DS projekt: M315859

ICS: 35.060

**Første del af denne publikations betegnelse er:**

**DS/ISO/IEC, hvilket betyder, at det er en international standard, der har status som dansk standard.**

**Denne publikations overensstemmelse er:**

**IDT med: ISO/IEC 14882:2017**

**DS-publikationen er på engelsk.**

**Denne publikation erstatter: [DS/ISO/IEC 14882:2015](#)**

---

### **DS-publikationstyper**

Dansk Standard udgiver forskellige publikationstyper.

Typen på denne publikation fremgår af forsiden.

Der kan være tale om:

#### **Dansk standard**

- standard, der er udarbejdet på nationalt niveau, eller som er baseret på et andet lands nationale standard, eller
- standard, der er udarbejdet på internationalt og/eller europæisk niveau, og som har fået status som dansk standard

#### **DS-information**

- publikation, der er udarbejdet på nationalt niveau, og som ikke har opnået status som standard, eller
- publikation, der er udarbejdet på internationalt og/eller europæisk niveau, og som ikke har fået status som standard, fx en teknisk rapport, eller
- europæisk præstandard

#### **DS-håndbog**

- samling af standarder, eventuelt suppleret med informativt materiale

#### **DS-hæfte**

- publikation med informativt materiale

Til disse publikationstyper kan endvidere udgives

- tillæg og rettelsesblade

### **DS-publikationsform**

Publikationstyperne udgives i forskellig form som henholdsvis

- fuldttekstpublikation (publikationen er trykt i sin helhed)
- godkendelsesblad (publikationen leveres i kopi med et trykt DS-omslag)
- elektronisk (publikationen leveres på et elektronisk medie)

### **DS-betegnelse**

Alle DS-publikationers betegnelse begynder med DS efterfulgt af et eller flere præfikser og et nr., fx **DS 383**, **DS/EN 5414** osv. Hvis der efter nr. er angivet et **A** eller **Cor**, betyder det, enten at det er et **tillæg** eller et **rettelsesblad** til hovedstandard, eller at det er indført i hovedstandard.

DS-betegnelse angives på forsiden.

### **Overensstemmelse med anden publikation:**

Overensstemmelse kan enten være IDT, EQV, NEQ eller MOD

- **IDT:** Når publikationen er identisk med en given publikation.
- **EQV:** Når publikationen teknisk er i overensstemmelse med en given publikation, men præsentationen er ændret.
- **NEQ:** Når publikationen teknisk eller præsentationsmæssigt ikke er i overensstemmelse med en given standard, men udarbejdet på baggrund af denne.
- **MOD:** Når publikationen er modificeret i forhold til en given publikation.

# Contents

<b>Foreword</b>	<b>xi</b>
<b>1 Scope</b>	<b>1</b>
<b>2 Normative references</b>	<b>2</b>
<b>3 Terms and definitions</b>	<b>3</b>
<b>4 General principles</b>	<b>7</b>
4.1 Implementation compliance . . . . .	7
4.2 Structure of this document . . . . .	8
4.3 Syntax notation . . . . .	8
4.4 The C++ memory model . . . . .	8
4.5 The C++ object model . . . . .	9
4.6 Program execution . . . . .	11
4.7 Multi-threaded executions and data races . . . . .	15
4.8 Acknowledgments . . . . .	20
<b>5 Lexical conventions</b>	<b>22</b>
5.1 Separate translation . . . . .	22
5.2 Phases of translation . . . . .	22
5.3 Character sets . . . . .	23
5.4 Preprocessing tokens . . . . .	24
5.5 Alternative tokens . . . . .	25
5.6 Tokens . . . . .	25
5.7 Comments . . . . .	26
5.8 Header names . . . . .	26
5.9 Preprocessing numbers . . . . .	26
5.10 Identifiers . . . . .	27
5.11 Keywords . . . . .	28
5.12 Operators and punctuators . . . . .	29
5.13 Literals . . . . .	29
<b>6 Basic concepts</b>	<b>39</b>
6.1 Declarations and definitions . . . . .	39
6.2 One-definition rule . . . . .	41
6.3 Scope . . . . .	44
6.4 Name lookup . . . . .	50
6.5 Program and linkage . . . . .	63
6.6 Start and termination . . . . .	66
6.7 Storage duration . . . . .	70
6.8 Object lifetime . . . . .	74
6.9 Types . . . . .	77
6.10 Lvalues and rvalues . . . . .	83
6.11 Alignment . . . . .	84

<b>7</b>	<b>Standard conversions</b>	<b>86</b>
7.1	Lvalue-to-rvalue conversion . . . . .	87
7.2	Array-to-pointer conversion . . . . .	87
7.3	Function-to-pointer conversion . . . . .	88
7.4	Temporary materialization conversion . . . . .	88
7.5	Qualification conversions . . . . .	88
7.6	Integral promotions . . . . .	89
7.7	Floating-point promotion . . . . .	89
7.8	Integral conversions . . . . .	89
7.9	Floating-point conversions . . . . .	90
7.10	Floating-integral conversions . . . . .	90
7.11	Pointer conversions . . . . .	90
7.12	Pointer to member conversions . . . . .	90
7.13	Function pointer conversions . . . . .	91
7.14	Boolean conversions . . . . .	91
7.15	Integer conversion rank . . . . .	91
<b>8</b>	<b>Expressions</b>	<b>93</b>
8.1	Primary expressions . . . . .	96
8.2	Postfix expressions . . . . .	109
8.3	Unary expressions . . . . .	120
8.4	Explicit type conversion (cast notation) . . . . .	129
8.5	Pointer-to-member operators . . . . .	130
8.6	Multiplicative operators . . . . .	131
8.7	Additive operators . . . . .	131
8.8	Shift operators . . . . .	132
8.9	Relational operators . . . . .	133
8.10	Equality operators . . . . .	133
8.11	Bitwise AND operator . . . . .	135
8.12	Bitwise exclusive OR operator . . . . .	135
8.13	Bitwise inclusive OR operator . . . . .	135
8.14	Logical AND operator . . . . .	135
8.15	Logical OR operator . . . . .	135
8.16	Conditional operator . . . . .	136
8.17	Throwing an exception . . . . .	137
8.18	Assignment and compound assignment operators . . . . .	137
8.19	Comma operator . . . . .	138
8.20	Constant expressions . . . . .	139
<b>9</b>	<b>Statements</b>	<b>144</b>
9.1	Labeled statement . . . . .	145
9.2	Expression statement . . . . .	145
9.3	Compound statement or block . . . . .	145
9.4	Selection statements . . . . .	145
9.5	Iteration statements . . . . .	148
9.6	Jump statements . . . . .	150
9.7	Declaration statement . . . . .	152
9.8	Ambiguity resolution . . . . .	153

This is a preview of "DS/ISO/IEC 14882:201...". Click here to purchase the full version from the ANSI store.

<b>10 Declarations</b>	<b>155</b>
10.1 Specifiers . . . . .	157
10.2 Enumeration declarations . . . . .	174
10.3 Namespaces . . . . .	178
10.4 The <code>asm</code> declaration . . . . .	191
10.5 Linkage specifications . . . . .	191
10.6 Attributes . . . . .	194
<b>11 Declarators</b>	<b>201</b>
11.1 Type names . . . . .	202
11.2 Ambiguity resolution . . . . .	203
11.3 Meaning of declarators . . . . .	204
11.4 Function definitions . . . . .	216
11.5 Structured binding declarations . . . . .	219
11.6 Initializers . . . . .	220
<b>12 Classes</b>	<b>237</b>
12.1 Class names . . . . .	239
12.2 Class members . . . . .	241
12.3 Unions . . . . .	251
12.4 Local class declarations . . . . .	254
<b>13 Derived classes</b>	<b>255</b>
13.1 Multiple base classes . . . . .	256
13.2 Member name lookup . . . . .	258
13.3 Virtual functions . . . . .	261
13.4 Abstract classes . . . . .	265
<b>14 Member access control</b>	<b>267</b>
14.1 Access specifiers . . . . .	268
14.2 Accessibility of base classes and base class members . . . . .	269
14.3 Friends . . . . .	272
14.4 Protected member access . . . . .	275
14.5 Access to virtual functions . . . . .	276
14.6 Multiple access . . . . .	276
14.7 Nested classes . . . . .	276
<b>15 Special member functions</b>	<b>278</b>
15.1 Constructors . . . . .	278
15.2 Temporary objects . . . . .	281
15.3 Conversions . . . . .	283
15.4 Destructors . . . . .	286
15.5 Free store . . . . .	289
15.6 Initialization . . . . .	291
15.7 Construction and destruction . . . . .	298
15.8 Copying and moving class objects . . . . .	301
<b>16 Overloading</b>	<b>309</b>
16.1 Overloadable declarations . . . . .	309
16.2 Declaration matching . . . . .	311
16.3 Overload resolution . . . . .	312

16.4	Address of overloaded function . . . . .	333
16.5	Overloaded operators . . . . .	334
16.6	Built-in operators . . . . .	339
<b>17</b>	<b>Templates</b>	<b>342</b>
17.1	Template parameters . . . . .	343
17.2	Names of template specializations . . . . .	347
17.3	Template arguments . . . . .	348
17.4	Type equivalence . . . . .	354
17.5	Template declarations . . . . .	355
17.6	Name resolution . . . . .	373
17.7	Template instantiation and specialization . . . . .	388
17.8	Function template specializations . . . . .	400
17.9	Deduction guides . . . . .	421
<b>18</b>	<b>Exception handling</b>	<b>422</b>
18.1	Throwing an exception . . . . .	423
18.2	Constructors and destructors . . . . .	425
18.3	Handling an exception . . . . .	425
18.4	Exception specifications . . . . .	427
18.5	Special functions . . . . .	430
<b>19</b>	<b>Preprocessing directives</b>	<b>432</b>
19.1	Conditional inclusion . . . . .	433
19.2	Source file inclusion . . . . .	435
19.3	Macro replacement . . . . .	436
19.4	Line control . . . . .	441
19.5	Error directive . . . . .	442
19.6	Pragma directive . . . . .	442
19.7	Null directive . . . . .	442
19.8	Predefined macro names . . . . .	442
19.9	Pragma operator . . . . .	444
<b>20</b>	<b>Library introduction</b>	<b>445</b>
20.1	General . . . . .	445
20.2	The C standard library . . . . .	446
20.3	Definitions . . . . .	446
20.4	Method of description (Informative) . . . . .	449
20.5	Library-wide requirements . . . . .	454
<b>21</b>	<b>Language support library</b>	<b>476</b>
21.1	General . . . . .	476
21.2	Common definitions . . . . .	476
21.3	Implementation properties . . . . .	481
21.4	Integer types . . . . .	490
21.5	Start and termination . . . . .	491
21.6	Dynamic memory management . . . . .	492
21.7	Type identification . . . . .	500
21.8	Exception handling . . . . .	502
21.9	Initializer lists . . . . .	507
21.10	Other runtime support . . . . .	508

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 22, *Programming languages, their environments and system software interfaces*.

This fifth edition cancels and replaces the fourth edition (ISO/IEC 14882:2014), which has been technically revised.

The main changes compared to the previous edition are as follows:

- expression evaluation order is specified in more cases
- removal of trigraphs
- adjustments to value categories resulting in copy elision being mandatory
- additional character and floating point literal syntaxes
- lambda expressions extended to permit capture of `*this` and use in constant expressions
- initializer statements for `if` and `switch` statements
- addition of `constexpr` if statements
- range-based `for` statement generalized to support heterogeneous `begin` and `end` types
- addition of structured bindings
- addition of inline variables
- list initialization extended to support enumerations and aggregates with base classes
- message in `static_assert` is now optional
- addition of nested namespace definition syntax

This is a preview of "DS/ISO/IEC 14882:201...". [Click here to purchase the full version from the ANSI store.](#)

- extended support for attributes
- exception specifications are now part of function types
- template argument deduction is now supported for class templates
- addition of fold expressions
- pack expansion can be performed on using declarations
- permitted forms of template parameters and template arguments have been generalized
- dynamic allocation is supported for over-aligned types
- preprocessor can detect presence of header files with `__has_include`
- new utility functions, types, and templates in the standard library, including
  - an `any` type
  - an `optional` class template
  - a `variant` class template
  - a `clamp` function
  - a `std::byte` type
  - a `not_fn` function
  - a `void_t` alias template
  - `conjunction`, `disjunction`, and `negation` templates
  - an `invoke` function, and `is_invocable` and `invoke_result` type traits
  - an `is_swappable` type trait
- extended constant expression evaluation support in the standard library
- elementary conversion functions between strings and numeric types added
- constructors for `pair` and `tuple` are conditionally-explicit
- `shared_ptr` of array types now supported
- additional algorithms for managing uninitialized memory
- addition of polymorphic memory resources
- addition of substring search facilities providing the Boyer-Moore and Boyer-Moore-Horspool search algorithms
- addition of variable templates for type traits
- addition of a non-owning string view template
- ability to splice elements between containers for maps and sets
- better support for element insertion in unique-key maps
- support for incomplete types in containers
- addition of parallel algorithms
- addition of `sample` algorithm
- addition of mathematical special functions, and `gcd`, `lcm`, and three-argument `hypot` functions
- addition of support for operations on file systems
- addition of shared mutexes and variadic lock guards
- removal of deprecated features

# 1 Scope

[intro.scope]

- <sup>1</sup> This document specifies requirements for implementations of the C++ programming language. The first such requirement is that they implement the language, so this document also defines C++. Other requirements and relaxations of the first requirement appear at various places within this document.
- <sup>2</sup> C++ is a general purpose programming language based on the C programming language as described in ISO/IEC 9899:2011 *Programming languages — C* (hereinafter referred to as the *C standard*). In addition to the facilities provided by C, C++ provides additional data types, classes, templates, exceptions, namespaces, operator overloading, function name overloading, references, free store management operators, and additional library facilities.

## 2 Normative references [intro.refs]

<sup>1</sup> The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

- (1.1) — Ecma International, *ECMAScript Language Specification*, Standard Ecma-262, third edition, 1999.
- (1.2) — ISO/IEC 2382 (all parts), *Information technology — Vocabulary*
- (1.3) — ISO/IEC 9899:2011, *Programming languages — C*
- (1.4) — ISO/IEC 9945:2003, *Information Technology — Portable Operating System Interface (POSIX)*
- (1.5) — ISO/IEC 10646-1:1993, *Information technology — Universal Multiple-Octet Coded Character Set (UCS) — Part 1: Architecture and Basic Multilingual Plane*
- (1.6) — ISO/IEC/IEEE 60559:2011, *Information technology — Microprocessor Systems — Floating-Point arithmetic*
- (1.7) — ISO 80000-2:2009, *Quantities and units — Part 2: Mathematical signs and symbols to be used in the natural sciences and technology*

<sup>2</sup> The library described in Clause 7 of ISO/IEC 9899:2011 is hereinafter called the *C standard library*.<sup>1</sup>

<sup>3</sup> The operating system interface described in ISO/IEC 9945:2003 is hereinafter called *POSIX*.

<sup>4</sup> The ECMAScript Language Specification described in Standard Ecma-262 is hereinafter called *ECMA-262*.

---

<sup>1</sup>) With the qualifications noted in Clauses 21 through 33 and in C.5, the C standard library is a subset of the C++ standard library.
