

Contents	Page
1 Introduction.....	1
2 Scope	1
3 Definitions.....	1
3.1 Carbon dioxide	1
3.2 Critical point.....	1
3.3 Critical pressure.....	1
3.4 Critical temperature	1
3.5 Dry ice	1
3.6 Saturated condition.....	1
3.7 Sublimation.....	1
3.8 Supercritical fluid	1
3.9 Triple point.....	1
4 Carbon dioxide	2
4.1 Physical and chemical properties.....	2
4.2 Manufacture.....	4
4.3 Common packaging practices	5
5 Physiology and toxicology of carbon dioxide.....	5
5.1 General.....	5
5.2 Physiological effects of carbon dioxide.....	5
5.3 Physical effects of overexposure to carbon dioxide	5
5.4 Static Electricity	6
5.5 Regulatory standards	6
5.6 Safety precautions.....	6
5.7 Rescue and first aid.....	6
6 Special hazards.....	7
6.1 General.....	7
6.2 Low temperature effects on materials	7
6.3 Personnel overexposure.....	7
7 Regulations	7
7.1 General.....	7
7.2 Transportation regulations.....	7
7.3 Workplace regulations	7
7.4 Recommended hazard rating	7
7.5 Labeling and placarding	8
8 Storage and handling of dry ice.....	8
8.1 General.....	8
8.2 Storage boxes	8
8.3 Personal protective equipment	8
8.4 Handling and use precautions	8
8.5 Disposal of unused dry ice	8
9 Dry ice applications	9
10 Dry ice converters	10
11 References	10
12 Additional reference	11

Tables

Table 1—Physical constants of carbon dioxide.....	2
Table 2—Thermodynamic properties of saturated carbon dioxide solid, liquid, and vapor phases (U.S. customary units)	12
Table 3—Thermodynamic properties of saturated carbon dioxide solid, liquid, and vapor phases (SI units)....	14

Figures

Figure 1—Carbon dioxide phase diagram	3
Figure 2—Production of dry ice disks for airline food module refrigeration.....	4
Figure 3—Hazard warning label for dry ice	16
