This Technical Specification (CEN/TS) was approved by CEN on 13 December 2020 for provisional application.

The period of validity of this CEN/TS is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the CEN/TS can be converted into a European Standard.

CEN members are required to announce the existence of this CEN/TS in the same way as for an EN and to make the CEN/TS available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the CEN/TS) until the final decision about the possible conversion of the CEN/TS into an EN is reached.

## **Introduction**

The aim of this document is to assess the attachment strength of metal mechanically applied press fasteners.

This document provides a method of test. A document providing a technical specification for security of attachment of applied components for infants' clothing is under development.

This document has been developed from Annex B of CEN/TR 16792:2014.

## 1 Scope

This document defines a test method for security of attachment of functional and decorative metal mechanically applied press fasteners to children's clothing including for example gloves, hats, scarves, hosiery, ties, and textile belts.

IMPORTANT: Eyelets and rivets cannot be tested by this method as the integrity of the component when attached to textile fabrics is destroyed in the gripping action. Eyelets and rivets are assessed as described in CEN/TS 17394-4:2021.

This document does not apply to:

- a) child care articles;
- b) shoes, boots and similar footwear;
- c) toys (see NOTE 2);
- d) other articles sold with clothing.

NOTE 1 The above items are covered by other CEN Technical Committees and as such are out of the scope of this document.

NOTE 2 Disguise costumes including carnival costumes are examples of clothing which are also toys and fall within the scope of the Toy Safety Directive.

The scope of this document is limited to metal mechanically applied components. Work is in progress to develop standards for other garment components.

- EN 17394-2:2020, *Textiles and textile products — Part 2: Safety of children's clothing — Security of attachment of buttons — Test method*
- CEN/TS 17394-4:2021, *Textiles and textile products — Part 4: Safety of children's clothing — Security of attachment of components except buttons and metal mechanically applied press fasteners — Test method*

Performance requirements are provided in CEN/TS 17394-1:2021.
