

Contents	Page
1 Introduction.....	1
2 Scope and purpose	1
3 Definitions.....	1
4 Properties of fluorine	3
4.1 Fluorine identification.....	3
4.2 Physical properties	3
4.3 Chemical reactivity	4
4.4 Toxicity	5
4.5 Environmental issues	6
5 Oxidizing/reactivity hazards.....	6
5.1 Introduction to fire and explosion hazards.....	6
5.2 Factors influencing reaction, ignition, and combustion.....	7
6 Control of toxicity hazards	11
6.1 Detection of fluorine leaks	12
6.2 Ventilation	12
6.3 Personal protective equipment.....	13
7 Control of oxidizing/reaction hazards	13
7.1 Building/site considerations	13
7.2 Materials of construction of fluorine systems.....	14
7.3 Fluorine system design.....	16
7.4 Equipment selection	18
7.5 Cleaning and passivation of fluorine systems	19
7.6 Compression of fluorine.....	21
7.7 Operating procedures and personnel training	21
7.8 Maintenance procedures.....	21
8 Cylinder filling	22
8.1 Filling facility considerations	22
8.2 Gas containers and associated equipment	23
8.3 Cylinder filling equipment	24
9 Supply to point of use.....	26
9.1 Facility considerations and storage	26
9.2 Gas supply manifolds	26
10 Gas abatement system	27
10.1 Basic principles of abatement.....	27
10.2 Dry scrubbers	28
10.3 Wet scrubbers	28
11 Transportation	28
11.1 Land transport	28
11.2 Air transport.....	28
11.3 Sea transport.....	29
12 Emergency response	29
12.1 Leaks of fluorine	29
12.2 Firefighting.....	29
12.3 First aid measures.....	30

Tables

Table 1—Temperature effects on common metals used for fluorine systems 8
Table 2—Guidelines for velocity limits in pipelines for fluorine and mixtures of > 35% 17
Table 3—Passivation guidelines versus fluorine design conditions 21
