Contents

Section	Page No.
1 Primary Concepts of Weldability	1
2 Accepting Metal Fabrication Projects	5
3 Production Welding Cost Analysis	9
4 Modular Construction	17
5 Welding Process Selection	23
6 Primary Concepts of Welding Design	33
7 Fatigue Considerations	45
8 Welding Safety Considerations	51
9 Weld Joint Design Considerations	57
10 Weld Distortion and Control	63
11 Checklist for Sound Welding Decisions	71
12 Defects and Discontinuities of Welding	75
13 Nondestructive Examination	93
14 Information for the Welder	103
15 Fitting Aids	109
16 Welding Metallurgy: Practical Aspects	119
17 Arc Stud Welding	129
18 Thermal Spray Fundamentals	133

SECTION 1

Primary Concepts of Weldability

Contents

Weldability	2
Personnel Concerns about Fabrication Projects.....	2
Fundamentals of Welding Decisions	3
Coordination of Expertise.....	4
Education.....	4
The Welder, Technician, and Production Supervisor	4
The 100% Quality Weld and Weld-Associated Failures	4
Weldability Can Be Determined by the Manufacturer	4
Bibliography/Recommended Reading List	4

SECTION **2**

Accepting Metal Fabrication Projects

Contents

Background	6
Defining Special Projects	6
Establish a Prebid Review Group (Before Accepting Special Projects)	6
Establish a Detail Planning Group (Prior to Issuing Job Orders).....	7
Summary	7

SECTION **3**

Production Welding Cost Analysis

Contents

Introduction	10
Review of Cost Estimating	10
Welding Cost Variables	11
Rework	11
Fire Protection	11
How to Control Costs	11
Joint Designs	12
Automation/Mechanization of New or Existing Thermal Joining Processes	12
Records: Accountability for Accomplishment of Work and Inspections	13
Cost Considerations of Nondestructive Examination (NDE)	13
Summary	14
Bibliography/Recommended Reading List	14

SECTION **4**

Modular Construction

Contents

Introduction	18
Productivity Value	18
Dimensional Accuracy (Process Control)	19
Preoutfitting—A Major Advantage	20
Designing for Zone and Preoutfitting Construction	21
Summary	21

SECTION 5

Welding Process Selection

Contents

Common Welding Processes	24
Process Selection	24
SMAW	26
GMAW	27
FCAW	28
SAW	29
GTAW	30
Bibliography/Recommended Reading List	32

SECTION 6

Primary Concepts of Welding Design

Contents

Introduction	34
What the Designer Should Know about Welding	34
Service Requirements	34
Base Metal Selection	35
Welds Create a Discontinuity in the Base Material	35
Weld vs. Base Metal Properties	35
Welds Rarely Improve upon Base Metal Properties	35
Keep Weldment Designs Simple	35
Standardize Component Welding Design	35
Minimize the Number of Welds	35
Location of Welds	36
Weld Deposit Mechanical Properties	36
Joint Designs—Amount and Type of Weld	36
Partial Penetration Welds	36
Full Penetration Welds	38
Fillet Welds	39
Design Considerations for Change of Cross Sections	39
Residual Stress—Fact or Fiction?	40
Summary for Improved Fabrication Design	40
Bibliography/Recommended Reading List	43

SECTION 7

Fatigue Considerations

Contents

Introduction	46
Loading.....	46
Stress Concentrations.....	46
Crack Initiation Sites	46
Inspection	48
Code Allowables and Actual In-Service Fatigue Life.....	48
Repair of Fatigue Cracks	48
Surface Finishing to Improve Fatigue Life	48
Peening.....	48
Surface Shape and its Effect on Fatigue	48
Grinding	49
Base Metal and Weld Metal Changes in Cross Section.....	49
Thermal Fatigue	49
Checklist for Fatigue Considerations.....	50
Bibliography/Recommended Reading List	50

SECTION 8

Welding Safety Considerations

Contents

Introduction	52
Design.....	52
Production	53
Respiratory Protection and Ventilation.....	53
Use of Inert Gases	54
Planning for Safety	54
Bibliography/Recommended Reading List	55

SECTION 9

Weld Joint Design Considerations

Contents

Introduction	58
Design.....	58
Weld Joint Design Considerations	58
Accessibility	59
Environmental Conditions	60
Temperature Control.....	60
Base/Filler Material.....	60
Pipe Welding Considerations.....	60
Summary	61
Bibliography/Recommended Reading List	61

SECTION 10

Weld Distortion and Control

Contents

Introduction	64
Mechanisms of Weld Distortion	64
Theoretical Shortening under Ideal Conditions	65
Metal Properties Affecting Distortion	65
Considerations for Minimization of Weld Distortion	66
Bibliography/Recommended Reading List	69

SECTION 11

Checklist for Sound Welding Decisions

Contents

The Intended Service Requirements	72
Base and Weld Metal Properties	72
Fabrication Conditions Imposed	73

SECTION 12

Defects and Discontinuities of Welding

Contents

Introduction	76
Weld Acceptance Standards	76
The Cause of Welding Defects	76
Weld Discontinuities	77
Cracking	77
Delayed Cracking—Hydrogen Embrittlement	83
Techniques for Allowing Hydrogen to Escape from Welds.....	84
Minimizing the Available Amount of Hydrogen to the Weld Deposit.....	84
Welding Processes and their Available Hydrogen	84
Summary of Rules to Minimize Hydrogen Embrittlement Cracking	85
Slag Inclusions	85
Lack of Fusion or Incomplete Fusion	85
Lack of Penetration	86
Porosity	87
Undercut (Including Root Undercut)	88
Tungsten Inclusions	88
Arc Strikes	89
Spatter	90
Crater Pit.....	90
Burn-Through	91
Incomplete Insert Melting	91
Root Centerline Crease	91
Melt-Through.....	91
Oxidation	91
Root Concavity.....	91
Root Convexity.....	92
Bibliography/Recommended Reading List	92

SECTION **13**

Nondestructive Examination

Contents

Introduction	94
When Should NDE Be Performed?	94
Nondestructive Examination Methods	94
Bibliography/Recommended Reading List	102

SECTION 14

Information for the Welder

Contents

Introduction	104
Material	104
Filler Material	104
Welding Process	104
Quality Control and Quality Assurance	105
Weld Size and Penetration	105
Distortion Control.....	105
Standards and Specifications.....	105
Welding Department Required Information Facilitated by the Design Engineer/Technical Support	105
Bibliography/Recommended Reading List	107

SECTION **15**

Fitting Aids

Contents

Background	110
Current Problems in Fabrication	110
Fitting Aid Categories	111
Bibliography/Recommended Reading List	117

SECTION 16

Welding Metallurgy: Practical Aspects

Contents

Introduction	120
Primary Base Metal Groups	120
Bibliography/Recommended Reading List	127

SECTION 17

Arc Stud Welding

Contents

Introduction	130
How a Stud is Welded.....	130
Elements of a Stud Weld	130
Testing and Judging Welds	131
Operating Instructions	131
Setting Up to Weld	132
How to Handle the Stud Welding Gun	132

SECTION **18**

Thermal Spray Fundamentals

Contents

Why Use the Thermal Spray Process?	134
Corrosion Control Applications	134
Machinery Component Applications	134
Fundamentals	134
Thermal Spray Processes	134
Finishing Thermal Sprayed Coatings	135
Quality Assurance	137
Future Applications	137
Advantages	137
Limitations	137
Bibliography/Recommended Reading List	137
