DS projekt: M355732

ICS: 35.240.15

Første del af denne publikations betegnelse er:

DS/ISO, hvilket betyder, at det er en international standard, der har status som dansk standard.

Denne publikations overensstemmelse er:

IDT med: ISO 8583:2023

DS-publikationen er på engelsk.

I tilfælde af redaktionelle fejl i DS-publikationen kan der skrives til:
editorial-mistakes@ds.dk

ADVARSEL: DS-publikationer revideres over tid. Derudover kan sådanne publikationer ændres ved rettelserblade og/eller tillæg. Der kan også udgives rettelserblade, der udelukkende angår oversættelsen af en publikation. Det er derfor vigtigt at sikre sig, at man benytter en gældende udgave, medmindre fx lovgivning kræver andet. Den enkelte publikations status fremgår af <https://webshop.ds.dk/>. Her kan man desuden tilmelde sig en gratis notifikationsservice og følge en udgivet DS-publikations udvikling ved at klikke på "Følg standarden".

En oversigt over forskellige DS-publikationstyper og -betegnelser findes her:

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/foreword.html.

This document was prepared by Technical Committee ISO/TC 68, *Financial services*, Subcommittee SC 9, *Information exchange for financial services*.

This third edition cancels and replaces [ISO 8583-1:2003](#), [ISO 8583-2:1998](#) and [ISO 8583-3:2003](#), which have been technically revised.

The main changes are as follows:

- [ISO 8583-1](#) has been restructured to facilitate maintenance of the messages, data elements and code values by a new [ISO 8583](#) maintenance agency (MA). Parts of Clauses 5, 6, 7, 8 and 9 and Annexes A, B, C, D, E and F from that document are now available at <https://standards.iso.org/iso/8583> (see [A.2.3](#)).
- Corrections and message, element and data code enhancements approved by the [ISO 8583](#) registration and maintenance management group (RMMG) (see [A.2.3](#)) since the publication of [ISO 8583-1](#) have been included.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Financial-transaction-card-originated messages — Interchange message specifications

1 Scope

This document specifies a common interface by which financial-transaction-card-originated messages can be interchanged between acquirers and card issuers.

It specifies message structure and format, including normalized data types. Message, field, value definitions and supporting information are provided by the [ISO 8583](#) maintenance agency (MA). Contact and web page information for the [ISO 8583](#) MA can be found at: https://www.iso.org/maintenance_agencies.html.

The method by which messages are transported or settlement takes place is not within the scope of this document.

NOTE With the proliferation of technology available to financial institutions to offer services to customers, a range of tokens now exist for identifying account relationships (e.g. financial transaction cards). In order to maintain clarity, this document will continue to use card terminology that applies to tokens and cards, unless the element is specific to tokens or cards, in which case it will be identified as such. However, the actual token numeric issued by a financial institution can be different from the associated card numeric.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

[ISO/IEC 7812-1](#), *Identification cards — Identification of issuers — Part 1: Numbering system*

[ISO/IEC 7816-6](#), *Identification cards — Integrated circuit cards — Part 6: Interindustry data elements for interchange*
