

| <b>Contents</b>   | <b>Page</b> |
|---|-------------|
| 1 Introduction.....   | 1           |
| 2 Scope .....   | 1           |
| 3 What is air? .....  | 1           |
| 4 Methods of producing compressed air for human respiration ..... | 3           |
| 4.1 Compressors .....   | 3           |
| 4.2 Synthetic air.....  | 4           |
| 5 Containers .....  | 5           |
| 5.1 Air containers.....   | 5           |
| 5.2 Container preparation.....                                    | 5           |
| 5.3 Valves on air containers .....                                | 5           |
| 6 Pressure and temperature relationships .....                    | 5           |
| 7 Use of compressed air .....                                     | 5           |
| 8 Precautions .....   | 5           |
| 9 References .....  | 6           |
| <b>Tables</b>   |             |
| Table 1—Composition of air (dry) .....                            | 1           |
| Table 2—Physical characteristics of air .....                     | 2           |
