American National Standard

Approval of an American National Standard requires verification by the American National Standards Institute (ANSI) that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

ANSI does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the ANSI. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

NOTE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing ANS.

FOREWORD (This foreword is not part of American National Standard Z245.1-2008)

This revised American National Standard (ANS) is applicable to the construction, reconstruction, modification, care, maintenance, operation, and use of mobile waste or recyclable materials collecting, transportation and compacting equipment. The standard identifies requirements for the following refuse collecting and compacting equipment mounted on refuse truck chassis: rear-loading, front-loading, and side loading compacting equipment; tilt frame and hoist-type equipment; grapple loaders; satellite vehicles; waste transfer vehicles; recycling collection vehicles; and mechanized container collecting and lifting equipment. The standard does not apply to the truck chassis/cab upon which the waste or recyclable materials collecting and compacting equipment is mounted except for certain provisions as stated in clauses 7.3.1.1 and Section 8.

The first and second revisions of this standard (ANSI Z245.1-1975 and ANSI Z245.1-1984) covered mobile collecting and compacting equipment and stationary compacting equipment. The third revision (ANSI Z245.1-1992), fourth revision (ANSI Z245.1 –1999) and this one contain requirements for mobile collecting and compacting equipment only. Requirements for newly manufactured and remanufactured stationary compactors are contained in American National Standard for - Stationary Compactors - Safety Requirements, ANSI Z245.2-1992 and later revisions, and pertain to stationary compactors manufactured after the effective date of that standard. Stationary compactors manufactured before that date are still covered by ANSI Z245.1-1975 and ANSI Z245.1-1984.

This standard replaces ANSI Z245.1-1999. Provisions of that standard, which are carried forward into this standard, remain in effect and are immediately applicable to all new mobile collecting and compacting equipment.

Because of the difficulty of changing manufacturers’ production lines to incorporate the provisions that are either new or are revisions of clauses of ANSI Z245.1-1999, the following guidelines have been selected by the Accredited Standards Committee Z245 as to effective dates:

- for all new mobile collecting and compacting equipment, twenty-four (24) months after the approval date of this standard;
- for all existing mobile equipment manufactured during the period of December 8, 2001 until 24 months after the approval date of this standard, the provisions of ANSI Z245.1-1999 shall apply;
- for all existing mobile equipment manufactured during the period of January 3, 1994 until December 8, 2001, the provisions of ANSI Z245.1-1992 shall apply;
- for all existing mobile equipment manufactured during the period of May 2,1986 until January 2, 1994, the provisions of ANSI Z245.1-1984 shall apply;
- for all existing mobile equipment manufactured during the period of March 16, 1978 until May 1, 1986, the provisions of ANSI Z245.1-1975 shall apply; and
- for all existing mobile equipment, regardless of the date of manufacture, the provisions of 4.2, 4.3, 5.2, and Clauses 6 and 9 shall apply 24 months after the approval date of this standard.

For more information on mobile equipment safety, see the Manual of Recommended Safety Practices, published by the Environmental Industry Associations, whose address appears below.

This revised standard contains an informative reference annex, which is not considered part of this standard. Inquiries, requests for interpretation and suggestions for improvement of this American National Standard are invited. They should be sent to the Secretary, ASC Z245, c/o Environmental Industry Associations, 4301 Connecticut Ave., NW, Suite #300, Washington, DC 20008.
This revised American National Standard was processed and approved for submittal to ANSI by the Accredited Standards Committee on Equipment Technology and Operations for Wastes and Recyclable Materials, Z245. Committee approval of this standard does not necessarily imply that all committee members voted for its approval. At the time it approved this revised standard, the Z245 Committee had the following members:

Gary Satterfield, Chairman
Craig Wallwork, Secretary

The members of Accredited Standards Committee Z245, and the organizations represented, who participated in the development of this standard were:

Lou Guilmette City of Rochester
Karon Simoni (Alternate) City of Rochester
Carl Hursh Commonwealth of Pennsylvania DEP
Gary Satterfield Waste Equipment Technology Association

American National Standard
for Equipment Technology and Operations for
Wastes and Recyclable Materials —

Mobile Wastes and Recyclable Materials Collection,
Transportation, and Compaction Equipment —
Safety Requirements

0 Introduction

This standard was developed by American National Standards Institute Accredited Standards
Committee Z245 Subcommittee 1 on Mobile Collection Equipment and approved by Accredited
Standards Committee Z245.

This standard revises the collection, transportation and compaction equipment safety requirements
found in ANSI Z245.1-1999 by providing specific requirements for construction, maintenance and
operation necessary to ensure the safe manufacture and operation of the mobile equipment.

The requirements contained in this standard pertain to new mobile collection equipment as
produced by the manufacturer. New requirements and revisions are not intended to be retroactive
for waste collection vehicles manufactured to comply with earlier revisions of this standard. Refer to
the approved edition of ANSI Z245.1 in effect at the time of manufacture for those requirements.

Exceptions and notes contained in the standard apply to the clause or sub-clause in which they are
contained or to which they reference. Exceptions pertain to normative requirements. Notes are
informative and provide guidance for the evaluation of a normative requirement.

The units of distance measurement used in this standard are in the inch-pound system. When a
value for measurement is followed by a value in other units in parentheses (metric) the second
value is only approximate. The first value is the requirement.

1 Scope

1.1 This revised American National Standard is applicable to all persons engaged in the
manufacture, modification, operation, cleaning, maintenance, service, or repair of mobile collecting,
transporting, and compacting equipment. It attempts to distinguish between persons who may be
the legal owner, lessor, lessee, or who are otherwise contracted with or hired to become involved
with, the equipment. Excluded from this standard is equipment used for the collection,
transportation, or disposal of hazardous or flammable materials regulated by title 40 Code of
Federal Regulations (CFR) Part 263 or 49 CFR Parts 171 through 180. Stationary compactors,
which were included in American National Standard for Safety Requirements for Refuse Collection
Collecting and Compacting Equipment — Safety Requirements, ANSI Z245.1-1984, are now
covered by American National Standard for Refuse Collection, Processing, and Disposal Equipment
— Stationary Compactors — Safety Requirements, ANSI Z245.2-1992, as of the effective date of
