|--|-------------|
| 1 Introduction..... | 1 |
| 2 Scope | 1 |
| 3 Definitions..... | 1 |
| 4 Properties and hazards | 3 |
| 4.1 Identification | 3 |
| 4.2 Physical properties and hazards | 3 |
| 4.3 Chemical properties and hazards..... | 5 |
| 4.4 Occupational exposure..... | 8 |
| 4.5 Environmental issues | 9 |
| 4.6 Security..... | 10 |
| 5 Equipment and procedures | 10 |
| 5.1 Principles | 10 |
| 5.2 Compatibility of materials with nitrous oxide..... | 10 |
| 5.3 Valves..... | 11 |
| 5.4 Filters..... | 11 |
| 5.5 Cleaning of installation | 11 |
| 5.6 Prevention of contamination..... | 11 |
| 5.7 Avoiding high temperature | 11 |
| 5.8 Restriction of flow velocity | 12 |
| 5.9 Operating procedures..... | 12 |
| 5.10 Maintenance procedures..... | 13 |
| 5.11 Isolation from flammable gases..... | 13 |
| 5.12 Use of carbon dioxide equipment..... | 13 |
| 6 Stationary tanks..... | 13 |
| 6.1 Design | 13 |
| 6.2 Refrigeration units | 14 |
| 6.3 Vaporizers and heaters | 15 |
| 6.4 Piping, instrumentation, and valves..... | 15 |
| 6.5 Pressure relief valves | 16 |
| 6.6 Admissible filling degree/filling ratio..... | 17 |
| 6.7 Filling of stationary low pressure tanks..... | 17 |
| 6.8 Product return..... | 17 |
| 7 Supply equipment..... | 17 |
| 7.1 Cylinders..... | 17 |
| 7.2 Bundles..... | 18 |
| 7.3 Transport tanks..... | 18 |
| 7.4 Pumps | 19 |
| 7.5 Hoses, accessories, and couplings (fill connections) | 20 |
| 8 Product transfer | 21 |
| 8.1 Cylinders and bundles..... | 21 |
| 8.2 Transport tanks..... | 22 |
| 9 Emergency response | 23 |
| 9.1 Hazards | 23 |
| 9.2 Procedures for large leaks or spills of nitrous oxide | 23 |
| 9.3 Procedures at fire situations..... | 23 |
| 9.4 Procedures at traffic accident involving a transport tank..... | 24 |
| 9.5 Personal protective equipment (PPE) | 25 |
| 9.6 First aid..... | 25 |
| 10 References | 26 |
