

ASME PTC 47.4-2015

Power Block of an Integrated Gasification Combined Cycle Power Plant

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME PTC 47.4-2015

Power Block of an Integrated Gasification Combined Cycle Power Plant

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: December 7, 2015

The next edition of this Code is scheduled for publication in 2020.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Interpretations are published on the Committee Web page and under go.asme.org/InterpsDatabase. Periodically certain actions of the ASME PTC Committee may be published as Cases. Cases are published on the ASME Web site under the PTC Committee Page at go.asme.org/PTCcommittee as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The PTC Committee Page can be found at go.asme.org/PTCcommittee. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Notice	v
Foreword	vi
Committee Roster	vii
Correspondence With the PTC Committee	viii
Introduction	ix
Section 1 Object and Scope	1
1-1 Object	1
1-2 Scope	1
1-3 Uncertainty	1
1-4 References	2
Section 2 Definitions and Descriptions of Terms	3
2-1 General	3
2-2 Definitions	3
Section 3 Guiding Principles	6
3-1 Introduction	6
3-2 Test Boundary and Required Measurements	6
3-3 Test Plan and Object of the Test	8
3-4 Test Preparations	8
3-5 Conduct of Test	10
3-6 Calculation and Reporting of Results	12
Section 4 Instruments and Methods of Measurement	14
4-1 General	14
4-2 Pressure Measurement	18
4-3 Temperature Measurement	22
4-4 Humidity Measurement	29
4-5 Flow Measurement	31
4-6 Primary Heat Input Measurement	33
4-7 Electrical Generation Measurement	34
4-8 Data Collection and Handling	39
Section 5 Calculations and Results	42
5-1 Introduction	42
5-2 Data Reduction	42
5-3 Fundamental Equations	42
5-4 Correction Factors	43
5-5 Measured Parameters in the Fundamental Equations	45
Section 6 Report of Results	47
6-1 General Requirements	47
6-2 Executive Summary	47
6-3 Introduction	47
6-4 Calculations and Results	47
6-5 Instrumentation	48
6-6 Conclusions	48
6-7 Appendices	48
Section 7 Uncertainty Analysis	49
7-1 Introduction	49
7-2 Objective of Uncertainty Analysis	49
7-3 Determination of Overall Uncertainty	49

7-4	Sources of Error	49
7-5	Calculation of Uncertainty	50
7-6	Sensitivity Coefficients	50
7-7	Systematic Uncertainty	53
7-8	Random Standard Uncertainty for Spatially Uniform Parameters	53
7-9	Random Standard Uncertainty for Spatially Nonuniform Parameters	54
7-10	Correlated Systematic Standard Uncertainty	54
