National foreword

This British Standard is the UK implementation of EN 1709:2019. It supersedes BS EN 1709:2004, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MCE/20, Aerial ropeways.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

maintenance et les contrôles en exploitation

Sicherheitsanforderungen an Seilbahnen für die
Personenbeförderung - Erprobung und Anleitungen
für die Instandhaltung und die Betriebskontrollen

This European Standard was approved by CEN on 15 January 2019.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Annex ZA (informative)

Relationship between this European Standard and the essential requirements of Regulation (EU) 2016/424

This European Standard has been prepared under a Commission's standardization request, M/300, to provide one voluntary means of conforming to the essential requirements of Regulation (EU) 2016/424 relative to cableway installations and repealing Directive 2000/9/EC.

Once this standard is cited in the Official Journal of the European Union under that Regulation, compliance with the normative clauses of this standard given in [Table ZA.1](#) confers, within the limits of the scope of this standard, a presumption of conformity with the corresponding Essential Requirements of that Regulation and associated EFTA regulations.

Table ZA.1 — Correspondence between this European Standard and the articles of Regulation (EU) 2016/424

Essential requirements of Regulation (EU) 2016/424	Clause(s)/subclause(s) of this European Standard	Remarks/Notes
2.1, 2.2, 2.3	4.2	
2.3, 2.4, 2.5, 7.1	Section 5	
2.6.1, 2.6.2, 2.6.3, 2.8, 7.1.1	Section 6	
2.6.4	6.4	
2.6.2, 2.6.3, 7.1.1	Section 7	

WARNING 1 — Presumption of conformity stays valid only as long as a reference to this European Standard is maintained in the list published in the Official Journal of the European Union. Users of this standard should consult frequently the latest list published in the Official Journal of the European Union.

WARNING 2 — Other EU legislation may be applicable to the product(s) falling within the scope of this standard.

European foreword

This document (EN 1709:2019) has been prepared by Technical Committee CEN/TC 242 "Safety requirements for cableway installations designed to carry persons", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by November 2019, and conflicting national standards shall be withdrawn at the latest by November 2019.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 1709:2004.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of Regulation (EU) 2016/424.

For the relationship with Regulation (EU) 2016/424, see informative [Annex ZA](#), which is an integral part of this document.

The main changes with respect to the previous edition are listed below:

- a) [4.2.2 h\)](#) was added due to the unsuitability of one procedure.
- b) The classification of [Clause 5](#) has been changed in order to implement the term "precommissioning inspection" consistently with [3.1](#).
- c) [Clause 5](#) has been changed in order to clarify the differences between the two categories of documents (documents by which the planned configuration of the installation is established, and documents which the suppliers have to provide to the controller).
- d) [5.2](#) has been deleted, as it is already included in the modified [5.1](#).
- e) [5.3 g\)](#) was inserted.
- f) The order of the list in [5.3](#) was adapted to the Regulation (EU) 2016/424 and to [Section 6](#).
- g) In the last paragraph of [5.3](#), the independent competent person has been deleted, as this is a matter for the national members.
- h) In [5.3 m\)](#) the pre-commissioning inspection has been deleted because it conflicts with the title and the performance of recovery exercises as determined in national regulations and/or in EN 1909.
- i) The final paragraph of [5.4](#) has been deleted as it is already covered in EN 12397.
- j) In [6.1](#), the requirements for documenting maintenance work have been combined and extended in one place.
- k) [6.1.1](#) (new [6.1.2](#)) has been changed, as, in accordance with [5.5](#), suppliers are required to provide instructions for maintenance.
- l) [6.1.4](#) was inserted, so that Annex ZA is still possible.
- m) The definition of inspection in [6.3.1](#) has been supplemented with information concerning the time requirements. This definition is now not the same as the term "inspection" in EN 1907.
- n) The requirements in [6.3.1](#) for civil engineering works are generally applicable and have been expanded to include all parts of the installation.

This is a preview of "BS EN 1709:2019". [Click here to purchase the full version from the ANSI store.](#)

- o) In [6.3.2](#) and [6.3.5](#), the visual inspection of screws and rivets for tightness has been changed to cover loose and missing elements, and the visual inspection with regard to deformation has been extended to include all components.
- p) In [6.3.3](#), a), c), i), k) and parts of m) have been omitted and a stipulation of switching cabinet cleanliness requirements included. The order of the list was adapted to Regulation (EU) 2016/424.
- q) In [6.3.5](#), the order of the lists has been changed to comply with Regulation (EU) 2016/424 and a clause concerning mobile evacuation equipment has been included.
- r) [6.3.5.2](#) has been supplemented with detailed requirements for timber structures and for the terrain in the vicinity of the civil engineering works.
- s) Most of the requirements for funicular railways originally included in [6.3.6](#) are generally applicable and have been extended to include all cableway systems. In order to create a comprehensible qualitative difference with respect to the annual inspections in accordance with [6.3.5.2](#), inspection by a competent person was introduced for the multiannual inspection of engineering structures (tunnels, galleries, bridges) and ground anchors.
- t) The intervals and the inspection methodology were changed in [6.3.7](#).
- u) The requirements relating to the civil engineering works in [6.4](#) have been omitted, as they repeat similar requirements in this Standard.
- v) 6.5 has been deleted without replacement.
- w) The terms and organization of [Clause 7](#) have been revised. In addition, it was decided that the supplier's instructions in accordance with [5.5](#) shall include the stated operational inspections.
- x) Clause 8 has been deleted, as it is already covered in other areas of the Standard.
- y) The scope of the Standard was changed from "Maintenance and operational inspections" to "Instructions for maintenance and operational inspections".

This document forms part of a series of European Standards concerning safety requirements for cableway installations designed to transport persons. This series of standards comprises the following documents:

- EN 1907 relating to Terminology;
- EN 12929 (all parts) relating to General requirements;
- EN 12930 relating to Calculations;
- EN 12927 relating to Cables;
- EN 1908 relating to Tensioning devices;
- EN 13223 relating to Drive systems and other mechanical equipment;
- EN 13796 (all parts) relating to Carriers;
- EN 13243 relating to Electrical equipment other than for drive systems;
- EN 13107 relating to Civil engineering works;
- EN 1709 relating to Pre-commissioning inspections and instructions for maintenance and operational inspection and checks;
- EN 1909 relating to Recovery and evacuation;
- EN 12397 relating to Operation;
- EN 12408 relating to Quality control.

This is a preview of "BS EN 1709:2019". [Click here to purchase the full version from the ANSI store.](#)

Together these form a series of standards regarding design, manufacture, erection, maintenance and operation of all installations for cableway installations designed to transport persons.

In respect of ski-tows, the drafting of this document has been guided by the works of the International Organization for Transportation by Rope (OITAF).

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

1 Scope

This document sets the safety requirements that need to be met in relation to pre-commissioning inspections and the instructions for maintenance and operational inspections and checks of cableway installations designed to transport persons. This document is applicable to the various types of cableway installation and takes into account their environment.

It also includes requirements relating to accident prevention and to the protection of workers irrespective of the application of national regulations.

National regulations regarding building laws or regulations or which afford protection to specific groups of people, as well as national regulations regarding testing, acceptance testing prior to starting passenger service, maintenance and operational inspection shall remain unaffected.

It does not apply to cableway installations for the transportation of goods or to lifts.

The provisions of [Clause 5](#) apply to the measures to be taken prior to the commissioning of the installation, and those of [Clauses 6](#) and [7](#) to the measures to be taken during operation.

This document does not apply to cableway installations designed to transport persons that were manufactured before the publication of this EN standard.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 1907 and the following apply.
