

Contents	Page
1 Introduction.....	1
2 Scope and purpose	1
2.1 Scope	1
2.2 Purpose	1
3 Definitions.....	2
4 Types of pressure relief devices.....	4
5 Application requirements for pressure relief devices.....	4
5.1 General.....	4
5.2 Piping of pressure relief systems.....	9
5.3 Commodity-based requirements	9
5.4 Jacket relief device	11
6 Design and construction requirements for pressure relief devices.....	12
6.1 General.....	12
6.2 Flow capacities for conditions other than fire	15
6.3 Flow capacities under fire conditions.....	16
6.4 Pressure relief valves	18
6.5 Rupture disk devices	18
6.6 Rupture disk in combination with a pressure relief valve	19
6.7 Breaking pin device in combination with a pressure relief valve	19
6.8 Fusible plug devices	19
7 Tests of pressure relief devices.....	19
7.1 Pressure tests of pressure relief valves.....	19
7.2 Flow capacity tests of pressure relief valves	20
7.3 Tests of pressure relief devices other than spring-loaded pressure relief valves.....	20
7.4 Rejected material.....	20
8 Identification	20
9 Maintenance requirements for pressure relief devices.....	20
10 References	21
11 Additional references.....	22

Tables

Table 1—Minimum required working pressures and values of G_i and G_u for commonly used flow rating pressures in U.S. customary units	23
Table 2—Minimum required working pressures and values of G_i and G_u for commonly used flow rating pressures in metric units	24
Table 3—Thermal conductivity for refrigerated (cryogenic) fluids at the mean temperature between saturation and 1200 °F at 14.7 psia (649 °C at 101.325 kPa, abs)	30
Table 4—Constant C for gas or vapor related to ratio of specific heats ($k = C_p/C_v$) at 60 °F and 14.696 psia (15 °C and 101.325 kPa, abs).....	30
Table 5—Saturation temperature, compressibility factor, and average specific heat for common gases at selected flow rating pressures	31
