PTB-3-2013

Date of Issuance: June 18, 2013

This document was prepared as an account of work sponsored by ASME Pressure Technology Codes and Standards (PTCS) through the ASME Standards Technology, LLC (ASME ST-LLC).

Neither ASME, the authors, nor others involved in the preparation or review of this document, nor any of their respective employees, members or persons acting on their behalf, make any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness or usefulness of any information, apparatus, product or process disclosed, or represents that its use would not infringe upon privately owned rights.

Reference herein to any specific commercial product, process or service by trade name, trademark, manufacturer or otherwise does not necessarily constitute or imply its endorsement, recommendation or favoring by ASME or others involved in the preparation or review of this document, or any agency thereof. The views and opinions of the authors, contributors and reviewers of the document expressed herein do not necessarily reflect those of ASME or others involved in the preparation or review of this document, or any agency thereof.

ASME does not "approve," "rate", or "endorse" any item, construction, proprietary device or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME is the registered trademark of The American Society of Mechanical Engineers.

TABLE OF CONTENTS

Foreword.....	vi
Acknowledgements	viii
PART 1	1
1.1 Introduction	1
1.2 Scope	1
1.3 Organization and Use	1
1.4 References.....	1
PART 2	2
2.1 General	2
2.2 Example Problem Format	2
2.3 Calculation Precision	2
PART 3	3
3.1 Example E3.1 – Use of MDMT Exemptions Curves	3
3.2 Example E3.2 – Use of MDMT Exemption Curves with Stress Reduction.....	4
3.3 Example E3.3 – Develop MDMT Using Fracture Mechanics (API 579-1/ASME FFS-1).....	6
PART 4	19
4.1 General Requirements.....	19
4.1.1 Example E4.1.1 – Review of General Requirements for a Vessel Design	19
4.1.2 Example E4.1.2 – Required Wall Thickness of a Hemispherical Head	20
4.1.3 Example E4.1.3 – Required Wall Thickness of a Hemispherical Head - Higher Strength Material.....	21
4.2 Welded Joints.....	22
4.2.1 Example E4.2.1 – Nondestructive Examination Requirement for Vessel Design	22
4.2.2 Example E4.2.2 – Nozzle Detail and Weld Sizing	25
4.2.3 Example E4.2.3 – Nozzle Detail with Reinforcement Pad and Weld Sizing.....	26
4.3 Internal Design Pressure	28
4.3.1 Example E4.3.1 – Cylindrical Shell.....	28
4.3.2 Example E4.3.2 – Conical Shell	29
4.3.3 Example E4.3.3 – Spherical Shells.....	30
4.3.4 Example E4.3.4 – Torispherical Head	31
4.3.5 Example E4.3.5 – Elliptical Head.....	34
4.3.6 Example E4.3.6 – Combined Loadings and Allowable Stresses.....	37
4.3.7 Example E4.3.7 – Conical Transitions Without a Knuckle.....	43
4.3.8 Example E4.3.8 – Conical Transitions with a Knuckle	64
4.4 Shells Under External Pressure and Allowable Compressive Stresses	69
4.4.1 Example E4.4.1 – Cylindrical Shell.....	69
4.4.2 Example E4.4.2 – Conical Shell	71
4.4.3 Example E4.4.3 – Spherical Shell and Hemispherical Head.....	74
4.4.4 Example E4.4.4 – Torispherical Head	75
4.4.5 Example E4.4.5 – Elliptical Head.....	77
4.4.6 Example E4.4.6 – Combined Loadings and Allowable Compressive Stresses	79
4.4.7 Example E4.4.7 – Conical Transitions without a Knuckle	95
4.4.8 Example E4.4.8 – Conical Transitions with a Knuckle	116

PTB-3-2013

4.5	Shells Openings in Shells and Heads	122
4.5.1	Example E4.5.1 – Radial Nozzle in Cylindrical Shell and Weld Strength Analysis.....	122
4.5.2	Example E4.5.2 – Hillside Nozzle in Cylindrical Shell and Weld Strength Analysis	128
4.5.3	Example E4.5.3 – Radial Nozzle in Elliptical Head and Weld Strength Analysis	134
4.6	Flat Heads	140
4.6.1	Example E4.6.1 – Flat Un-stayed Circular Heads.....	140
4.6.2	Example E4.6.2 – Flat Un-stayed Non-Circular Heads Attached by Welding	142
4.7	Spherically Dished Bolted Covers	143
4.7.1	Example E4.7.1 – Thickness Calculation for a Type D Head.....	143
4.7.2	Example E4.7.2 – Thickness Calculation for a Type D Head Using the Alternative Rule in Paragraph 4.7.5.3	153
4.8	Quick-Actuating (Quick Opening) Closures	163
4.8.1	Example E4.8.1 – Review of Requirements for Quick-Actuating Closures.....	163
4.9	Braced and Stayed Surfaces.....	165
4.9.1	Example E4.9.1 – Braced and Stayed Surfaces	165
4.10	Ligaments	168
4.10.1	Example E4.10.1 – Ligaments	168
4.11	Jacketed Vessels.....	170
4.11.1	Example E4.11.1 – Jacketed Vessel.....	170
4.11.2	Example E4.11.2 – Half-Pipe Jacket.....	173
4.12	NonCircular Vessels	176
4.12.1	Example E4.12.1 – Type 1	176
4.12.2	Example E4.12.2 – Type 4	181
4.13	Layered Vessels	190
4.13.1	Example E4.13.1 – Layered Cylindrical Shell	190
4.13.2	Example E4.13.2 – Layered Hemispherical Head	190
4.13.3	Example E4.13.3 – Maximum Permissible Gap in a Layered Cylindrical Shell	191
4.14	Evaluation of Vessels Outside of Tolerance.....	192
4.14.1	Example E4.14.1 – Shell Tolerances	192
4.14.2	Example E4.14.2 – Shell Tolerances and Fatigue Evaluation	194
4.14.3	Example E4.14.3 – Local Thin Area.....	200
4.15	Supports and Attachments	203
4.15.1	Example E4.15.1 – Horizontal Vessel, Zick’s Analysis	203
4.15.2	Example E4.15.2 – Vertical Vessel, Skirt Design.....	211
4.16	Flanged Joints	219
4.16.1	Example E4.16.1 – Integral Type	219
4.16.2	Example E4.16.2 – Loose Type	229
4.17	Clamped Connections	238
4.17.1	Example E4.17.1 – Flange and Clamp Design Procedure	238
4.18	Tubesheets in Shell and Tube Heat Exchangers	249
4.18.1	Example E4.18.1 – U-Tube Tubesheet Integral with Shell and Channel	249
4.18.2	Example E4.18.2 – U-Tube Tubesheet Gasketed With Shell and Channel	253
4.18.3	Example E4.18.3 – U-Tube Tubesheet Gasketed With Shell and Channel	256
4.18.4	Example E4.18.4 – U-Tube Tubesheet Gasketed With Shell and Integral with Channel, Extended as a Flange	259
4.18.5	Example E4.18.5 – Fixed Tubesheet Exchanger, Configuration b, Tubesheet Integral with Shell, Extended as a Flange and Gasketed on the Channel Side	263

PTB-3-2013

4.18.6	Example E4.18.6 – Fixed Tubesheet Exchanger, Configuration b, Tubesheet Integral with Shell, Extended as a Flange and Gasketed on the Channel Side	275
4.18.7	Example E4.18.7 – Fixed Tubesheet Exchanger, Configuration a	288
4.18.8	Example E4.18.8 – Stationary Tubesheet Gasketed With Shell and Channel; Floating Tubesheet Gasketed, Not Extended as a Flange	300
4.18.9	Example E4.18.9 – Stationary Tubesheet Gasketed With Shell and Channel; Floating Tubesheet Integral	308
4.18.10	Example E4.18.10 – Stationary Tubesheet Gasketed With Shell and Channel; Floating Tubesheet Internally Sealed.....	317
4.19	Bellows Expansion Joints	324
4.19.1	Example E4.19.1 – U-Shaped Un-reinforced Bellows Expansion Joint and Fatigue Evaluation.....	324
4.19.2	Example E4.19.2 – Toroidal Bellows Expansion Joint and Fatigue Evaluation	332
PART 5	338
5.1	General Requirements.....	338
5.2	Protection Against Plastic Collapse	338
5.2.1	Example E5.2.1 – Elastic Stress Analysis	338
5.2.2	Example E5.2.2 – Limit Load Analysis	349
5.2.3	Example E5.2.3 – Elastic-Plastic Analysis.....	352
5.3	Protection Against Local Failure	356
5.3.1	Overview	356
5.3.2	Example E5.3.2 – Elastic Analysis	356
5.3.3	Example E5.3.3 – Elastic-Plastic Analysis.....	357
5.4	Example E5.4 – Protection Against Collapse from Buckling	361
5.5	Protection Against Failure from Cyclic Loading	367
5.5.1	Overview	367
5.5.2	Example E5.5.2 – Fatigue Screening	367
5.5.3	Example E5.5.3 – Elastic Stress Analysis, and Equivalent Stresses	369
5.5.4	Example E5.5.4 – Elastic-Plastic Stress Analysis, and Equivalent Strains	376
5.5.5	Example E5.5.5 – Elastic Stress Analysis, and Structural Stress	384
5.5.6	Example E5.5.6 – Protection Against Ratcheting Using Elastic Stress Analysis	391
5.5.7	Example E5.5.7 – Protection Against Ratcheting Using Elastic-Plastic Stress Analysis	396
PART 6	399
6.1	Example E6.1 – Postweld Heat Treatment of a Pressure Vessel	399
6.2	Example E6.2 – Out-of-Roundness of a Cylindrical Forged Vessel	403
PART 7	405
7.1	Example E7.1 – NDE Requirements: Vessel with One Examination Group Designation ..	406
7.2	Example E7.2 – NDE Requirements: Vessel with Two Examination Group Designations	410
PART 8	419
8.1	Example E8.1 – Determination of a Hydrostatic Test Pressure	419
8.2	Example E8.2 – Determination of a Pneumatic Test Pressure	422
