

Contents	Page
1 Introduction.....	1
2 Scope	1
3 Definitions.....	2
4 Health hazards and safety considerations	4
5 Site selection	5
5.1 General considerations.....	5
5.2 Electrical considerations.....	5
6 Developing a suitable site for a hydrogen system.....	6
6.1 General.....	6
6.2 Building codes	7
6.3 Bulk liquid system.....	7
6.4 Fencing and walls.....	7
6.5 Grounding.....	8
6.6 Design requirements	8
6.7 Site access	8
6.8 Utilities.....	8
7 Planning for compliance with OSHA and EPA regulations.....	8
7.1 Regulatory requirements	8
7.2 System safety analysis.....	9
8 Equipment selection	9
8.1 Hydrogen embrittlement considerations.....	9
8.2 Liquid hydrogen tank specifications	10
8.3 Receiver specifications.....	10
8.4 Vaporizer specifications.....	12
8.5 Pump station specifications.....	12
8.6 Compressor specifications	14
8.7 Control component specifications.....	16
8.8 Piping specification.....	17
8.9 Vent system specification.....	17
8.10 Electrical equipment specification	17
9 Equipment transportation and setting.....	17
10 Equipment installation	17
10.1 General.....	17
10.2 Liquid storage tank	18
10.3 Gas receivers	19
10.4 Vaporizers	22
10.5 Pumps	22
10.6 Compressors	22
10.7 Piping.....	22
10.8 Vent systems.....	22
10.9 Electrical components	22
11 Startup.....	22
11.1 General for liquid and gaseous hydrogen systems	22
11.2 Liquid hydrogen system	23
11.3 Gaseous hydrogen systems.....	25
11.4 Final system checkout.....	26
11.5 Training.....	26

12	Operation.....	26
12.1	Operation and maintenance instructions.....	26
12.2	Management systems	27
12.3	General safety	27
12.4	Personnel	27
12.5	Shutdown, repair, and startup	28
12.6	Maintenance and inspection.....	28
13	System removal.....	28
13.1	Removal of gas receivers	29
13.2	Removal of a liquid tank	29
14	References	29

Figure

Figure 1—Flow sheet of a typical hydrogen compressing system	15
