## European foreword

This document ([EN 1888-1:2018](#)) has been prepared by Technical Committee CEN/TC 252 "Child care articles", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2019, and conflicting national standards shall be withdrawn at the latest by December 2019.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes [EN 1888:2012](#).

In comparison with this [EN 1888:2012](#), the significant technical changes relate to the following issues:

- a) chemical hazards;
- b) entrapment hazards;
- c) hazards from moving parts;
- d) entanglement hazards;
- e) parking device test method;
- f) stability of the vehicle;
- g) introduction of an informative [Annex E](#) giving relevant translations for warning sentences;
- h) introduction of an informative [Annex D](#) giving information on the assessment of moving parts of canopies;
- i) introduction of an informative [Annex G](#) giving information on the arrangement of approval marks for car seats.

In November 2014, the European Working Group decided to split [EN 1888](#) into different parts to clearly treat in a different way, new products or new functions of wheeled child conveyances.

[EN 1888](#) is currently composed with the following parts:

- [EN 1888-1](#), *Child care articles — Wheeled child conveyances — Part 1: Pushchairs and prams*;
- [EN 1888-2](#), *Child care articles — Wheeled child conveyances — Part 2: Pushchairs for children above 15 kg up to 22 kg*.

[EN 1888](#) therefore becomes [EN 1888-1](#) and is only applicable to *pushchairs* and *prams*. It will be used as a reference in future parts.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Child care articles – Wheeled child conveyances –

### Part 1: Pushchairs and prams

#### 1 Scope

This European Standard specifies the safety requirements and test methods for *pushchairs and prams*, designed for the carriage of one or more children, up to 15 kg each and up to 20 kg for any *integrated platform* on which a child can stand.

This European Standard does not cover toys, baby carriers fitted with wheels; *pushchairs and prams* propelled by a motor and *pushchairs and prams* designed for children with special needs.

Where a *pushchair or pram* or any part of the *pushchair or pram* has several functions or can be converted into another function it is due to comply with relevant standard(s).
