NOTICE

Consumer Electronics Association (CEA®) Standards, Bulletins and other technical publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards, Bulletins and other technical publications shall not in any respect preclude any member or nonmember of CEA from manufacturing or selling products not conforming to such Standards, Bulletins or other technical publications, nor shall the existence of such Standards, Bulletins and other technical publications preclude their voluntary use by those other than CEA members, whether the standard is to be used either domestically or internationally.

Standards, Bulletins and other technical publications are adopted by CEA in accordance with the American National Standards Institute (ANSI) patent policy. By such action, CEA does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard, Bulletin or other technical publication.

This CEA Standard is considered to have International Standardization implication, but the International Electrotechnical Commission activity has not progressed to the point where a valid comparison between the CEA Standard and the IEC document can be made.

This Standard does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this Standard to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

This document is copyrighted by the Consumer Electronics Association (CEA®) and may not be reproduced, in whole or part, without written permission. Federal copyright law prohibits unauthorized reproduction of this document by any means. Organizations may obtain permission to reproduce a limited number of copies by entering into a license agreement. Requests to reproduce text, data, charts, figures or other material should be made to CEA.

(Formulated under the cognizance of the CEA's **R3 Audio Systems Committee**.)

FOREWORD

This standard was developed by the Consumer Electronics Association's Audio Systems Committee (CEA R3 Committee).

CONTENTS

1 Scope.....	1
2 References.....	1
2.1 Informative References.....	1
2.1.1 Informative Reference List.....	1
2.1.2 Informative Reference Acquisition	1
2.2 Definitions	2
2.3 Symbols and Abbreviations	2
2.4 Compliance Notation.....	2
3 Standard Test Conditions	2
4 Test Procedures.....	3
4.1 Determining Maximum SPL Output	3
4.2 Ground Plane Test Procedure.....	5
4.3 Room Correction Factor	7
5 Reporting Requirements	8
Annex A (informative).....	9
A.1 Suggested Reporting Format for Test Data	9

Figures

Figure 1: Distortion+Noise Threshold vs. Frequency	5
Figure 2: Basic ground plane measurement set-up for a subwoofer system whose driver and port are located on the same face of the enclosure (cut-away side view)	5
Figure 4: Two examples of ground plane measurement set-ups for subwoofer systems with major radiating elements on multiple faces of their enclosures (cut-away view from above)	7

Tables

Table 1: Peak SPL Limits.....	4
Table 2: Minimum required distance between DUT and acoustically reflective boundaries (walls) ¹	6

STANDARD METHOD OF MEASUREMENT FOR POWERED SUBWOOFERS

1 Scope

This standard defines a method for measuring the audio performance of powered subwoofers.

2 References

2.1 Informative References

The following references contain provisions that, through reference in this text, constitute informative provisions of this standard. At the time of publication, the edition indicated was valid. All standards are subject to revision, and parties to agreements based on this standard are encouraged to investigate the possibility of applying the most recent edition of the standard indicated below.

2.1.1 Informative Reference List

Keele, D.B.. Low Frequency Loudspeaker Assessment by Nearfield Sound-Pressure Measurement, *Journal of the Audio Engineering Society*, vol. 22, no. 3, p. 154 (1974).

Gander, Mark, Ground-Plane Acoustic Measurements of Loudspeaker Systems. *Journal of the Audio Engineering Society*, vol. 30, no. 10, p. 723 (1982).

2.1.2 Informative Reference Acquisition
