

The American Society of Mechanical Engineers
Two Park Avenue • New York, NY • 10016 USA
The next edition of this Standard is scheduled for publication in 2021. This Standard will become effective 1 year after the Date of Issuance.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Interpretations are published on the Committee Web page and under go.asme.org/InterpsDatabase.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at http://cstools.asme.org/. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting “Errata” in the “Publication Information” section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.
CONTENTS

Foreword ................................................................. iv
Committee Roster ........................................................ vi
B30 Standard Introduction ........................................... viii
Summary of Changes .................................................... xi

Chapter 19-0 Scope, Definitions, Personnel Competence, and References .......... 1
  Section 19-0.1 Scope of B30.19 ..................................... 1
  Section 19-0.2 Definitions .......................................... 1
  Section 19-0.3 Personnel Competence ............................ 2
  Section 19-0.4 References .......................................... 3

Chapter 19-1 Construction and Characteristics ........................................... 10
  Section 19-1.1 Load Ratings ........................................ 10
  Section 19-1.2 Design and Manufacture ........................... 10
  Section 19-1.3 Construction and Erection .......................... 10

Chapter 19-2 Inspection, Testing, and Maintenance ....................................... 16
  Section 19-2.1 Inspection ........................................... 16
  Section 19-2.2 Testing .............................................. 17
  Section 19-2.3 Maintenance ......................................... 17
  Section 19-2.4 Rope Inspection, Replacement, and Maintenance ................... 18

Chapter 19-3 Operation ........................................................................ 20
  Section 19-3.1 Operator Qualifications and Operating Practice ....................... 20
  Section 19-3.2 Operating Practices ..................................... 21
  Section 19-3.3 Signals .................................................. 22
  Section 19-3.4 Miscellaneous .......................................... 22

Figures
  19-0.2.1-1 Fixed Cableway ........................................... 4
  19-0.2.1-2 Luffing Cableway ........................................ 5
  19-0.2.1-3 Parallel Cableway ........................................ 6
  19-0.2.1-4 Radial Cableway .......................................... 7
  19-0.2.2-1 Two-Drum Cableway Hoist ................................ 8
  19-0.2.2-2 Trolley Hoist Unit ....................................... 8
  19-0.2.2-3 Multisheave Endless Rope Trolley Hoist Unit ......................... 8
  19-0.2.2-4 Luffing Hoist Unit ....................................... 9
  19-1.3.12-1 Standard Hand Signals for Controlling Cableway Operations ........ 14
  19-3.4.4-1 Danger Zone for Cableways and Lifted Loads Operating Near Electrical Transmission Lines ............................. 23
