

<b>Contents</b>	<b>Page</b>
1 Introduction.....	1
2 Scope and purpose .....	1
2.1 Scope .....	1
2.2 Purpose .....	1
3 Definitions.....	1
4 Types of pressure relief devices.....	4
5 Application requirements for pressure relief devices.....	4
5.1 General.....	4
5.2 Piping of pressure relief systems.....	9
5.3 Commodity-based requirements .....	9
5.4 Jacket relief device .....	11
6 Design and construction requirements for pressure relief devices.....	11
6.1 General.....	11
6.2 Flow capacities for conditions other than fire .....	15
6.3 Flow capacities under fire conditions.....	16
6.4 Pressure relief valves .....	18
6.5 Nonreclosing devices .....	19
6.6 Nonreclosing device in combination with a pressure relief valve .....	19
6.7 Breaking pin devices in combination with a pressure relief valve.....	19
7 Tests of pressure relief devices.....	19
7.1 Pressure tests of pressure relief valves.....	19
7.2 Flow capacity tests of pressure relief valves .....	19
7.3 Test of pressure relief devices other than pressure relief valves .....	20
7.4 Rejected material.....	20
8 Identification .....	20
9 Maintenance requirements for pressure relief devices.....	20
10 References .....	21
11 Additional references.....	22
 <b>Tables</b>	
Table 1—Minimum required working pressures and values of $G_i$ and $G_u$ for commonly used flow rating pressures in U.S. customary units.....	23
Table 2—Minimum required working pressures and values of $G_i$ and $G_u$ for commonly used flow rating pressures in metric units.....	24
Table 3—Thermal conductivity for refrigerated (cryogenic fluids) at the mean temperature between saturation and 1200 °F at 14.7 psia (649 °C at 101.325 kPa abs) .....	30
Table 4—Constant C for gas or vapor related to ratio of specific heats ( $k = C_p/C_v$ ) at 60 °F and 14.696 psia (15 °C and 101.325 kPa abs).....	30
Table 5—Saturation temperature, compressibility factor and average specific heat for common gases at selected flow rating pressures.....	31
