

Contents	Page
1 Introduction	1
2 Scope	1
3 Definitions	1
4 Safety considerations	3
5 Flaws in gas tubes	3
6 Operational description	6
7 Special considerations to obtain valid test	6
8 Equipment and material	7
9 Calibration and standardization.....	8
10 Tube test procedure	8
11 Documentation and report.....	9
12 AE equipment parameters	9
13 Secondary inspection.....	9
14 Rejection criteria	9
15 Operator qualifications	9
16 References.....	9
17 Related references.....	10
