AN ASME NATIONAL STANDARD

ENGINEERING DRAWING AND RELATED DOCUMENTATION PRACTICES

Dimensioning and Tolerancing

ASME Y14.5M-1994

[REVISION OF ANSI Y14.5M-1982 (R1988)]

The American Society of
Mechanical Engineers

345 East 47 th Street, New York, N.Y.

CONTENTS

Foreword iii
Standards Committee Roster vii

1 Scope, Definitions, and General Dimensioning 1
1.1 General 1
1.2 References 1
1.3 Definitions 2
1.4 Fundamental Rules 4
1.5 Units of Measurement 4
1.6 Types of Dimensioning 5
1.7 Application of Dimensions 6
1.8 Dimensioning Features 10
1.9 Location of Features 18

2 General Tolerancing and Related Principles 23
2.1 General 23
2.2 Direct Tolerancing Methods 24
2.3 Tolerance Expression 24
2.4 Interpretation of Limits 25
2.5 Single Limits 25
2.6 Tolerance Accumulation 25
2.7 Limits of Size 26
2.8 Applicability of RFS, MMC, and LMC 28
2.9 Screw Threads 29
2.10 Gears and Splines 29
2.11 Virtual/Resultant Condition 29
2.12 Angular Surfaces 29
2.13 Conical Tapers 29
2.14 Flat Tapers 37
2.15 Radius 38
2.16 Statistical Tolerancing 38

3 Symbology 41
3.1 General 41
3.2 Use of Notes to Supplement Symbols 41
3.3 Symbol Construction 41
3.4 Geometric Tolerance Symbols 47
3.5 Feature Control Frame Placement 48
3.6 Definition of the Tolerance Zone 48
3.7 Tabulated Tolerances 50

This is a preview of "Y14.5M-1994". Click here to purchase the full version from the ANSI store.

4 Datum Referencing 51
4.1 General 51
4.2 Immobilization of Part 51
4.3 Datum Features 52
4.4 Specifying Datum Features in an Order of Precedence 52
4.5 Establishing Datums 55
4.6 Datum Targets 70

5 Tolerances of Location 81
5.1 General 81
5.2 Positional Tolerancing 81
5.3 Fundamental Explanation of Positional Tolerancing 81
5.4 Feature Pattern Location 93
5.5 Projected Tolerance Zone 115
5.6 Nonparallel Holes 135
5.7 Counterbored Holes 135
5.8 Closer Control at One End of a Feature 135
5.9 Bidirectional Positional Tolerancing of Features 135
5.10 Noncircular Features 139
5.11 Coaxiality Controls 142
5.12 Concentricity 144
5.13 Positional Tolerancing for Symmetrical Relationships 149
5.14 Symmetry Tolerancing to Control the Median Points of Opposed or Correspondingly-Located Elements of Features 149
5.15 Spherical Features 149

6 Tolerances of Form, Profile, Orientation, and Runout 157
6.1 General 157
6.2 Form and Orientation Control 157
6.3 Specifying Form and Orientation Tolerances 157
6.4 Form Tolerances 157
6.5 Profile Control 163
6.6 Orientation Tolerances 174
6.7 Runout 189
6.8 Free State Variation 191

Appendices

A Principal Changes and Improvements 197
A1 General 197
A2 Figures 197
A3 Section 1, Scope, Definitions, and General Dimensioning 197
A4 Section 2, General Tolerancing and Related Principles 198
A5 Section 3, Symbology 199
A6 Section 4, Datum Referencing 199
A7 Section 5, Tolerances of Location 200
A8 Section 6, Tolerances of Form, Profile, Orientation, and Runout 202
A9 Appendix A, Principal Changes and Improvements 202
A10 Appendix B, Formulas for Positional Tolerancing 203
A11 Appendix C, Form, Proportion, and Comparison of Symbols 203
A12 Appendix D, Former Practices 203

This is a preview of "Y14.5M-1994". Click here to purchase the full version from the ANSI store.

A13 Appendix E, Decision Diagrams for Geometric Control 203

B Formulas for Positional Tolerancing 205
B1 General 205
B2 Formula Symbols 205
B3 Floating Fastener Case 205
B4 Fixed Fastener Case When Projected Tolerance Zone Is Used 205
B5 provision for Out-of-Squareness When Projected Tolerance Zone is Not Used 206
B6 Coaxial Features 207
B7 Limits and Fits 207

C Form, Proportion, and Comparison of Symbols 209
C1 General 209
C2 Form and Proportion 209
C3 Comparison 209

D Former Practices 215
D1 General 215
D2 Definition for Feature of Size 215
D3 Applicability of RFS, MMC, and LMC 215
D4 Tangent Radii 215
D5 Datum Feature Symbol 215
D6 Projected Tolerance Zone 215

E Decision Diagrams for Geometric Control 219
E1 Purpose 219
E2 Functional Requirements 219
E3 Reference to Standard 219
E4 Geometric Controls 219
E5 Choosing Other Controls 219
E6 Use of Modifiers 219
E7 Datums 219

Index 229
