

CSA B149.3:20
National Standard of Canada

Code for the field approval of fuel-burning appliances and equipment

Legal Notice for Standards

Canadian Standards Association (operating as "CSA Group") develops standards through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA Group administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document's fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party's intellectual property rights. CSA Group does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA Group makes no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA GROUP, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA GROUP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA Group is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA Group accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA Group is a private not-for-profit company that publishes voluntary standards and related documents. CSA Group has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA Group and the users of this document (whether it be in printed or electronic form), CSA Group is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA Group's and/or others' intellectual property and may give rise to a right in CSA Group and/or others to seek legal redress for such use, modification, copying, or disclosure. To the extent permitted by licence or by law, CSA Group reserves all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA Group shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Gas Trade Practice Exam

Updated to the 2020 edition of CSA B149.1. The Gas Trade Practice Exam is an extension of the CSA Gas Trade training materials and is geared to helping Gas Technicians/Fitters pass the certification exam.

Learn More

For more information or to purchase the Gas Trade Practice Exam, phone 1 800 463 6727 or visit store.csagroup.org

- Includes over 1,400 sample exam questions.
- This unique prep tool allows students to both test their acquired technical knowledge and practice writing a mock exam.
- Ideal for users of CSA B149.1 and the Gas Trade 3, Gas Trade 2 or Gas Fitter B programs.
- Wrong answer report provides correct answers and highlights code requirements.
- Available in iOS, android or desktop.

Standards Update Service

CSA B149.3:20 ***January 2020***

Canadian Standards Association (operating as "CSA Group"), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-for-profit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

Individuals, companies, and associations across Canada indicate their support for CSA Group's standards development by volunteering their time and skills to Committee work and supporting CSA Group's objectives through sustaining memberships. The more than 7000 committee volunteers and the 2000 sustaining memberships together form CSA Group's total membership from which its Directors are chosen. Sustaining memberships represent a major source of income for CSA Group's standards development activities.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in eight countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at www.scc.ca.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social well-being, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

12.7.2	Programmable controllers	47
13	Electrical requirements	50
14	Rating plate	51
15	Initial start-up procedure	51
16	Additional requirements for process ovens, process furnaces, and atmosphere generators	51
16.1	Scope	51
16.2	General requirements	52
16.2.1	Design and installation	52
16.2.2	Location	52
16.2.3	Accessibility and mounting of controls	53
16.2.4	Explosion relief	53
16.2.5	Auxiliary fans and dampers	54
16.3	Gas safety devices	54
16.3.1	General	54
16.3.2	Combustion safety controls	54
16.3.3	Temperature bypass controllers and their temperature-sensing elements	55
16.4	Ignition systems	55
16.5	High temperature limit control	55
16.6	Purge cycle	55
16.7	Gas/air mixers	55
16.7.1	Gas/air mixture piping	55
16.7.2	Mixer adjustments	56
16.7.3	Mixing blowers	56
16.7.4	Mechanical gas/air mixers	56
16.7.5	Automatic fire-checks	57
16.8	Radiant-tube heating systems	57
16.9	Atmosphere generators	58
16.9.1	Exothermic generators	58
16.9.2	Endothermic generators	59
17	Generators, compressors/pressure boosters, engines, and turbines	62
17.1	General requirements	62
17.2	Compressors/pressure boosters	62

- 17.3 Engines and turbines 62
- 17.4 Additional requirements for engines and turbines in buildings 64

18 Flare pilot 64

- 18.1 General 64
- 18.2 Valves for flare pilots 65
 - 18.2.1 Manual shut-off valves 65
 - 18.2.2 Flare pilot manual isolation valves 66
 - 18.2.3 Safety shut-off valves 67
 - 18.2.4 Automated valves 67
 - 18.2.5 Other valves 68
- 18.3 Fuel conditioning for flare pilots 68
- 18.4 Pressure regulators for flare pilots 68
- 18.5 Overpressure protection devices for flare pilots 69
- 18.6 Vents for flare pilot valve train components 70
- 18.7 Installation of flare pilots 70
 - 18.7.6 Piping and tubing materials of construction 71
 - 18.7.7 Location 72
- 18.8 Ignition, instrumentation, and alarming for flare pilots 72
- 18.9 Management systems 73

19 Appliances in a complex and integrated facility 74

20 Additional requirements for portable appliances and equipment 74

-
- Annex A (informative) — Recommended procedure for initial start-up of high input equipment [over 400 000 Btu/h (120 kW)] 75
 - Annex B (informative) — Valve diagrams 78
 - Annex C (informative) — Abbreviations 100
 - Annex D (informative) — Guidelines for electronic-type fuel air-ratio control (FARC) systems 101
 - Annex E (informative) — Guidelines for valve proving systems (VPS) 104
 - Annex F (informative) — Requirements for use of oxygen in combustion systems 110
 - Annex G (informative) — Liquid fuels 112
 - Annex H (informative) — Solid fuels 114
 - Annex I (informative) — Risk-based program for determining requirements for an appliance in a complex and integrated facility 115
 - Annex J (informative) — Mobile outdoor food service unit 131
 - Annex K (informative) — Recommended requirements for automatic safety shutoff valves and automatic vent valves installed on gas turbines having capacities greater than 12.5 MMBtu/h (3.66 MW) and inlet pressures greater than 150 psi 137

Preface

This is the sixth edition of CSA B149.3, *Code for the field approval of fuel-burning appliances and equipment*. It supersedes the previous editions published in 2015, 2010, 2005, and 2000 by CSA Group (CSA) as CSA B149.3, and in 1989 by the Canadian Gas Association (CGA) as CAN/CGA-B149.3.

This Code brings together for the convenience of users the applicable requirements for appliances and equipment, originally published as part of the CSA B149.1 and CSA B149.2 Codes.

The major changes to this edition include the following:

- title changed from “Code for the Field Approval of Fuel-Related Components on Appliances and Equipment” to “Code for the field approval of fuel-burning appliances and equipment”;
- updated Scope (Clauses [1.2](#), [1.5](#), and [1.9](#));
- updated reference publications (Clause [2](#));
- updated definitions (Clause [3](#));
- updated requirements and restructured pressure regulators clause (Clause [4](#));
- updated requirements and restructured pilot supply clause (Clause [5](#));
- updated requirements and restructured manual shut-off valves, manual isolation valves, and test firing valves clause (Clause [6](#));
- updated requirements and restructured pilot burners clause (Clauses [7.2](#) and [7.3](#));
- updated requirements for additional requirements for liquid propane valve trains (Clauses [9.1](#), [9.5](#), [9.7](#), [9.8](#), and [9.9](#));
- updated requirements for applications, added section for multi-fuel burners (Clauses [10.1.6](#), [10.1.7](#), [10.1.8](#), [10.2](#), [10.3.1](#), [10.4](#), [10.9.3](#), [10.9.4](#), and [10.11](#));
- updated requirements for safety controls (Clauses [12.1.4](#), [12.1.5](#), [12.4.1](#), [12.5.5](#), and [12.7.2.3](#));
- updated requirements for rating plate (Clause [14](#));
- updated requirements for “Additional requirements for process ovens, process furnaces, and atmosphere generators” (Clause [16.1](#));
- added new Clause [17](#) for “Generators, compressors/pressure boosters, engines and turbines”;
- added new Clause [18](#) for “Flare pilot”, removed Annex, “Guidelines for flare pilot systems”;
- added new Clause [19](#) for “Appliances in a complex and integrated facility”;
- added new Clause [20](#) for “Additional requirements for portable appliances and equipment”;
- revised recommended procedure for initial start-up of high input equipment (Clauses [A.2](#), [A.5](#), and [A.6](#));
- revised guidelines for electronic-type fuel air-ratio control (FARC) systems (Clause [D.2](#));
- added new Annex [I](#) for “Risk-based program for determining requirements for an appliance in a complex and integrated facility”;
- added new Annex [J](#) for “Mobile outdoor food service unit”; and
- added new Annex [K](#) for “Recommended requirements for automatic safety shutoff valves and automatic vent valves installed on gas turbines having capacities greater than 12.5 MMBtu/h (3.66 MW) and inlet pressures greater than 150 psi”.

This Code was prepared by the Technical Committee on Field Approval of Fuel Burning Equipment, under the Fuels and Appliances Strategic Steering Committee, and has been formally approved by the Technical Committee and the Interprovincial Gas Advisory Council.

This Code has been developed in compliance with Standards Council of Canada requirements for National Standards of Canada. It has been published as a National Standard of Canada by CSA Group.

Notes:

- 1) *Use of the singular does not exclude the plural (and vice versa) when the sense allows.*
- 2) *Although the intended primary application of this Code is stated in its Scope, it is important to note that it remains the responsibility of the users of the Code to judge its suitability for their particular purpose.*
- 3) *This Code was developed by consensus, which is defined by CSA Policy governing standardization — Code of good practice for standardization as “substantial agreement. Consensus implies much more than a simple majority, but not necessarily unanimity”. It is consistent with this definition that a member may be included in the Technical Committee list and yet not be in full agreement with all clauses of this Code.*
- 4) *To submit a request for interpretation of this Code, please send the following information to inquiries@csagroup.org and include “Request for interpretation” in the subject line:*
 - a) *define the problem, making reference to the specific clause, and, where appropriate, include an illustrative sketch;*
 - b) *provide an explanation of circumstances surrounding the actual field condition; and*
 - c) *where possible, phrase the request in such a way that a specific “yes” or “no” answer will address the issue.*

Committee interpretations are processed in accordance with the CSA Directives and guidelines governing standardization and are available on the Current Standards Activities page at standardsactivities.csa.ca.
- 5) *This Code is subject to review within five years from the date of publication. Suggestions for its improvement will be referred to the appropriate committee. To submit a proposal for change, please send the following information to inquiries@csagroup.org and include “Proposal for change” in the subject line:*
 - a) *Code designation (number);*
 - b) *relevant clause, table, and/or figure number;*
 - c) *wording of the proposed change; and*
 - d) *rationale for the change.*

CSA B149.3:20

Code for the field approval of fuel-burning appliances and equipment

1 Scope

1.1

This Code contains the requirements for fuel-related components and accessories and their assembly on an appliance utilizing gas, downstream of the manual shut-off valve specified in Clause 6.18.2 of CSA B149.1. Clause [16](#) of this Code contains additional requirements for process ovens, including bakery ovens, process furnaces, and atmosphere generators operating at approximately atmospheric pressure and used by industry for the processing of materials. Recommended requirements for liquid and solid fuel-burning appliances are located in Annex [G](#) (liquids) and Annex [H](#) (solids).

1.2

This Code does not apply to

- a) installations in marine pipeline terminals;
- b) gas where used as a feedstock in petroleum refineries or chemical plants;
- c) gas designated for storage or handling, or both, at propane gas bulk plants;
- d) gas where used for natural gas for vehicles;
- e) a new appliance for which there is an approved Standard;
- f) a manually operated appliance with an input not exceeding 20 000 Btu/h (6 kW) used for industrial applications; and
- g) other fuels not covered in this Code and used in combination with gas.

1.3

When another fuel is used in the installation and in combination with gas, the safe operation of that fuel shall be approved.

1.4

Requirements contained herein apply only to that portion of an appliance using gas as defined in Clause [1.7](#), atmosphere gas, and reaction gas.

1.5

The requirements contained in this Code apply

- a) to new non-certified appliances and equipment of all inputs for which there is no approved Standard;
- b) when the upgrading, conversion or changes to the control system of a certified or non-certified appliance is required, unless a certified conversion kit for that appliance is utilized; and
- c) to programmable logic controllers or microprocessor-based controls used for flame safety and fuel/air ratio control.
