## EUROPÄISCHE NORM

September 2023

ICS 13.310

Supersedes EN 15713:2009

English Version

## Secure destruction of confidential and sensitive material - Code of practice

Destruction sécurisée de documents  
confidentiels - Code d'usages

Sichere Vernichtung von vertraulichen  
Unterlagen - Verfahrensregeln

This European Standard was approved by CEN on 24 April 2023.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

## **European foreword**

This document ([EN 15713:2023](#)) has been prepared by Technical Committee CEN/TC 263 “Secure storage of cash, valuables and data media”, the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2024, and conflicting national standards shall be withdrawn at the latest by March 2024.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes [EN 15713:2009](#).

In comparison with the previous edition [EN 15713:2009](#), the following technical modifications have been made:

This document has been technically revised to provide a benchmark for the appropriate processes and procedures available for any person or organization that seeks to safely destroy confidential or sensitive material when it is no longer required.

In addition, this document is also intended to be applicable to objects requiring destruction to ensure product or brand integrity.

In this context, securely destroyed means that any object or data carrier containing confidential or sensitive data is destroyed in such a way that reproduction of the information on them is either impossible or is only possible with considerable expenditure (in terms of personnel, resources and time). Destruction outcome tables are contained in [Annex A \(Tables A.1 to A.7\)](#).

The process criteria are specified in Table B.1 in [Annex B](#).

Any feedback and questions on this document should be directed to the users’ national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

# Secure destruction of confidential and sensitive material – Code of practice

## 1 Scope

This document provides recommendations and requirements for the procedures, processes and performance monitoring to be implemented for the management and control of the physical destruction of confidential and sensitive material to ensure that such material is disposed of securely and safely.

This document can be referenced by anyone who processes such material on behalf of others and covers the following scenarios:

- on site - using mobile equipment at the location of use (destruction equipment is brought to the confidential or sensitive material);
- off site - transport followed by destruction using equipment at a destruction facility (the confidential or sensitive material is brought to the destruction equipment, such as used at a dedicated external facility operated by a service provider);
- use of equipment at the Data Controller's location (confidential or sensitive material and destruction equipment co-located, such as a shredder in a building occupied by a client or clients).

Destruction by erasure (e.g. crypto erasure, data overwriting, degaussing or other forms of magnetic/electronic erasure) is not covered in this document.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
