

Mikrobiologiske undersøgelser i fødevarekæden – Metodevalidering – Del 3: Protokol til verifikation af referencemetoder og validerede alternative metoder, der er gennemført i et enkelt laboratorium – Tillæg 1: Protokol for verifikation af validerede metoder til identifikation af mikroorganismer

Microbiology of the food chain – Method validation – Part 3:
Protocol for the verification of reference methods and validated
alternative methods in a single laboratory – Amendment 1:
Protocol for verification of validated identification methods
of microorganisms

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 34, *Food products*, Subcommittee SC 9, *Microbiology*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 463, *Microbiology of the food chain*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

A list of all parts in the ISO 16140 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Microbiology of the food chain — Method validation —

Part 3:

Protocol for the verification of reference methods and validated alternative methods in a single laboratory

AMENDMENT 1: Protocol for verification of validated identification methods of microorganisms

Introduction (0.1), first paragraph

Replace the third sentence with:

The ISO 16140 series consists of several parts with the general title, *Microbiology of the food chain — Method validation*:

Add the following text after the sixth list item:

— *Part 7: Protocol for the validation of identification methods of microorganisms.*

Introduction (0.1), sixth paragraph

Replace the reference to ISO 17468:2016, 3.5, with:

In the ISO 16140 series, reference methods include standardized reference (ISO and CEN) methods as defined in ISO 17468:2023, 3.7, as a “reference method described in a standard”.
