Road vehicles — Unified diagnostic services (UDS)
Part 5: Unified diagnostic services on Internet Protocol implementation (UDSonIP)
This British Standard is the UK implementation of ISO 14229-5:2013.

The UK participation in its preparation was entrusted to Technical Committee AUE/16, Electrical and electronic equipment.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO’s adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 22, Road vehicles, Subcommittee SC 3, Electrical and electronic equipment.

ISO 14229 consists of the following parts, under the general title Road vehicles — Unified diagnostic services (UDS):

— Part 1: Specification and requirements
— Part 2: Session layer services
— Part 3: Unified diagnostic services on CAN implementation (UDSonCAN)
— Part 4: Unified diagnostic services on FlexRay implementation (UDSonFR)
— Part 5: Unified diagnostic services on Internet Protocol implementation (UDSonIP)
— Part 6: Unified diagnostic services on K-Line implementation (UDSonK-Line)

The following parts are under preparation:

— Part 7: Unified diagnostic services on Local Interconnect Network implementation (UDSonLIN)
Introduction

This part of ISO 14229 has been established in order to enable the implementation of unified diagnostic services, as specified in ISO 14229-5, on Internet Protocol (UDSonIP).

To achieve this, it is based on the Open Systems Interconnection (OSI) Basic Reference Model specified in ISO/IEC 7498-1 and ISO/IEC 10731, which structures communication systems into seven layers. When mapped on this model, the services specified by ISO 14229 are divided into the following:

— Application layer (layer 7):
  — Vehicle manufacturer enhanced diagnostics: ISO 14229-1, ISO 14229-5;
  — Legislated OBD: ISO 15031-5;
  — Legislated WWH-OBD: ISO 14229-1 / ISO 27145-3;

— Presentation layer (layer 6):
  — Vehicle manufacturer enhanced diagnostics: vehicle manufacturer specific;

— Session layer services (layer 5):
  — Vehicle manufacturer enhanced diagnostics: ISO 14229-2;
  — Legislated OBD: ISO 14229-2;
  — Legislated WWH-OBD: ISO 14229-2;

— Transport layer services (layer 4):
  — Vehicle manufacturer enhanced diagnostics: ISO 13400-2;
  — Legislated OBD: ISO 15765-2, ISO 15765-4;
  — Legislated WWH-OBD: ISO 27145-4;

— Network layer services (layer 3):
  — Vehicle manufacturer enhanced diagnostics: ISO 13400-2;
  — Legislated OBD: ISO 15765-2, ISO 15765-4;
  — Legislated WWH-OBD: ISO 27145-4;

— Data link layer (layer 2):
  — Vehicle manufacturer enhanced diagnostics: ISO 13400-3;
  — Legislated OBD: ISO 11898-1, ISO 11898-2, ISO 15765-4;
  — Legislated WWH-OBD: ISO 27145-4;

— Physical layer (layer 1):
  — Vehicle manufacturer enhanced diagnostics: ISO 13400-3;
  — Legislated OBD: ISO 11898-1, ISO 11898-2, ISO 15765-4;
BS ISO 14229-5:2013
ISO 14229-5:2013(E)

— Legislated WWH-OBD: ISO 27145-4;

in accordance with Table 1.

Road vehicles — Unified diagnostic services (UDS) —

Part 5:
Unified diagnostic services on Internet Protocol implementation (UDSonIP)

1 Scope
This part of ISO 14229 references ISO 14229-1 and ISO 14229-2 and specifies the implementation requirements of a common set of unified diagnostic services (UDS) on Internet Protocol (UDSonIP).

NOTE UDSonIP does not specify any requirements of the in-vehicle network architecture.

This part of ISO 14229 does not include any redundant information of the documents as listed in the introduction. It focuses on
— additional requirements specific to the implementation of UDSonIP, and
— specific restrictions in the implementation of UDSonIP.

2 Normative references
The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 13400 (all parts), Road vehicles — Diagnostic communication over Internet Protocol (DoIP)
ISO 14229-1, Road vehicles — Unified diagnostic services (UDS) — Part 1: Specification and requirements
ISO 14229-2, Road vehicles — Unified diagnostic services (UDS) — Part 2: Session layer services

3 Terms, definitions, and abbreviated terms

3.1 Terms and definitions
For the purposes of this document, the terms and definitions in ISO 14229-1, ISO 14229-2, and ISO 13400 (all parts) apply.
