

Contents	Page
1 Introduction	1
2 Manufacture, properties, and uses	1
2.1 Manufacture	1
2.2 Properties	2
2.3 Commercial uses	11
2.4 Definitions	12
3 General regulations	16
3.1 Jurisdiction of regulatory organizations	16
3.2 Description and classification of sulfur dioxide	17
3.3 Container qualification	18
3.4 Filling density	18
4 Tank cars	18
4.1 Description	18
4.2 Fabrication	19
4.3 Marking and placarding	21
4.4 Filling density	21
4.5 Shipping and receiving	21
4.6 Handling and unloading	22
5 Cargo tanks (tank trucks).....	24
5.1 Description	24
5.2 Fabrication	25
5.3 Requalification	26
5.4 Marking and placarding	26
5.5 Filling	26
5.6 Shipping.....	26
5.7 Unloading.....	27
5.8 Unhooking procedure	29
5.9 Protection.....	29
6 Portable tanks.....	30
6.1 Description	30
6.2 Fabrication	30
6.3 Requalification	31
6.4 Painting, marking, labeling, and placarding	31
6.5 Filling	32
6.6 Shipping.....	32
6.7 Withdrawing sulfur dioxide.....	32
6.8 Storage	33
7 Ton containers	33
7.1 Description	33
7.2 Fabrication	33
7.3 Appurtenances.....	34
7.4 Requalification	34
7.5 Marking and labeling.....	34
7.6 Filling	35
7.7 Storage	35
7.8 Shipping.....	36
7.9 Withdrawing sulfur dioxide.....	37
7.10 Manifolding	38
8 Cylinders.....	38
8.1 Description.....	38

8.2	Appurtenances.....	39
8.3	Requalification	40
8.4	Marking and labeling.....	41
8.5	Filling	42
8.6	Storage	43
8.7	Shipping and handling	43
8.8	Withdrawing sulfur dioxide.....	45
9	Stationary storage.....	45
9.1	Description.....	45
9.2	Fabrication	46
9.3	Nameplate and marking.....	47
9.4	Installation.....	48
9.5	Filling density.....	48
9.6	Storage in rail cars.....	48
10	Piping and equipment.....	49
10.1	Materials of construction.....	49
10.2	Piping.....	49
10.3	Liquid expansion.....	49
10.4	Gaskets.....	49
10.5	Hoses.....	49
10.6	Pressure relief devices	50
10.7	Flow measurements	50
10.8	Pumps for liquid	50
10.9	Compressors (vapor pumps)	51
10.10	Vaporizers.....	51
11	Physiological effects and first aid.....	51
11.1	Exposure limits/odor threshold	51
11.2	Effects of exposure	51
11.3	First aid medical management.....	52
11.4	Medical surveillance/employee training	54
12	Safety and security	54
12.1	Safety equipment.....	54
12.2	Security.....	55
12.3	OSHA hazard communication standard	55
13	Emergency action	56
13.1	In case of accident.....	56
13.2	Spill/leak	56
13.3	Fire.....	56
13.4	Diking.....	56
13.5	Exposure.....	56
13.6	SMART (Sulfur Dioxide Mutual Assistance Response Team).....	56
14	Acknowledgments.....	56
15	References	57

Tables

Table 1—Physical properties of sulfur dioxide	3
Table 2—Properties of sulfur dioxide at various temperatures.....	9
Table 3—Solubility of sulfur dioxide in water at various temperatures and 760 mm Hg pressure	10
Table 4—Solubility of water in liquid sulfur dioxide	10
Table 5—Maximum safe volume of liquid sulfur dioxide in a storage tank at various temperatures	48
