

AWS G1.6:2006
An American National Standard

Specification for the Qualification of Plastics Welding Inspectors for Hot Gas, Hot Gas Extrusion, and Heated Tool Butt Thermoplastic Welds

American Welding Society

AWS G1.6:2006
An American National Standard

Approved by the
American National Standards Institute
July 6, 2006

**Specification for the Qualification of
Plastics Welding Inspectors for Hot
Gas, Hot Gas Extrusion, and Heated
Tool Butt Thermoplastic Welds**

1st Edition

Prepared by the
American Welding Society (AWS) G1 Committee on Joining of Plastics and Composites

Under the Direction of the
AWS Technical Activities Committee

Approved by the
AWS Board of Directors

Abstract

This standard defines the qualification requirements of Hot Gas, Hot Gas Extrusion, and Heated Tool Butt Thermoplastic welding inspectors. The qualification requirements for visual plastics welding inspectors include experience and satisfactory completion of an examination that includes demonstrated capabilities. The examination tests the inspector's knowledge of plastics welding processes, plastics welding procedures, nondestructive examinations, destructive tests, terms, definitions, symbols, reports, safety, quality assurance, and responsibilities.

Specification for the Qualification of Plastics Welding Inspectors for Hot Gas, Hot Gas Extrusion, and Heated Tool Butt Thermoplastic Welds

1. Scope

1.1 Requirements. This standard establishes the qualification requirements for Hot Gas, Hot Gas Extrusion, and Heated Tool Butt Thermoplastic plastics welding inspection personnel; the requirements for structuring the examination to qualify these personnel; and defines the body of knowledge for plastics welding inspectors.

1.2 Levels. There are three levels of qualification: Associate Plastics Welding Inspector (APWI), Plastics Welding Inspector (PWI), and Senior Plastics Welding Inspector (SPWI).

1.3 Capabilities. No determination is made of an individual's capabilities in applying that knowledge within a specific work environment or under actual working conditions. Qualifications for individual capabilities are outlined within this document for varying levels of welding inspectors.

1.4 Responsibility. It shall be the responsibility of the employer to determine that the APWI/PWI/SPWI is capable of performing the duties involved in his/her particular plastics welding inspection assignment.

1.5 Employer. This standard is intended to supplement the requirements of an employer, code, or other documents and shall not be construed as a preemption of the employer's responsibility for the work or for the performance of the work.

1.6 Safety Precautions. This document is not intended to address safety and health matters regarding plastics welding inspection personnel. Safety and health requirements are provided in MSDS sheets and OSHA recommendations as well as other safety and health standards, and federal, state, and local government regulations. This standard only covers AWS qualification requirements of the APWI/PWI/SPWI. A recommended safety reference is *Guide to the Safe Handling of Fluoropolymer Resins*.

1.7 Verb Usage. As used in this standard, the word *shall* denotes a requirement, the word *should* denotes a guideline, and the word *may* denotes a choice.

2. Referenced Documents

The following standards contain provisions which, through reference in this text, constitute provisions of this AWS standard. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this AWS standard are encouraged to investigate the possibility of applying the most recent editions of the documents shown below. For undated references, the latest edition of the standard referred to applies.
