

Contents	Page
1 Introduction.....	1
2 Scope	1
3 Definitions.....	2
4 Design considerations	6
4.1 Valve connection	6
4.2 Temperatures	7
4.3 Leak rate.....	7
4.4 Materials.....	8
4.5 Cleaning	10
4.6 Markings.....	10
4.7 Pressure relief devices	11
4.8 Specific valves.....	11
4.9 Other valve components/devices	12
5 Valve types and descriptions.....	13
5.1 Packed valves	13
5.2 Pressure seal valves	14
5.3 O-ring valves	14
5.4 Diaphragm valves.....	14
5.5 Post-type medical valves.....	15
5.6 Reverse seated valves	15
5.7 Remotely operated valves	15
5.8 Additional valve types.....	16
6 Valve qualification and documentation	16
6.1 General.....	16
6.2 Documentation	18
6.3 Valve qualification test procedure.....	18
7 Valve qualification tests.....	19
7.1 Performance and qualifying test.....	19
7.2 Conditional qualifying tests.....	25
8 Testing of production valves.....	28
9 Maintenance.....	29
9.1 Inspection—general requirements.....	29
9.2 Inspection procedure.....	30
10 Cylinder valve protection caps	32
10.1 Introduction.....	32
10.2 Scope	32
10.3 Cylinder valve cap design.....	33
10.4 Material selection.....	33
10.5 Testing.....	33
10.6 Documentation	34
10.7 Markings.....	34
10.8 Valve protection other than cylinder valve caps	35
11 References	35
12 Additional references.....	37

Tables

Table 1—Sequence of tests for valve qualification 18
Table 2—Sequence of tests for residual pressure device..... 19
Table 3—Torque test values 21
Table 4—Test pressures for tightness tests..... 22
Table 5—Production valve test pressures 28

Appendices

Appendix A—Valve selection guidelines (Informative)..... 38
Appendix B—DOs and DO NOTs relative to valve use and abuse (Informative)..... 39
Appendix C—Compressed gas cylinder valve figures (Informative) 41
Appendix D—Coding system for threaded cylinder outlets and threaded valve inlets (Normative) 45
Appendix E—Oxygen pressure surge test (Normative) 47

Appendices Figures

Figure C-1—Packed valve 41
Figure C-2—Packed valve 41
Figure C-3—Pressure seal valve 42
Figure C-4—O-ring valve 42
Figure C-5—Diaphragm packless valve..... 43
Figure C-6—Post-type medical valve..... 43
Figure C-7—Reverse seated valve 44
Figure C-8—Impact testing 44
Figure E-1—Example of an ignition test installation (ISO 10297, Figure 4) 48
Figure E-2—Pressure cycle specification (ISO 10297, Figure 5)..... 49

Appendices Tables

Table D-1—Cylinder valve inlet code 45
Table D-2—Cylinder valve inlet code, selected international inlet specification..... 46
Table E-1—Test sequence (ISO 10297, Table 3)..... 48
