1 Introduction.....	1
2 Scope	1
3 Standards and specifications	1
4 Properties of cryogenic liquids	2
4.1 Extremely low temperature.....	2
4.2 High liquid-to-gas expansion ratios	3
4.3 Fogging.....	3
4.4 Asphyxiant.....	3
4.5 Toxicity and flammability	3
4.6 Physical properties	3
5 Safety	4
5.1 Safety training.....	4
5.2 Safety practices for personnel	5
5.3 Safety practices for oxygen	6
5.4 Safety practices for inert gases	7
5.5 Safety practices for flammable gases.....	7
5.6 Safety practices for carbon monoxide	8
5.7 Safety practices for oxygen deficient areas.....	9
5.8 Work permits for equipment maintenance.....	10
5.9 Additional safety considerations	10
6 Fire prevention and firefighting.....	11
6.1 General information	11
6.2 General firefighting procedures	14
6.3 Oxygen fires	14
6.4 Hydrogen fires	15
6.5 Natural gas fires	15
6.6 Carbon monoxide fires	15
6.7 Fires involving inert cryogenic liquids.....	16
7 Containers and storage systems.....	16
7.1 Small portable containers	16
7.2 Handling considerations for small portable containers	17
7.3 Bulk storage systems	18
7.4 General handling considerations for bulk storage systems	19
7.5 Additional handling considerations for liquid hydrogen and liquid helium	20
7.6 Special handling considerations for liquid hydrogen only.....	20
7.7 Special handling considerations for liquid helium only	21
7.8 Handling considerations for liquid tanker truck transfers.....	22
7.9 Handling considerations for hydrogen and helium transfer	23
7.10 Handling considerations for carbon monoxide transfers	24
