DS projekt: M333204
ICS: 03.080.99; 35.020

Første del af denne publikations betegnelse er:
DS/ISO/IEC TR, hvilket betyder, at det er en international teknisk rapport, der har status som DS-information.

Denne publikations overensstemmelse er:
IDT med: ISO/IEC TR 20000-7:2019

DS-publikationen er på engelsk.

DS-publikationstyper

Dansk Standard udgiver forskellige publikationstyper.
Typen på denne publikation fremgår af forsiden.

Der kan være tale om:

Dansk standard

- standard, der er udarbejdet på nationalt niveau, eller som er baseret på et andet lands nationale standard, eller
- standard, der er udarbejdet på internationalt og/eller europæisk niveau, og som har fået status som dansk standard

DS-information

- publikation, der er udarbejdet på nationalt niveau, og som ikke har opnået status som standard, eller
- publikation, der er udarbejdet på internationalt og/eller europæisk niveau, og som ikke har fået status som standard, fx en teknisk rapport, eller
- europæisk præstandard

DS-håndbog

- samling af standarder, eventuelt suppleret med informativt materiale

DS-hæfte

- publikation med informativt materiale

Til disse publikationstyper kan endvidere udgives

- tillæg og rettelsesblade

DS-publikationsform

Publikationstyperne udgives i forskellig form som henholdsvis

- fuldtekstpublikation (publikationen er trykt i sin helhed)
- godkendelsesblad (publikationen leveres i kopi med et trykt DS-omslag)
- elektronisk (publikationen leveres på et elektronisk medie)

DS-betegnelse

Alle DS-publikationers betegnelse begynder med DS efterfulgt af et eller flere præfikser og et nr., fx **DS 383**, **DS/EN 5414** osv. Hvis der efter nr. er angivet et **A** eller **Cor**, betyder det, enten at det er et **tillæg** eller et **rettelsesblad** til hovedstandard, eller at det er indført i hovedstandard.

DS-betegnelse angives på forsiden.

Overensstemmelse med anden publikation:

Overensstemmelse kan enten være IDT, EQV, NEQ eller MOD

- **IDT:** Når publikationen er identisk med en given publikation.
- **EQV:** Når publikationen teknisk er i overensstemmelse med en given publikation, men præsentationen er ændret.
- **NEQ:** Når publikationen teknisk eller præsentationsmæssigt ikke er i overensstemmelse med en given standard, men udarbejdet på baggrund af denne.
- **MOD:** Når publikationen er modificeret i forhold til en given publikation.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 40, *IT Service Management and IT Governance*.

A list of all parts in the [ISO/IEC 20000](http://www.iso.org/iso/20000) series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

This document provides guidance on the integration of [ISO/IEC 20000-1:2018](#), [ISO 9001:2015](#) and [ISO/IEC 27001:2013](#). All three standards use the clause structure, common terms and common requirements from the high level structure (HLS) of management system standards (MSS) specified in the ISO/IEC Directives, Part 1. The adoption of the HLS enables an organization to align or integrate multiple management system standards. For example, a service management system (SMS) can be integrated with a quality management system based on [ISO 9001](#) or an information security management system based on [ISO/IEC 27001](#). The relationship between these three standards is very close; therefore, many organizations may already recognise the benefits of adopting two or all three of them.

Benefits of an integrated implementation of management systems can be:

- a) less effort and lower cost for the organization to implement the integrated management system and less ongoing effort required to keep it updated;
- b) increased credibility to external parties of the organization having a single integrated management system;
- c) more effective internal processes and improved communication in the organization by streamlining the interaction between the service, quality, and information security management aspects of their management system.

Apart from the common terms, requirements and the HLS, there are other commonalities in these three standards that provide an opportunity for integration. On the other hand, there are also differences that need to be kept in mind when integrating these management systems.

It is assumed that users of this document have access to and a basic understanding of the [ISO/IEC 20000-1](#), [ISO 9001](#), and [ISO/IEC 27001](#) standards. The content of these standards is not repeated nor fully explained in this document.

NOTE — The high level structure (HLS) of management system standards (MSS) specified in the ISO/IEC Directives, Part 1, Annex L, is referred to in this document as either "HLS" or "HLS of MSS". The high level structure was formerly contained in the ISO/IEC Directives, Part 1, Annex SL. In this document, the term "Annex SL" is used only when making a direct citation to a standard that was published when the Annex SL was still in place, e.g. ISO 9001:2015, ISO/IEC 20000-1:2018, ISO/IEC 27001:2013.

Information technology — Service management —

Part 7:

Guidance on the integration and correlation of ISO/IEC 20000-1:2018 to ISO 9001:2015 and ISO/IEC 27001:2013

1 Scope

This document provides guidance on the integrated implementation of a service management system (SMS) as specified in [ISO/IEC 20000-1](#) with a quality management system (QMS) as specified in [ISO 9001](#) and an information security management system (ISMS) as specified in [ISO/IEC 27001](#). It is aimed at those organizations that are intending to either:

- a) implement [ISO 9001](#) when [ISO/IEC 20000-1](#) is already implemented, or vice versa;
- b) implement [ISO/IEC 27001](#) when [ISO/IEC 20000-1](#) is already implemented, or vice versa;
- c) implement both [ISO 9001](#) and [ISO/IEC 20000-1](#) together, or implement both [ISO/IEC 27001](#) and [ISO/IEC 20000-1](#) together;
- d) implement [ISO/IEC 20000-1](#), [ISO 9001](#) and [ISO/IEC 27001](#) together; or
- e) integrate existing management systems based on [ISO/IEC 20000-1](#), [ISO 9001](#) and [ISO/IEC 27001](#).

In practice, an SMS, QMS or ISMS can also be integrated with other management system standards (MSS), such as [ISO 22301](#) or [ISO 55001](#).

[Clause 4](#) provides an introduction to [ISO/IEC 20000-1](#), the HLS of MSS specified in ISO/IEC Directives Part 1 and considerations for the integration of an MSS.

[Clause 5](#) provides an introduction to [ISO 9001](#), commonalities and differences with [ISO/IEC 20000-1](#) and considerations for the integration of an SMS with a QMS.

[Clause 6](#) provides an introduction to [ISO/IEC 27001](#), commonalities and differences with [ISO/IEC 20000-1](#) and considerations for the integration of an SMS with an ISMS.

[Clause 7](#) looks at considerations for the integration of an SMS, a QMS, and an ISMS.

This document also provides correlation information for the terms and definitions of [ISO/IEC 20000-1](#) with [ISO 9001](#) and [ISO/IEC 27001](#) in [Annex A](#). Correlation of the clauses of [ISO/IEC 20000-1](#) with [ISO 9001](#) is shown in [Annex B](#). Correlation of the clauses of [ISO/IEC 20000-1](#) with [ISO/IEC 27001](#) is shown in [Annex C](#).
