

Contents	Page
1 Introduction.....	1
2 Scope	1
3 Typical ASU features.....	1
4 Definitions.....	3
5 Health hazards	7
5.1 Cryogenic liquids	7
5.2 Gas products	8
5.3 Asphyxiation	8
5.4 Oxygen hazards	9
5.5 Protective clothing and personal protective equipment.....	9
6 General plant considerations.....	10
6.1 Site selection	10
6.2 Safety factors in plant layouts.....	10
6.3 Materials of construction.....	10
6.4 Insulation—other than coldbox	11
6.5 Cleaning	12
6.6 Electrical requirements.....	12
6.7 Noise	12
7 Intake air quality	13
7.1 Contaminants	13
7.2 Reactive contaminants that concentrate in oxygen.....	14
7.3 Reactive contaminants that concentrate in nitrogen.....	15
7.4 Plugging components.....	15
7.5 Haze and smoke from fires.....	15
7.6 Contaminant sources.....	16
7.7 Identification of contaminants.....	16
7.8 Location of air intake	16
7.9 Monitoring intake air	17
8 Compressors	17
8.1 Axial compressors	17
8.2 Centrifugal compressors.....	17
8.3 Other dynamic compressor considerations	18
8.4 Reciprocating compressors	18
8.5 Diaphragm compressors	20
8.6 Rotary positive displacement compressors.....	21
8.7 Refrigerant gas compressors	21
8.8 Screw compressors	21
8.9 Lubrication systems.....	21
8.10 Coolers and separators	23
8.11 Suction filters or screens	23
8.12 Special considerations for oxygen service	23
8.13 Operating and maintenance procedures	23
9 Air contaminant removal.....	24
9.1 Removal methods.....	24
9.2 Contaminant removal stages.....	25
9.3 Prepurification unit operation.....	27
9.4 REVEX operation	29
9.5 Supplemental mechanical chillers	31
9.6 Caustic scrubbers.....	31

10	Expanders	32
10.1	Loss of loading and overspeed.....	32
10.2	Oil contamination of the process	33
10.3	Abnormally low temperatures.....	34
10.4	Solids in gas stream	34
10.5	Loss of lubrication.....	34
10.6	Abnormal bearing temperature.....	35
10.7	Abnormal vibration.....	35
10.8	Abnormal speed	35
10.9	Critical speed.....	35
10.10	Fouling of expander with ice or carbon dioxide	35
10.11	Startup and shutdown	36
10.12	Operating and maintenance procedures	36
11	Cryogenic pumps	36
11.1	General.....	36
11.2	Types of pumps	37
11.3	Materials of construction.....	37
11.4	Pump system design	37
11.5	Special considerations for oxygen service	38
11.6	Pump motor.....	38
11.7	Pump operation	39
11.8	Operating and maintenance procedures	39
12	Coldbox	39
12.1	Removing particulate material	39
12.2	Cryogenic adsorbers	40
12.3	Liquid levels.....	41
12.4	Monitoring contaminants	42
12.5	Argon separation and purification.....	42
12.6	Noncondensable purge	43
12.7	Coldbox cleaning.....	44
12.8	Safe holding time for LOX	44
12.9	Liquefaction of air in the main heat exchanger.....	44
12.10	Process upsets	44
13	Control systems.....	45
13.1	Instrumented systems functions	45
13.2	Critical safety systems.....	46
13.3	Operational safety systems	46
13.4	Routine plant operation control systems	47
13.5	Unattended or partially attended operation	47
13.6	Remote operation.....	48
13.7	Additional considerations for computer-based control systems	48
13.8	Additional considerations for failsafe systems.....	49
13.9	Alarm system.....	49
13.10	Regulatory considerations	50
14	Product handling equipment.....	50
14.1	Liquid storage.....	50
14.2	High pressure gas storage vessels	51
14.3	Liquid vaporizers	51
15	Cooling systems	52
16	Plant piping.....	52
16.1	General design considerations for plant piping	52
16.2	General design considerations for check valves	52
16.3	Oxygen piping hazards.....	53

16.4 Pressure relief devices 53

16.5 Cryogenic piping 54

16.6 Dead legs 54

16.7 Carbon steel piping 55

16.8 Venting 55

16.9 Product delivery 55

17 Shutdown procedures 56

17.1 Coldbox shutdown 56

17.2 Liquid and gas disposal 56

17.3 Plant derime 57

18 Repair and inspection 57

18.1 General maintenance considerations 57

18.2 Supervisory control 57

18.3 Special construction and repair considerations 58

18.4 Coldbox hazards 58

18.5 Hazards of working in oxygen-enriched or oxygen-deficient atmospheres 59

18.6 Cleaning 59

19 Operations and training 59

19.1 Operating procedures 59

19.2 Commissioning procedures 59

19.3 Emergency procedures 60

19.4 Management of change 60

19.5 Personnel training 60

20 References 61
