National foreword

This British Standard is the UK implementation of ISO/IEC 30105-3:2016+A1:2020. It supersedes BS ISO/IEC 30105-3:2016, which is withdrawn.

The start and finish of text introduced or altered by amendment is indicated in the text by tags. Tags indicating changes to ISO/IEC text carry the number of the ISO/IEC amendment. For example, text altered by ISO/IEC amendment 1 is indicated by A1 A1.

The UK participation in its preparation was entrusted to Technical Committee IST/60/3, IT-enabled Services/Business Process Outsourcing.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/IEC JTC 1, *Information technology*, Subcommittee SC 40, *IT Service Management and IT Governance*.

A list of all parts in the ISO/IEC 30105 series can be found on the ISO website.

This corrected version of ISO/IEC 30105-3:2016 incorporates the following corrections:

- Clause 3: The definition of "organization" has been corrected to reflect the definition in ISO 9000:2015. It has been moved out of a NOTE and into a term entry 3.1.
- Clause 3: The definition of "organization unit" has been moved out of the NOTE and into a term entry 3.2.
- Clause 5: The third paragraph was a duplicate of the second paragraph and has been deleted.
- 10.6, Table 7: Process attributes (PA) 4.1 and 4.2 of maturity level 5 have been corrected to reflect that they are fully required for the processes SDL2, SDL3, TEN3 and TEN5 by adding an "F" in the cells.

Table 7 — Maturity level 5 PA ratings

Code	Process areas	PA 1.1	PA 2.1 and 2.2	PA 3.1 and 3.2	PA 4.1 and 4.2	PA 5.1 and 5.2
SDL2	Service delivery reporting	F	F	F	F	—
SDL3	Service level management	F	F	F	F	—
TEN3	Change management	F	F	F	F	—
TEN5	Business continuity management	F	F	F	F	—

Introduction

ITES-BPO services encompass the delegation of one or more IT enabled business processes to a service provider who uses appropriate technology to deliver service. Such a service provider manages, delivers, improves and administers the outsourced business processes in accordance with predefined and measurable performance metrics. This covers diverse business process areas such as finance, human resource management, administration, health care, banking and financial services, supply chain management, travel and hospitality, media, market research, analytics, telecommunication, manufacturing, etc. These services provide business solutions to customers across the globe and form part of the core service delivery chain for customers.

ISO/IEC 30105 (all parts) specifies the lifecycle processes requirements involved in the ITES-BPO industry.

- It provides an overarching standard for all aspects of ITES-BPO industry from the view of the service provider that performs the outsourced business processes. This is applicable for any ITES-BPO service provider providing services to customers through contracts and in industry verticals.
- It covers the entire outsourcing lifecycle and defines the processes that are considered to be good practices.
- It is an improvement standard that enables risk determination and improvement for service providers performing outsourced business processes. It also serves as a process reference model for service providers.
- It focuses on IT enabled business processes which are outsourced.
- It is generic and can be applied to all IT enabled business process outsourced services, regardless of type, size and the nature of the services delivered.
- Process improvement implemented using ISO/IEC 30105 (all parts) can lead to clear return on investment for customers and service providers.
- Alignment to ISO/IEC 30105 (all parts) can improve consistency, delivery quality and predictability in delivery of services.

[Figure 1](#) illustrates the key entities and relationships involved in an ITES-BPO service. It includes the customer, the ITES-BPO service provider and various levels of suppliers. This is as per the supply chain relationship depicted in ISO/IEC 20000-1:2011, 7.2.

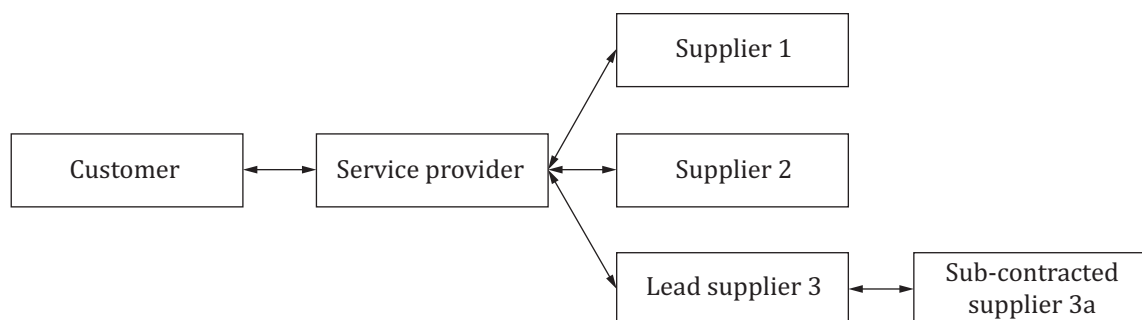

Figure 1 — ITES-BPO key entities

This document details a measurement framework (MF) and an organization maturity model (OMM). It provides the overview of how an organization can use the PRM and PAM to measure their capability and maturity levels.

This is a preview of "BS ISO/IEC 30105-3:2...". [Click here to purchase the full version from the ANSI store.](#)

This document is to be used in concurrence with the other parts of ISO/IEC 30105 and the assessment approach provided by ISO/IEC 33002 for assessing processes.

In this document, the following clauses of ISO/IEC 33020 have been replicated:

- Clause 5: Measurement framework;
- Clause 6: Extract of selected parts of rating and aggregating process attributes;
- Clause 7: Capability level model.

Information technology — IT Enabled Services-Business Process Outsourcing (ITES-BPO) lifecycle processes —

Part 3: Measurement framework (MF) and organization maturity model (OMM)

1 Scope

ISO/IEC 30105 specifies the lifecycle process requirements performed by the IT enabled business process outsourcing service provider for the outsourced business processes. It defines the processes to plan, establish, implement, operate, monitor, review, maintain and improve its services. This document:

- covers IT enabled business processes that are outsourced;
- is not intended to cover IT services but includes similar, relevant process for completeness;
- is applicable to the service provider, not to the customer;
- is applicable to all lifecycle processes of ITES-BPO;
- serves as a measurement framework for processes and provide an organization maturity model for organizations providing ITES-BPO services that:
 - conforms to the requirements of ISO/IEC 33003 and ISO/IEC 33004;
 - supports the performance assessment by providing a framework to measure and derive capability and organization maturity levels.
