DS projekt: M342110

ICS: 35.060

Første del af denne publikations betegnelse er:

DS/ISO/IEC, hvilket betyder, at det er en international standard, der har status som dansk standard.

Denne publikations overensstemmelse er:

IDT med: ISO/IEC 14882:2020

DS-publikationen er på engelsk.

Denne publikation erstatter: [DS/ISO/IEC 14882:2017](#)

DS-publikationstyper

Dansk Standard udgiver forskellige publikationstyper.

Typen på denne publikation fremgår af forsiden.

Der kan være tale om:

Dansk standard

- standard, der er udarbejdet på nationalt niveau, eller som er baseret på et andet lands nationale standard, eller
- standard, der er udarbejdet på internationalt og/eller europæisk niveau, og som har fået status som dansk standard

DS-information

- publikation, der er udarbejdet på nationalt niveau, og som ikke har opnået status som standard, eller
- publikation, der er udarbejdet på internationalt og/eller europæisk niveau, og som ikke har fået status som standard, fx en teknisk rapport, eller
- europæisk præstandard

DS-håndbog

- samling af standarder, eventuelt suppleret med informativt materiale

DS-hæfte

- publikation med informativt materiale

Til disse publikationstyper kan endvidere udgives

- tillæg og rettelsesblade

DS-publikationsform

Publikationstyperne udgives i forskellig form som henholdsvis

- fuldttekstpublikation (publikationen er trykt i sin helhed)
- godkendelsesblad (publikationen leveres i kopi med et trykt DS-omslag)
- elektronisk (publikationen leveres på et elektronisk medie)

DS-betegnelse

Alle DS-publikationers betegnelse begynder med DS efterfulgt af et eller flere præfikser og et nr., fx **DS 383**, **DS/EN 5414** osv. Hvis der efter nr. er angivet et **A** eller **Cor**, betyder det, enten at det er et **tillæg** eller et **rettelsesblad** til hovedstandard, eller at det er indført i hovedstandard.

DS-betegnelse angives på forsiden.

Overensstemmelse med anden publikation:

Overensstemmelse kan enten være IDT, EQV, NEQ eller MOD

- **IDT:** Når publikationen er identisk med en given publikation.
- **EQV:** Når publikationen teknisk er i overensstemmelse med en given publikation, men præsentationen er ændret.
- **NEQ:** Når publikationen teknisk eller præsentationsmæssigt ikke er i overensstemmelse med en given standard, men udarbejdet på baggrund af denne.
- **MOD:** Når publikationen er modificeret i forhold til en given publikation.

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see <http://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 22, *Programming languages, their environments and system software interfaces*.

This sixth edition cancels and replaces the fifth edition (ISO/IEC 14882:2017), which has been technically revised.

The main changes compared to the previous edition are as follows:

- inclusion of the provisions of ISO/IEC TS 19217:2015, ISO/IEC TS 21425:2017, ISO/IEC TS 22277:2017, ISO/IEC TS 21544:2018, portions of ISO/IEC TS 19571:2016, and portions of ISO/IEC TS 19568:2017.
- addition of concepts, *requires-clauses*, *requires-expressions*, and `<concepts>` (18.3) header
- addition of coroutines, including `co_yield`, `co_await`, and `co_return` keywords and `<coroutine>` (17.12.2) header
- addition of modules, *import-declarations*, and *export-declarations*
- addition of three-way comparison, defaulted comparisons, rewriting of comparison operator expressions, and `<compare>` (17.11.1) header
- addition of designated initializers
- support for class types and floating-point types as the type of a non-type template parameter
- new attributes `[[no_unique_address]]`, `[[likely]]`, `[[unlikely]]`
- support for optional reason string in `[[nodiscard]]` attribute
- ability to require constant initialization with `constexpr` keyword
- ability to require constant evaluation with `constexpr` keyword
- extensions to constant evaluation
- support for controlling destruction in a class-specific operator delete function
- addition of `using enum` declaration
- addition of `char8_t` type
- support for an initializer statement in range-based for loops

This is a preview of "DS/ISO/IEC 14882:202...". Click here to purchase the full version from the ANSI store.

- support for parenthesized aggregate initialization
- extensions to lambda expressions
- extensions to structured bindings
- support for inline namespaces in nested namespace definitions
- support for conditionally-explicit member functions
- extensions to class template argument deduction
- reduced cases in which `typename` is required
- support for calling an undeclared *template-id* via argument-dependent name lookup
- revised memory model
- extended support for variadic macros with `__VA_OPT__`
- feature test macros and `<version>` (17.3.2) header
- addition of ranges and `<ranges>` (24.2) header
- addition of calendar and time zone support
- addition of text formatting library and `<format>` (20.20.1) header
- addition of `<barrier>` (32.8.3.2), `<latch>` (32.8.2.2), and `<semaphore>` (32.7.2) headers
- addition of mathematical constants library and `<numbers>` (26.9.1) header
- support for representing source locations and `<source_location>` (17.8.1) header
- addition of `span` view and `` (22.7.2) header
- addition of joining thread class and `<stop_token>` (32.3.2) header
- extensions to atomic types and operations
- addition of `unsequenced` execution policy
- new utility functions, types, and templates in the standard library
- addition of bit manipulation library and `<bit>` (26.5.2) header
- addition of a synchronized buffered output stream and `<syncstream>` (29.10.1) header
- support for heterogeneous lookup for unordered containers
- support for element existence detection in associative containers
- support for move semantics in `<numeric>` (25.9) algorithms
- support for efficient access to the buffer of a `basic_stringbuf`
- extended constant expression evaluation support in the standard library

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

1 Scope

[intro.scope]

- ¹ This document specifies requirements for implementations of the C++ programming language. The first such requirement is that they implement the language, so this document also defines C++. Other requirements and relaxations of the first requirement appear at various places within this document.
- ² C++ is a general purpose programming language based on the C programming language as described in ISO/IEC 9899:2018 *Programming languages — C* (hereinafter referred to as the *C standard*). C++ provides many facilities beyond those provided by C, including additional data types, classes, templates, exceptions, namespaces, operator overloading, function name overloading, references, free store management operators, and additional library facilities.

[intro.refs]

¹ The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

- (1.1) — ISO/IEC 2382, *Information technology — Vocabulary*
- (1.2) — ISO 8601:2004, *Data elements and interchange formats — Information interchange — Representation of dates and times*
- (1.3) — ISO/IEC 9899:2018, *Programming languages — C*
- (1.4) — ISO/IEC 9945:2003, *Information Technology — Portable Operating System Interface (POSIX¹)*
- (1.5) — ISO/IEC 10646, *Information technology — Universal Coded Character Set (UCS)*
- (1.6) — ISO/IEC 10646:2003,² *Information technology — Universal Multiple-Octet Coded Character Set (UCS)*
- (1.7) — ISO 80000-2:2009, *Quantities and units — Part 2: Mathematical signs and symbols to be used in the natural sciences and technology*
- (1.8) — Ecma International, *ECMAScript³ Language Specification*, Standard Ecma-262, third edition, 1999.

² The library described in ISO/IEC 9899:2018, Clause 7, is hereinafter called the *C standard library*.⁴

³ The operating system interface described in ISO/IEC 9945:2003 is hereinafter called *POSIX*.

⁴ The ECMAScript Language Specification described in Standard Ecma-262 is hereinafter called *ECMA-262*.
