**AWWA Management Standard**

# Wastewater Collection System Operation and Management

Effective date: May 1, 2017.

First edition approved by AWWA Board of Directors.

This edition approved Jan. 14, 2017.

Approved by American National Standards Institute Mar. 2, 2017.

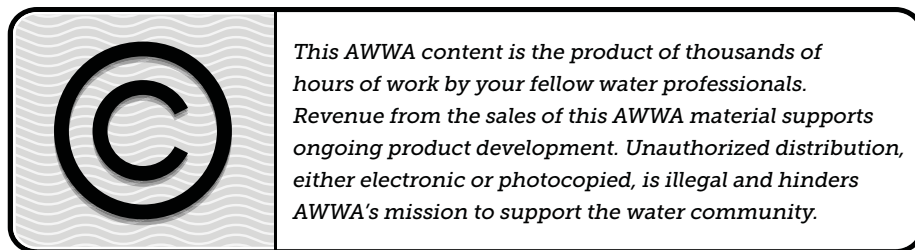

## AWWA Standard

This document is an American Water Works Association (AWWA) standard. It is not a specification. AWWA standards describe minimum requirements and do not contain all of the engineering and administrative information normally contained in specifications. The AWWA standards usually contain options that must be evaluated by the user of the standard. Until each optional feature is specified by the user, the product or service is not fully defined. AWWA publication of a standard does not constitute endorsement of any product or product type, nor does AWWA test, certify, or approve any product. The use of AWWA standards is entirely voluntary. This standard does not supersede or take precedence over or displace any applicable law, regulation, or code of any governmental authority. AWWA standards are intended to represent a consensus of the water supply industry that the product described will provide satisfactory service. When AWWA revises or withdraws this standard, an official notice of action will be placed in the Official Notice section of *Journal - American Water Works Association*. The action becomes effective on the first day of the month following the month of *Journal - American Water Works Association* publication of the official notice.

## American National Standard

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether that person has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review, and users are cautioned to obtain the latest editions. Producers of goods made in conformity with an American National Standard are encouraged to state on their own responsibility in advertising and promotional materials or on tags or labels that the goods are produced in conformity with particular American National Standards.

CAUTION NOTICE: The American National Standards Institute (ANSI) approval date on the front cover of this standard indicates completion of the ANSI approval process. This American National Standard may be revised or withdrawn at any time. ANSI procedures require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of ANSI approval. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute, 25 West 43rd Street, Fourth Floor, New York, NY 10036; 212.642.4900; or emailing [info@ansi.org](mailto:info@ansi.org).

## Committee Personnel

The AWWA Standards Committee on Wastewater Collection Systems Operation and Management, which reviewed and approved this standard, had the following personnel at the time of approval:

Kenneth C. Morgan, *Chair*

### *General Interest Members*

R.W. Arbour, Rick Arbour and Associates Inc., Eagan, Minn.	(AWWA)
K. Burgi, Black & Veatch Corp., Denver, Colo.	(AWWA)
D.M. Flancher,* Standards Engineer Liaison, AWWA, Denver, Colo.	(AWWA)
R.E. Harris, Tata and Howard, Dallas, Texas	(WEF)(AWWA)
R.J. Mahmood, California State University—Sacramento, Office of Water Programs, Sacramento, Calif.	(WEF)(AWWA)
K.C. Morgan, KCM Consulting Services, LLC, Phoenix, Ariz.	(AWWA)
S.D. Osborne, OSD LLC, Lexington, Mass.	(WEF)(AWWA)
P. Rogers, Georgia Southern University, Statesboro, Ga.	(AWWA)
C. Sham,* Standards Council Liaison, The Eastern Research Group, Lexington, Mass.	(AWWA)
S. Tilson, Tilson & Associates LLC, Torrington, Conn.	(AWWA)

### *Producer Members*

P. Mitchell, ADS Environmental Services, Huntington Beach, Calif.	(AWWA)
---	--------

### *User Members*

D. Falkner, Village of Mukwonago, Mukwonago, Wisc.	(AWWA)
H. Judd, Town of Gilbert, Gilbert, Ariz.	(AWWA)
W. Melton III, City of Kannapolis, Kannapolis, N.C.	(AWWA)
S.E. Nuss, Anchorage Water and Wastewater Utility, Anchorage, Alaska	(AWWA)
K. Oberoi, Charleston Water System, Charleston, S.C.	(AWWA)
J. D. Schimmel, Springfield Water and Sewer Commission, Springfield, Mass.	(AWWA)
R. Welsh, Metropolitan Sewer District of Greater Cincinnati, Cincinnati, Ohio	(AWWA)

# Foreword

*This foreword is for information only and is not a part of ANSI\*/AWWA G520.*

## **I. Introduction.**

I.A. *Background.* The AWWA utility management standards are designed to serve water, wastewater, and reuse utilities—hereafter referred to as the *water sector*—and their customers, owners, service providers, and government regulators. The standards developed under the program are generally intended to improve a utility's overall operations and service. One aspect of the standards program is an effort to establish formal management and operations guidelines. These guidelines identify appropriate practices, procedures, and behaviors the implementation of which will promote effective and efficient utility operations and contribute to protection of public health, public safety, and the environment.

AWWA's standards process has been used for more than 90 years to produce American National Standards Institute (ANSI)—approved standards for materials and processes that are used by the water sector. These standards are recognized worldwide and have been adopted by many utilities and organizations. Likewise, this performance standard is developed using the same ANSI-recognized formal process. Volunteer standards committees establish standard practices in a uniform and appropriate format.

Formal standards committees have been and continue to be formed to address the individual standards practices for the diverse areas of water sector operation. A formal standards committee was created in 2001 to develop standards for distribution system operation and management, water treatment plant operation and management, and source water management. This standard on wastewater collection system operation and management is the outcome of the Wastewater Collection Systems Operation and Management Standards Committee.

I.B. *History.* This is the first edition of this standard. It was approved by the AWWA Board of Directors on Jan. 14, 2017.

I.C. *Acceptance.* ANSI/AWWA G520 does not address additives requirements. Users of this standard should consult the appropriate state or local agency having jurisdiction in order to

1. Determine the status of certifications by parties offering to certify products for contact with, or treatment of wastewater, including reclaimed water.
2. Determine current information on product certification.

## **II. Special Issues.**

II.A. *Advisory Information on Application of Standards.* This standard includes only those requirements that are limited exclusively to the operation and management of a wastewater collection system. Separate standards will cover utility programs such as emergency preparedness, security, business practices, wastewater treatment, source water protections, and overall utility management.

**III. Use of This Standard.** It is the responsibility of the user of an AWWA standard to determine that the products described in that standard are suitable for use in the particular application being considered.

III.A. *User Options and Alternatives.* The following information should be provided by the purchaser.

1. Standard used—that is, ANSI/AWWA G520, Wastewater Collection System Operation and Management, of latest revision.

2. Details of other federal, state and provincial, and local requirements (Sec 4.1.1).

III.B. *Modification to Standard.* Any modification of the provisions, definitions, or terminology in this standard must be provided by the purchaser.

**IV. Major Revisions.** This is the first edition of this standard.

**V. Comments.** If you have any comments or questions about this standard, please call the AWWA Engineering and Technical Services at 303.794.7711, FAX at 303.795.7603; write to the department at 6666 West Quincy Avenue, Denver, CO 80235-3098; or email at [standards@awwa.org](mailto:standards@awwa.org).

# Wastewater Collection System Operation and Management

---

## SECTION 1: GENERAL

---

### **Sec. 1.1 Scope**

This standard describes the critical requirements for the effective operation and management of a wastewater collection system.

### **Sec. 1.2 Purpose**

The purpose of this standard is to define the minimum requirements for the operation and management of a wastewater collection system, including maintaining infrastructure and operation and maintenance (O&M) of facilities.

### **Sec. 1.3 Application**

This standard can be referenced in the evaluation of wastewater collection systems operation and management. The stipulations of this standard apply when this document has been referenced and then only to the operation and management of wastewater collection systems.
