

Contents	Page
1 Scope	1
2 Definitions.....	2
3 Special hazards.....	3
3.1 General.....	3
3.2 Dry ice blocking	3
3.3 Trapped liquid.....	4
3.4 Low temperature.....	4
3.5 Personnel overexposure.....	4
3.6 Carbon dioxide leak detection system.....	6
3.7 Overfilling containers.....	7
4 Physiological effects of carbon dioxide	7
4.1 General.....	7
4.2 Effects of inhaled carbon dioxide.....	7
4.3 Physical effects of overexposure to carbon dioxide	8
4.4 Regulatory standard	8
4.5 Safety precautions.....	8
4.6 Rescue and first aid.....	8
5 Design of carbon dioxide supply systems	8
5.1 Containers	8
5.2 Pressure relief devices	9
5.3 Other appurtenances.....	9
5.4 Piping, tubing, hoses, and fittings.....	9
6 System installation	10
6.1 General.....	10
6.2 Material selection.....	10
6.3 Assembly	10
6.4 Leak testing	11
6.5 Vent piping integrity	11
7 Filling small insulated carbon dioxide systems.....	11
7.1 General.....	11
7.2 Transfer procedure	11
8 Inspection and maintenance	12
8.1 Inspection	12
8.2 Maintenance.....	12
9 References	12

Figures

Figure 1—Typical small stationary insulated carbon dioxide supply system for beverage carbonation and dispensing	1
Figure 2—Example of an unsafe, enclosed space.....	4
Figure 3—Example of a naturally ventilated and monitored enclosed space	5
Figure 4—Example of a properly monitored but improperly ventilated enclosed space	5
Figure 5—Example of a properly ventilated and monitored enclosed space	5
Figure 6—Fenced outdoor enclosures for carbon dioxide installations	6
Figure 7—Outdoor walls or courtyards for carbon dioxide installations	6
Figure 8—Symbol on container nameplate showing certification to ASME Code, Section VIII, Division 1	9
