

<b>Contents</b>	<b>Page</b>
1 Introduction.....	1
2 Scope and purpose .....	1
3 Definitions.....	2
4 Design philosophy .....	4
4.1 General criteria .....	4
4.2 Materials compatibility for oxygen service .....	5
4.3 Selection of metals .....	7
4.4 Velocity and gas pressure criteria .....	9
4.5 Selection of nonmetal .....	11
4.6 Lubricants are also detailed in 5.5. Piping systems.....	13
4.7 Siting, remote operation, use of barriers .....	14
5 Piping, valves, and equipment .....	15
5.1 General criteria .....	15
5.2 Piping and fittings .....	15
5.3 Valves.....	17
5.4 Equipment .....	21
5.5 Lubricants .....	26
6 Cleaning .....	27
6.1 General requirements.....	27
6.2 Specification and manufacture of line pipe material.....	29
6.3 Pre-cleaned piping.....	29
6.4 Post-installation cleaning.....	32
6.5 Inspection .....	32
6.6 Records .....	33
7 Construction .....	33
7.1 General criteria .....	33
7.2 Construction plan.....	34
7.3 Pipe fabrication and welding.....	34
7.4 Assembly and installation .....	35
7.5 Inspection and examination.....	37
7.6 Nondestructive testing.....	38
7.7 Documentation .....	38
8 Design and construction of control stations.....	39
8.1 Function.....	39
8.2 Design brief .....	39
8.3 Standards and design codes.....	41
8.4 Materials .....	41
8.5 Barriers or screens .....	41
8.6 Location .....	43
8.7 Grounding/earthing.....	44
8.8 Fabrication.....	44
8.9 Installation .....	44
8.10 Testing.....	44
8.11 Commissioning .....	45
8.12 Operation.....	46
9 Operation, monitoring, and maintenance .....	46
9.1 General safety instruction.....	46
9.2 Commissioning pipelines, piping, and stations.....	49
9.3 Operation and monitoring .....	49
9.4 Information to third parties, work adjacent to pipelines, and update of documents.....	49

9.5	Specialized surveys .....	50
9.6	Damage to the pipeline system .....	50
10	General protective measures .....	51
10.1	Emergency response plan .....	51
10.2	Power supplies and lightning strikes .....	52
10.3	Fire .....	52
10.4	Oxygen deprivation hazards and precautions .....	53
10.5	Accident and damage report .....	53
10.6	Safety management system .....	54
11	References .....	56
12	Additional references .....	59

**Figures**

Figure 1—Oxygen fire triangle .....	4
Figure 2—Impingement velocity curve .....	10
Figure 3—Nonimpingement velocity curve .....	11
Figure 4—Bypass installation .....	19

**Appendices**

Appendix A—Description of promoted ignition combustion test method (Informative) .....	65
Appendix B—Potential ignition mechanisms (Informative) .....	67
Appendix C—Table of nominal alloy compositions and ranges (Normative) .....	69
Appendix D—Table of exemption pressures and minimum thicknesses (Normative) .....	70
Appendix E—Table of minimum safety distances (without barriers) for oxygen control and isolating/metering stations (Informative) .....	71
Appendix F—Example of preventive maintenance program (Normative) .....	72
