DS projekt: M326764
ICS: 13.220.20; 45.060.01

Første del af denne publikations betegnelse er:
DS/EN, hvilket betyder, at det er en europæisk standard, der har status som dansk standard.

Denne publikations overensstemmelse er:
IDT med: EN 45545-2:2020

DS-publikationen er på engelsk.

Denne publikation erstatter: [DS/EN 45545-2:2013+A1:2015](#)

DS-publikationstyper

Dansk Standard udgiver forskellige publikationstyper.
Typen på denne publikation fremgår af forsiden.

Der kan være tale om:

Dansk standard

- standard, der er udarbejdet på nationalt niveau, eller som er baseret på et andet lands nationale standard, eller
- standard, der er udarbejdet på internationalt og/eller europæisk niveau, og som har fået status som dansk standard

DS-information

- publikation, der er udarbejdet på nationalt niveau, og som ikke har opnået status som standard, eller
- publikation, der er udarbejdet på internationalt og/eller europæisk niveau, og som ikke har fået status som standard, fx en teknisk rapport, eller
- europæisk præstandard

DS-håndbog

- samling af standarder, eventuelt suppleret med informativt materiale

DS-hæfte

- publikation med informativt materiale

Til disse publikationstyper kan endvidere udgives

- tillæg og rettelsesblade

DS-publikationsform

Publikationstyperne udgives i forskellig form som henholdsvis

- fuldttekstpublikation (publikationen er trykt i sin helhed)
- godkendelsesblad (publikationen leveres i kopi med et trykt DS-omslag)
- elektronisk (publikationen leveres på et elektronisk medie)

DS-betegnelse

Alle DS-publikationers betegnelse begynder med DS efterfulgt af et eller flere præfikser og et nr., fx **DS 383**, **DS/EN 5414** osv. Hvis der efter nr. er angivet et **A** eller **Cor**, betyder det, enten at det er et **tillæg** eller et **rettelsesblad** til hovedstandard, eller at det er indført i hovedstandard.

DS-betegnelse angives på forsiden.

Overensstemmelse med anden publikation:

Overensstemmelse kan enten være IDT, EQV, NEQ eller MOD

- **IDT:** Når publikationen er identisk med en given publikation.
- **EQV:** Når publikationen teknisk er i overensstemmelse med en given publikation, men præsentationen er ændret.
- **NEQ:** Når publikationen teknisk eller præsentationsmæssigt ikke er i overensstemmelse med en given standard, men udarbejdet på baggrund af denne.
- **MOD:** Når publikationen er modificeret i forhold til en given publikation.

EUROPÄISCHE NORM

August 2020

ICS 13.220.20; 45.060.01

Supersedes EN 45545-2:2013+A1:2015

English Version

Railway applications - Fire protection on railway vehicles - Part 2: Requirements for fire behavior of materials and components

Applications ferroviaires - Protection contre
les incendies dans les véhicules ferroviaires
- Partie 2: Exigences du comportement au
feu des matériaux et des composants

Bahnanwendungen - Brandschutz in
Schienenfahrzeugen - Teil 2: Anforderungen an das
Brandverhalten von Materialien und Komponenten

This European Standard was approved by CEN on 22 June 2020.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document ([EN 45545-2:2020](#)) has been prepared by Technical Committee CEN/TC 256 "Railway applications", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by February 2021, and conflicting national standards shall be withdrawn at the latest by February 2021.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes [EN 45545-2:2013+A1:2015](#).

This series of European Standards *Railway applications — Fire protection on railway vehicles* consists of:

- Part 1: General;
- Part 2: Requirements for fire behaviour of materials and components;
- Part 3: Fire resistance requirements for fire barriers;
- Part 4: Fire safety requirements for railway rolling stock design;
- Part 5: Fire safety requirements for electrical equipment including that of trolley buses, track guided buses and magnetic levitation vehicles;
- Part 6: Fire control and management systems;
- Part 7: Fire safety requirements for flammable liquid and flammable gas installations.

The main changes from [EN 45545-2:2013+A1:2015](#) are:

- **integration of the new test standards:**
- deletion of [Annexes A](#) and [B](#) and reference to [EN 16989](#);
- now, [EN 16989](#) is given in [Clause 2](#), Normative references;
- in [Table 2](#), [EN 16989](#) appears for F1 product;
- in [Table 5](#), modification of R18 requirement to be in accordance with [EN 16989](#);
- in [Table 5](#), adding of footnote d to be in accordance with [EN 16989](#);
- deletion of Annex C and reference to [EN 17084](#);
- now, [EN 17084](#) is given in [Clause 2](#), Normative references;
- in [Table 5](#), [EN 17084](#) is now the reference instead of [EN ISO 5659-2 : 50](#) kWm⁻² for the parameter CIT_G;
- in [Clause 2](#), Normative references, new standards appear:
 - [EN 16989](#), *Railway applications — Fire protection on railway vehicles — Fire behaviour test for a complete seat*;
 - [EN 17084](#), *Railway applications — Fire protection on railway vehicles — Toxicity test of materials and components*;
 - [EN 60695-1-40](#), *Fire hazard testing — Part 1-40: Guidance for assessing the fire hazard of electrotechnical products — Insulating liquids (IEC 60695-1-40)*;

This is a preview of "DS/EN 45545-2:2020". [Click here to purchase the full version from the ANSI store.](#)

- and standards were deleted:
- [EN 60584-1](#), *Thermocouples — Part 1: Reference tables*;
- [EN ISO 6507-3](#), *Metallic materials — Vickers hardness test — Part 3: Calibration of reference blocks (ISO 6507-3)*;
- [ISO/TR 9705-2](#), *Reaction-to-fire tests — Full-scale room tests for surface products — Part 2: Technical background and guidance*;
- [ISO 11054](#), *Cutting tools — Designation of high-speed steel groups*;
- [ISO 19702](#), *Toxicity testing of fire effluents — Guidance for analysis of gases and vapours in fire effluents using FTIR gas analysis*;
- [NF X70-100-1](#), *Fire tests — Analysis of gaseous effluents — Part 1: methods for analysing gases stemming from thermal degradation*;
- [NF X70-100-2](#), *Fire tests — Analysis of gaseous effluents — Part 2: tubular furnace thermal degradation method*;
- in [Clause 3](#), Terms and definitions, adding of :
- ISO and IEC maintain terminological databases for use in standardization at the following addresses:
- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>
- **some initial changes based on the return of experience:**
- 4.2.a, adding of « laminated glass where the internal organic layers are not exposed and the percentage mass of organic material is less than or equal to 6 %. »;
- 4.2.e, modification « a product, other than an electric cable:
- meeting a requirement at two different thicknesses with identical formulation and density (of each layer), shall be considered to comply with the requirement at all intermediate thicknesses. A product meeting a requirement at the maximum testable thickness shall be considered to comply with the requirement at greater thicknesses;
- meeting a requirement at two different densities, shall be considered to comply with the requirement at all intermediate densities. The material with a differing density shall have identical formulation and thickness. »;
- 4.2.g, adding of « or with substrates representative of the end use condition in accordance with [5.3](#) »;
- 4.2.h, adding of two new bullet points:
- the technical cabinet contains only mechanical or low power electrical equipment. The cabinet sheets are closed and made of aluminium, steel or glass. The enclosed volume is $\leq 0,1 \text{ m}^3$. Covered openings (e.g. by connectors or switches) are acceptable;
- the technical cabinet sheet material is made of aluminium or steel and the enclosed volume is $\leq 0,5 \text{ m}^3$. For any individual surface of the cabinet, the total area of all openings in that surface shall be less than 1/1000 of the nominal surface area;
- 4.2.j, modification « for organic coatings applied to non-metallic surfaces, the full specified test requirements of chapters [4.3](#) till [4.5](#) are mandatory; »
- 4.2.k, modification « for organic coatings applied to products conforming to [4.2 a\)](#), [ISO 5658-2](#) or [EN ISO 9239-1](#) flame spread tests shall be carried out, but other test requirements such as heat

This is a preview of "DS/EN 45545-2:2020". [Click here to purchase the full version from the ANSI store.](#)

release, smoke emission and toxic gas emission tests are not required if the nominal coating thickness, including any surfacing filler for exterior products is < 0,3 mm, or for interior products the nominal thickness of organic coating is < 0,15 mm; »

— [4.3](#) : modifications:

[4.3.1](#) General

Products compliant to [Table 2](#) or [Table 3](#) are excluded from the grouping assessment.

No requirements apply to products with a combustible mass of $\leq 10\text{g}$ in touching contact only with a product compliant to [Table 2](#) and [Table 3](#).

To assess products within the grouping rules the following parameters have to be considered.

Products shall be assessed within the grouping rules if:

- the exposed area of each product is $\leq 0,2\text{ m}^2$; and
- the combustible mass of each product is $> 10\text{ g}$ or they are in touching contact with another unclassified combustible product; and
- the horizontal distance is $\leq 20\text{ mm}$ and the vertical distance is $\leq 200\text{ mm}$ to a combustible product not assessed to [Table 2](#), [Table 3](#) or R24 according to rule 2; and
- they are not fully separated by a product compliant with the fire integrity requirement of [5.3.7](#).

The combustible masses of the products in this group shall be summed. The assessment process described in [4.3.2](#) to [4.3.4](#) is visualized in the flow chart in [Figure 1](#).

[4.3.2](#) Rule 1

If the total combustible mass of the grouped products is

- $\leq 100\text{ g}$ for interior grouped products;

or

- $\leq 400\text{ g}$ for exterior grouped products;

no requirements apply to the products of this group.

This principle also applies to single products that meet the requirements of [4.3.1](#).

[4.3.3](#) Rule 2

If the total combustible mass of the grouped products exceeds the limits stated in Rule 1, but

- $\leq 500\text{ g}$ for interior grouped products;

or

- $\leq 2000\text{ g}$ for exterior grouped products;

one combustible product of this group has to be tested according to R24.

If this product is compliant to R24 it shall not be considered for further assessment of this group. The remaining products in this group shall be assessed starting with [4.3.1](#) again.

This principle also applies to single products that exceed the mass limits of Rule 1.

[4.3.4](#) Rule 3

This is a preview of "DS/EN 45545-2:2020". [Click here to purchase the full version from the ANSI store.](#)

If the combustible mass of the grouped products exceed the limits stated in Rule 2, one product of the group shall be tested according to the requirements of non-listed products given in [4.5, Table 3](#).

If this product is compliant to the requirements of [Table 3](#) it shall not be considered for further assessment of this group. The remaining products in this group shall be assessed starting with [4.3.1](#).

This principle also applies to single products that exceed the mass limits of Rule 2;

- the flow chart given in [Figure 1](#) is modified to be consistent with the text of [4.3](#);
- [4.4](#): listed products is now containing 28 requirements;
- in [Table 5](#), requirement R27 is new and applied for EX13 products (new category defined in [Table 2](#));
- in [Table 5](#), requirement R28 is new and applied with [5.3.1.2](#);
- in [Table 5](#), new requirement is given for EL9 products : R24 or R25 or R26;
- in [Table 2](#), EL10 products are now named « low power electro technical and electronic products »;
- in [Table 5](#), add of footnotes b, c and d;
- adding of a note below [Table 5](#) to introduce new [Annex B](#);
- in [Table 6](#), modification of standards references as explained in [Clause 2](#), Normative references, in particular :
- in [Table 6](#), modification of T06.01 to be in accordance with [EN 16989](#);
- in [Table 6](#), add of T06.02 to be in accordance with [EN 16989](#);
- in [Table 6](#), add of T06.03 to be in accordance with [EN 16989](#);
- in [Table 6](#), modification of T11.01 to be in accordance with [EN 17084](#);
- in [Table 6](#), modification of T11.02 to be in accordance with [EN 17084](#);
- in [Table 6](#), modification of T12 to be in accordance with [EN 17084](#);
- [5.2.2](#) modification to be in accordance with [EN 16989](#);
- [5.3.2](#) modification of the paragraph;
- [5.3.3](#) adding of this paragraph;
- [5.3.4](#) adding of this paragraph;
- [Annex A](#) is the previous Annex D;
- [Annex B](#) is new and presents a product classification guidance;
- **editorial changes due to the revision:**
- Introduction;
- European Foreword;
- [Annex ZA](#);
- Bibliography.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of Directive (EU) 2016/797.

This is a preview of "DS/EN 45545-2:2020". [Click here to purchase the full version from the ANSI store.](#)

For relationship with Directive (EU) 2016/797, see informative [Annex ZA](#), which is an integral part of this document.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

This is a preview of "DS/EN 45545-2:2020". [Click here to purchase the full version from the ANSI store.](#)

Introduction

[EN 45545-2](#) has been developed from existing fire safety regulations for railway vehicles from the International Union of Railways (UIC) and different European countries.

In using the operation and design categories defined in [EN 45545-1](#), the requirements laid down in this part take into account the current operating conditions for European public rail transport.

This is a preview of "DS/EN 45545-2:2020". Click here to purchase the full version from the ANSI store.

Railway applications – Fire protection on railway vehicles –

Part 2: Requirements for fire behavior of materials and components

1 Scope

This document specifies the reaction to fire performance requirements for materials and products used on railway vehicles as defined in [EN 45545-1](#).

The operation and design categories defined in [EN 45545-1](#) are used to establish hazard levels that are used as the basis of a classification system.

For each hazard level, this part specifies the test methods, test conditions and reaction to fire performance requirements.

It is not within the scope of this document to describe measures that ensure the preservation of the vehicles in the event of a fire.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
