

Contents	Page
1 Introduction.....	1
1.1 Scope	1
1.2 General.....	1
1.3 Physical/chemical properties of ammonia	1
1.4 Ammonia exposure.....	3
1.5 Federal, state, and local regulations.....	4
1.6 Hazardous material classification	4
2 Definitions.....	4
3 Safety	8
3.1 Training.....	8
3.2 Normal conditions.....	8
3.3 Emergency planning and response coordination	8
3.4 Permanent storage installations	9
3.5 Cargo tanks	10
3.6 Leaks in transportation equipment	11
3.7 Cylinder and DOT portable tank installations	11
3.8 Site security	11
4 Use of water in emergencies	11
4.1 Human exposure	11
4.2 Accidental release	11
4.3 Fire exposure.....	12
4.4 Absorption in water.....	12
5 Basic rules	12
5.1 Equipment and systems	12
5.2 Requirements for new construction and original test, repair, and alterations of containers (including DOT portable tanks), other than refrigerated storage tanks.....	14
5.3 Location of containers	15
5.4 Markings of nonrefrigerated containers and systems other than DOT containers	17
5.5 Container appurtenances	18
5.6 Piping, tubing, and fittings	19
5.7 Hose specification	20
5.8 Pressure relief devices	23
5.9 Filling densities	26
5.10 Transfer of liquids.....	26
5.11 Liquid level gauging devices.....	29
5.12 Painting of containers	29
5.13 Electrical equipment and wiring.....	30
5.14 Heating devices for containers and cylinders	30
6 Systems using stationary, pier-mounted or skid-mounted, aboveground or underground, nonrefrigerated storage	30
6.1 Design pressure and construction of containers	30
6.2 Container valves and accessories and discharge connections	31
6.3 Pressure relief devices	31
6.4 Installation of storage containers.....	31
6.5 Reinstallation of containers	33
6.6 Marking containers	33
6.7 Protection of container and appurtenances.....	33
6.8 Identification for emergency	34
7 Refrigerated storage.....	34
7.1 Design of tanks.....	34
7.2 Installation of storage tanks (aboveground)	34
7.3 Marking refrigerated containers.....	35
7.4 Tank valves, accessories, fill pipes, and discharge pipes	36
7.5 Pressure relief valves	36

7.6	Protection of containers and appurtenances	38
7.7	Reinstallation of containers	38
7.8	Refrigeration load and equipment	38
7.9	Safety equipment.....	40
7.10	Identification for emergency	40
8	Systems mounted on railcar structures (tank cars), other than DOT class 106A, for transportation of ammonia.....	41
8.1	Design and construction	41
8.2	Pressure relief valves	41
8.3	Marking and placarding	41
8.4	Tank car loading and unloading locations and operations	41
9	Systems mounted on trucks, semitrailers, and trailers for transportation of ammonia	43
9.1	Design pressure of containers.....	43
9.2	Container mounting	44
9.3	Container appurtenances	44
9.4	Piping, fittings, and hose	46
9.5	Pressure relief valves	46
9.6	Placarding and marking of containers	46
9.7	Transfer of liquids.....	47
9.8	Trailers and semitrailers	47
9.9	Electrical equipment and lighting.....	48
9.10	Protection against collision	48
9.11	Brakes	48
9.12	Portable tanks (including skid tanks)	48
9.13	Safety equipment.....	48
10	Systems using DOT portable tanks and cylinders.....	48
10.1	Containers and cylinders	48
10.2	Container and cylinder valves and regulating equipment.....	49
10.3	Pressure relief devices	50
11	Systems mounted on farm wagons (implements of husbandry) for the transportation of ammonia	50
11.1	Design of containers.....	50
11.2	Mounting of containers	50
11.3	Container appurtenances	51
11.4	Placarding and marking of containers	51
11.5	Farm wagons (implements of husbandry)	52
11.6	Safety equipment.....	52
11.7	Chemical additive compatibility	53
12	Systems mounted on farm equipment (implements of husbandry) for the application of ammonia.....	53
12.1	Design of containers.....	53
12.2	Mounting of containers	53
12.3	Container valves and appurtenances	53
12.4	Safety equipment.....	54
13	References	54

Tables

Table 1—Physical properties of ammonia	2
Table 2—Human physiological responses to various concentrations of ammonia in air	3
Table 3—Regulatory ammonia exposure limits.....	3
Table 4—Emergency response planning guideline exposure limits.....	4
Table 5—Minimum separation distances for location of ammonia storage containers	16
Table 6—Ammonia container maximum heating limits	30

Appendices

Appendix A—Minimum required flow rate of pressure relief devices for fire protection (Normative)	58
