

ASME PTC 31-2011

[Revision of ASME PTC 31-1973 (R1991)]

High-Purity Water Treatment Systems

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME PTC 31-2011
[Revision of ASME PTC 31-1973 (R1991)]

High-Purity Water Treatment Systems

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Three Park Avenue • New York, NY • 10016 USA

Date of Issuance: April 9, 2012

This Code will be revised when the Society approves the issuance of a new edition. There will be no addenda issued to PTC 31-2011.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Periodically certain actions of the ASME PTC Committee may be published as Code Cases. Code Cases and interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org/> as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at <http://cstools.asme.org/>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Notice	v
Foreword	vi
Committee Roster	vii
Correspondence With the PTC Committee	viii
Section 1 Object and Scope	1
1-1 Object	1
1-2 Scope	1
1-3 Test Uncertainties	2
Section 2 Description and Definition of Terms— Ion Exchange	3
2-1 Definitions	3
2-2 References	10
Section 3 Guiding Principles	12
3-1 Advance Planning for Test	12
3-2 General Description of Test Requirements	12
3-3 Preliminary Tests	12
3-4 Frequency of Observations.....	13
3-5 Duration of Test Runs	13
3-6 General Description of Test Procedures	13
3-7 Membranes Testing	15
3-8 Reverse Osmosis (RO) Operating Performance.....	19
3-9 Membrane Plant Performance Normalization	21
Section 4 Instruments and Methods of Measurement	24
4-1 Instruments and Methods of Measurement	24
4-2 Mechanical Measurements.....	24
4-3 Flowmeter Absence.....	24
4-4 Temperature Measurement	24
4-5 Loss of Pressure Measurement	24
4-6 Pressure Loss Across a Single Unit/Array or Train of Multiple Units/ Arrays Measurement	25
4-7 Pressure Loss Indication Across a Resin Bed Measurement	25
4-8 Chemical Measurements	25
4-9 Sampling of Water From Influent and Effluent of Water Treatment Equipment	25
4-10 Field Sampling of Media	26
4-11 Field Measurement of Resin Volume.....	26
4-12 Analysis of Ion Exchange Materials.....	26
4-13 Sampling for Suspended Solids.....	26
4-14 Ion Exchange Operating Capacity	27
Section 5 Interpretation of Results	29
5-1 Introduction.....	29
5-2 Performance Benchmark	32
5-3 Calculations and Analytical Procedures	32
5-4 Expression of Specified Performance and Results of Tests.....	32
Section 6 Report of Tests	33
6-1 Report of Tests	33

Tables

3-6.1.4-1	Resin Volume Change Chemical Form-to-Form	14
3-6.3-1	Ion Exchange System Performance Testing	16
3-6.4-1	Chemical Measurements During Ion Exchange System Performance Testing.....	17
3-8.2-1	K-Factor for Reverse Osmosis Calculations.....	20
3-8.2-2	SDI Indices.....	20
4-13-1	Purge Times Required for Representative Sampling	27
5-1.1.1-1	Typical Operating Flow Rates Specifications	30
5-1.1.1-2	Typical System Flux Rates	30

Mandatory Appendices

I	Regenerant Purity Requirements for Ion Exchange Materials.....	35
II	Suspended Iron Oxide Solids: Membrane Comparison Charts.....	38

Nonmandatory Appendices

A	Sample Calculations	40
B	Causes of Operating Capacity Reduction	46
C	Selectivity of Resins.....	47
