

Contents	Page
1 Introduction.....	1
2 Scope	1
2.1 Procedure qualification	1
2.2 Operator qualification	1
2.3 Container production acceptance.....	1
2.4 Radiographic inspection	1
3 Procedure qualification	1
3.1 Applicability.....	1
3.2 Procedure specification	1
3.3 Welding procedures.....	2
3.4 Base material.....	2
3.5 Positions of welds.....	2
3.6 Type, number, and method of preparation of test specimens	3
3.7 Methods of testing specimens and acceptable test results	4
3.8 Records	4
3.9 Essential variables	4
4 Operator qualification	4
4.1 Applicability.....	4
4.2 Welding procedures.....	4
4.3 Base material.....	5
4.4 Positions of welds.....	5
4.5 Type, number, and method of preparation of test specimens	5
4.6 Methods of testing specimens and acceptable test results	5
4.7 Retests	5
4.8 Period of effectiveness	6
4.9 Records	6
4.10 Essential variables	6
5 Container production acceptance.....	7
5.1 Location of details for required tests.....	7
5.2 Production lots.....	7
5.3 Radiographic examination	7
6 Radiographic inspection	7
6.1 Applicability.....	7
6.2 Preparation.....	7
6.3 Terminology.....	8
6.4 Darkroom facilities	8
6.5 Film viewing facilities	8
6.6 Film processing	8
6.7 Penetrameters	8
6.8 Film identification and inspection data.....	10
6.9 Selection of technique	10
6.10 Limits of acceptability	11
6.11 Retests	12
6.12 Retention of radiographs	12
7 Container repair—applicability	12

8 Test methods..... 12

8.1 Positions of welds..... 12

8.2 Tension test (transverse to weld) 12

8.3 Flattening test (on cylindrical section) 14

8.4 Flattening test (on sphere)..... 15

8.5 Root-break test..... 15

8.6 Macro-etch test..... 15

8.7 Guided-bend test..... 16

9 Assignment of electrodes 20

10 References 20

Tables

Table 1—Composition limits for material groupings..... 2

Table 2—Procedure qualification test specimens 3

Table 3—Operator qualification test specimens 6

Table 4—Assignment of electrodes and welding rods for procedures and operator qualification 20

Figures

Figure 1—Sample penetrameter 9

Figure 2—Suggested format for radiograph documentation 10

Figure 3—Position of welds 13

Figure 4—Specimen for tension test..... 14

Figure 5—Specimen for guided-bend test 16

Figure 6—Standard guided-bend test jig 17

Figure 7—Alternate guided-bend test jig..... 18

Figure 8—Illustrated methods for alternate guided-bend test 19

Appendices

Appendix A—Recommended form for procedure qualification record (Informative)..... 22

Appendix B—Recommended form of welding procedure specification (Informative) 23

Appendix C—Recommended form for manufacturer’s record of welder or welding operator
qualification tests (Informative) 24

Appendix D—Dimensional tolerances (Normative)..... 25

Appendix E—Typical weld joints (Informative)..... 26
