DS projekt: M348609

ICS: 13.040.40

Første del af denne publikations betegnelse er:

DS/EN, hvilket betyder, at det er en europæisk standard, der har status som dansk standard.

Denne publikations overensstemmelse er:

IDT med: EN 17656:2022

DS-publikationen er på engelsk.

DS-publikationstyper

Dansk Standard udgiver forskellige publikationstyper.

Typen på denne publikation fremgår af forsiden.

Der kan være tale om:

Dansk standard

- standard, der er udarbejdet på nationalt niveau, eller som er baseret på et andet lands nationale standard, eller
- standard, der er udarbejdet på internationalt og/eller europæisk niveau, og som har fået status som dansk standard

DS-information

- publikation, der er udarbejdet på nationalt niveau, og som ikke har opnået status som standard, eller
- publikation, der er udarbejdet på internationalt og/eller europæisk niveau, og som ikke har fået status som standard, fx en teknisk rapport, eller
- europæisk præstandard

DS-håndbog

- samling af standarder, eventuelt suppleret med informativt materiale

DS-hæfte

- publikation med informativt materiale

Til disse publikationstyper kan endvidere udgives

- tillæg og rettelsesblade

DS-publikationsform

Publikationstyperne udgives i forskellig form som henholdsvis

- fuldttekstpublikation (publikationen er trykt i sin helhed)
- godkendelsesblad (publikationen leveres i kopi med et trykt DS-omslag)
- elektronisk (publikationen leveres på et elektronisk medie)

DS-betegnelse

Alle DS-publikationers betegnelse begynder med DS efterfulgt af et eller flere præfikser og et nr., fx **DS 383, DS/EN 5414** osv. Hvis der efter nr. er angivet et **A** eller **Cor**, betyder det, enten at det er et **tillæg** eller et **rettelsesblad** til hovedstandarden, eller at det er indført i hovedstandarden.

DS-betegnelse angives på forsiden.

Overensstemmelse med anden publikation:

Overensstemmelse kan enten være IDT, EQV, NEQ eller MOD

- **IDT:** Når publikationen er identisk med en given publikation.
- **EQV:** Når publikationen teknisk er i overensstemmelse med en given publikation, men præsentationen er ændret.
- **NEQ:** Når publikationen teknisk eller præsentationsmæssigt ikke er i overensstemmelse med en given standard, men udarbejdet på baggrund af denne.
- **MOD:** Når publikationen er modifieret i forhold til en given publikation.

EUROPÄISCHE NORM

October 2022

ICS 13.040.40

English Version

Stationary source emissions - Requirements on proficiency testing schemes for emission measurements

Émissions de sources fixes - Exigences relatives aux programmes d'essais d'aptitude destinés aux mesurages des émissions

Emissionen aus stationären Quellen - Anforderungen an Eignungsprüfungsprogramme für Emissionsmessungen

This European Standard was approved by CEN on 12 September 2022.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

European foreword

This document ([EN 17656:2022](#)) has been prepared by Technical Committee CEN/TC 264 "Air quality", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2023, and conflicting national standards shall be withdrawn at the latest by April 2023.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

Introduction

Proficiency testing based on interlaboratory comparisons are widely used for a number of purposes and their use is increasing internationally. Typical purposes for proficiency testing can include:

- evaluation of the performance of laboratories for specific tests or measurements and monitoring laboratories' continuing performance;
- identification of problems in laboratories and initiation of actions for improvement which, for example, may be related to inadequate test or measurement procedures, effectiveness of staff training and supervision, or calibration of equipment;
- establishment of the effectiveness and comparability of test or measurement methods;
- provision of additional confidence to laboratory customers;
- identification of interlaboratory differences;
- education of participating laboratories based on the outcomes of such comparisons;
- validation of uncertainty claims.

The need for ongoing confidence in laboratory performance is not only essential for laboratories and their customers but also for other interested parties, such as regulators, laboratory accreditation bodies and other organizations that specify requirements for laboratories. [EN ISO/IEC 17011](#) requires accreditation bodies to take account of laboratories' participation and performance in proficiency testing. The European Accreditation Organization (EA) recommends including such activities and their results more strongly in the demonstration of competence.

[EN ISO/IEC 17043](#) specifies general requirements on the competence of proficiency testing providers. Their competence covers the design, the performance and the evaluation of proficiency tests. [EN ISO/IEC 17043](#) explicitly states that this document can be used as a basis for the specification of specific technical requirements in specific fields of application.

This document is based on [EN ISO/IEC 17043](#) and is designed such that it can be generally applied in combination with the most current version of [EN ISO/IEC 17043](#). The structure of this document is aligned with the general structure of standards elaborated by ISO/CASCO.

NOTE ISO/CASCO has specified the following "Terms of Reference" for the revision of [ISO/IEC 17043:2010: Revise ISO/IEC 17043:2010 to insert new CASCO common elements and to make editorial changes to informational Annex B. Possibly make minor editorial clarifications in technical requirements to clarify PT for inspection and sampling. Align with other CASCO standards \(e.g., ISO/IEC 17025 and ISO 17034 and related standards, e.g. ISO 13528 and ISO Guide 35\). Help solve an outdated structure and requirements for management system, also confusion in symbols for statistical calculations. Bring harmony in structure and management system requirements for users who also operate testing and calibration laboratories and/or production of reference materials. Finally, bring consistency in requirements for 3rd party accreditation bodies.](#)

This document supplements [EN ISO/IEC 17043](#) by providing clarification and additional information for proficiency testing schemes in the field of emission measurements. However, it will not re-state all the provisions of [EN ISO/IEC 17043](#) and users are reminded of the need to comply with all the relevant criteria detailed in [EN ISO/IEC 17043](#).

Stationary source emissions – Requirements on proficiency testing schemes for emission measurements

1 Scope

This document supplements the requirements of [EN ISO/IEC 17043](#) by providing clarification and additional information for proficiency testing schemes for emission measurements. It gives specific requirements for:

- competence of proficiency testing providers;
- proficiency testing facility characteristics; and
- design, operation and evaluation of proficiency testing schemes by means of interlaboratory comparisons.

All these aspects are necessary in order to organize and conduct proficiency testing on emission measurements.

Requirements on the competence of proficiency testing providers cover personnel, organisation, equipment and environment.

Requirements on the proficiency testing facility characteristics cover measurement sections, measurements ports and working area for the participants.

Requirements on the proficiency testing schemes cover:

- design, including planning, preparations, homogeneity and stability of test atmospheres and statistical design;
- operation, including handling and instruction of participants;
- calculation and use of assigned values; and
- testing results evaluation, including statistical data.

This document supports the application of proficiency testing schemes for checking the performance of testing laboratories in the context of qualification, accreditation and related quality checks in relation to the application of standardized measurement methods such as standard reference methods (SRM) or alternative methods (AM).

This document is applicable in combination with [EN ISO/IEC 17043](#) only.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
